Table No.	Topics	Page No.
	INTRODUCTION	
1.1	World Demographics On Diabetes	
1.2	List of Countries with The Highest Numbers Of Estimated Cases Of Diabetes For 2000 And 2030	
1.3	Prevalence of diabetes in India from 1991-2014	
1.4	Diabetic Prevalence in Major Cities Of Gujarat	
1.5	Showing Departmental Studies On Indigenous Food For Their Functional Role	
	REVIEW OF LITERATURE	
2.1	Demography of Diabetes in India (IDF, 2015)	
2.2	Prevalence of Diabetes in Urban India	
2.3	Diabetic Prevalence In Major Cities Of Gujarat	
2.4	Prevalence Of Dm And Hypertension	
2.5	Departmental Studies On Prevalence Of Diabetes	
2.6	Classification Of Obesity Based On BMI	
2.7	Classification Of Blood Pressure For Adults	
2.8	WHO/ISH Classification Of Hypertension Cardiovascular Risk (2003)	
2.9	Pharmacologic Therapy for type 2 diabetes management (ADA, 2016)	
2.10	Synthetic drugs and their side effects	
2.11	Guidelines for planning a diet in diabetes.	
2.12	Cut offs for Glycated haemoglobin in DM	
2.13	Showing Categories Of Increased Risk For Diabetes And Prediabetes	
2.14	Diagnostic Cut Offs For Type 2 Diabetes Mellitus (ADA, 2011)	
2.15	Diagnosis criteria for Diabetes (ADA 2016)	

2.16	Classification Of Blood Pressure For Adults	
2.17	Classification Of Blood Lipid Levels	
2.18	Common dietary supplements used for diabetes	
2.19	Commonly Used Antidiabetic Foods In The Indigenous System Of Health Care	
2.20	Showing efficacy of various functional foods used in the management of Type 2 Diabetes (Human Studies)	
2.21	showing studies done on various functional foods and their effect on Diabetes type II	
2.22	List of plants having antidiabetic activity (Bhushan et al., 2010)	
2.23	Some Anti-Diabetic Medicinal Plants And Their Mode Of Action/Observation	
2.24	Showing Names Of Aegle Marmelos (L.) Correa In Different Languages	
2.25	Summary Of Effect Of Various Dosages Of Aegle Marmelos (L.) Correa Leaves On Antihyperglycemic Activity In Various Animals Models	
2.26	Various Ethnobotanical studies done on Aegle Marmelos (L.) Correa	
2.27	Indigenous Uses of Aegle Marmelos (L.) Correa Leaf by Traditional healers in various communities in India	
	METHODOLOGY	
3.1	Methods And Tools Used For Phase I Analysis Of Aegle Marmelos (L.) Correa Leaf	
3.2	Results of the sensory evaluation of Aegle Marmelos (L.) Correa leaf Juice	
3.3	Nutrient Content of 20g Aegle Marmelos (L.) Correa leaf juice	
3.4	Inclusion And Exclusion Criteria For The Selection Of Subject	
3.5	Details Of The Tools And Techniques Used For Phase III	
3.6	Classification For Obesity	
	R & D PHASE - I	
4.1.1	Proximate Composition of Aegle Marmelos (L.) Correa Leaf	
4.1.2	Mineral content of Aegle Marmelos (L.) Correa leaf	
4.1.3	Mineral Composition in the wild and cultivated variety of Aegle	

	Marmelos (L.) Correa Leaf using X-Ray Fluorescence	
4.1.4	Heavy metal content of the two varieties	
4.1.5	Antioxidant Activity (FRAP) of Wild and Cultivated variety of Aegle Marmelos (L.) Correa Leaves	
4.1.6	Antioxidant Activity (DPPH) of cultivated variety of Aegle Marmelos (L.) Correa Leaves	
4.1.7	Antioxidant Activity (DPPH) of Wild variety of Aegle Marmelos (L.) Correa Leaves	
4.1.8	Details of the HPLC analysis for cultivated variety (Gomayasi)	
4.1.9	Details of the HPLC analysis for Wild variety	
4.1.10	Results of the total phenol, individual phenol and total antioxidant activity of Aegle Marmelos (L.) Correa leaves	
4.1.11	Correlation between TPC, FRAP and DPPH	
4.1.12	Comparison of Proximate Composition of Aegle Marmelos (L.) Correa Leaves with other studies	
4.1.13	Comparison of Minerals in Aegle Marmelos (L.) Correa leaves with other studies	
4.1.14	Comparison of Minerals in AM leaves with other Studies	
4.1.15	Comparison of Trace Elements in AM leaves with other Studies	
4.1.16	Comparison of Heavy Metals in Aegle Marmelos (L.) Correa leaves with other studies	
4.1.17	Comparison of TPC and Antioxidant activity of present study with other studies	
4.1.18	Total phenol content and antioxidant capacity in various extracts of selected herbs	
4.1.19	Comparison of Antioxidant property of Aegle Marmelos (L.) Correa leaf with other medicinal plants	
	R & D PHASE - II	
4.2.1	Various Ayurvedic formulations of Aegle Marmelos (L.) Correa available commercially for general health and disease as reported in the literature (Dry)	
4.2.2	Ayurvedic Poly Herbal Formulations of Aegle Marmelos (L.) Correa To Control Blood Sugar Levels available commercially	

4.2.3	Constituents of these poly herbal formulation and their claims	
4.2.4	Various Ayurvedic Formulations Of Aegle Marmelos (L.) Correa using leaf, fruit, root and stem bark (Malaviya et al., 2012)	
4.2.5	General Information Regarding Practitioners	
4.2.6	Comparison of knowledge regarding diseases in which Aegle Marmelos (L.) Correa was used in Ayurveda and Naturopathic Practitioners:	
4.2.7	Comparison between the types of preparation of Aegle Marmelos (L.) Correa Leaves used by Ayurveda and Naturopathic Practitioners	4.2.
4.2.8	Parts of Aegle Marmelos (L.) Correa leaves used in various treatment according to various practitioners	
4.2.9	Comparison between forms of the preparation	
	R & D PHASE-III	
4.3.1	Quartile values of age of the subjects under the present study	
4.3.2	Baseline Information of the Type II Diabetic Subjects	
4.3.3	Anthropometric Profile of the Screened Type II Diabetic Subjects	
4.3.4	Anthropometric profile of Type II Diabetic Subjects according to Age (Mean \pm SD)	
4.3.5	Body mass index (BMI) of the Type II Diabetes Subjects as per gender	
4.3.6	Body fat composition of Type II Diabetic subjects	
4.3.7	Body fat composition of Type II Diabetic subjects according to age (Mean \pm SD)	
4.3.8	Mean Systolic and Diastolic Blood Pressure Among Type II Diabetic Subjects	
4.3.9	Prevalence of Pre-hypertension and Hypertension in Relation to BMI in Type II Diabetic Subjects (N, %)	
4.3.10	Addiction pattern of Type II Diabetic subjects	
4.3.11	Physical Activity pattern of Type II Diabetic subjects	
4.3.12	Clinical signs and symptoms of the Type II Diabetic Subjects	
4.3.13	Morbidity Profile of the Type II Diabetic Subjects	
4.3.14	Medicines taken by Type II Diabetic Subjects	
4.3.15	General Medical History of The Type II Diabetic Subjects (N, %)	

4.3.16	Monitoring of blood Sugar levels in Type II Diabetic subjects	
4.3.17	Mean Scores obtained for Quality of Life (QOL) of Type II Diabetic Subjects	
4.3.18	Nutrient Intake of Screened Type II Diabetic subjects	
4.3.19	Percent RDA Met For Macronutrients For Type II Diabetic Subjects	
4.3.20	Percent RDA of Total Dietary Fibre Met By Type II Diabetic Subjects	
4.3.21	Percent RDA of Antioxidant Vitamins Met By Type II Diabetic Subjects	
4.3.22	Percent RDA Of Minerals Met By Type II Diabetic Subjects	
4.3.23	Frequency of Consumption Of Fruits And Vegetables As Reported By Type II Subjects (N,%)	
4.3.24	Frequency Distribution with respect to the Food Habit of the Whole Group (N,%)	
4.3.25	Glycaemic and lipid profile of Type II Diabetic subjects (25-69 years) (Mean \pm S.D., mg/dl) (n=60)	
4.3.26	Glycaemic and lipid profile of the hyperlipidemic subjects according to their age (mean \pm SD)	
4.3.27	SGOT, SGPT (liver functions), Serum Creatinine (Kidney fuctions), HsCRP (Anti-inflammatory status) and total protein quartile values of Type II Diabetic Subjects	
4.3.28	Serum FRAP quartile values of Type II Diabetic Subjects	
4.3.29	Frequency Distribution with respect to the Risk Factors of the Whole Group (N, %)	
4.3.30	Mean nutrient intake of Type II Diabetic Subjects in both the groups	
4.3.31	Results of the anthropometric profile of Type 2 Diabetic Subjects in both the groups	
4.3.32	Nutritional status of the subjects according to the WHO 2010 classification	
4.3.33	Body fat composition of the Type 2 Diabetic Subjects in both groups-	
4.3.34	Impact of Aegle Marmelos (L.) Correa leaf juice supplementation	

	on Mean Blood Pressure of the Type II Diabetic Subjects in both the groups (Mean±SD)	
4.3.35	Impact Of Aegle Marmelos (L.) Correa leaf juice supplementation on glycemic and lipid profile of Type II Diabetic Subjects	
4.3.36	Impact of Aegle Marmelos (L.) Correa Leaf Juice on the AIP of both the Groups after 2 months	
4.3.37	Impact of Aegle Marmelos (L.) Correa leaf juice supplementation on other bio-chemical parameters	
4.3.38	Impact of Am Leaf Juice On Serum Frap Status Post Intervention In The Two Groups	
4.3.39	Summary of the impact of Aegle Marmelos (L.) Correa leaf juice supplementation on the Bio-chemical parameters of Type II Diabetic Subjects (Mean±SD)	
4.3.40	Various studies (human clinical trials) proving efficacy of various functional foods used in the management of Type II Diabetes	
4.3.41	Anti-diabetic potential of Aegle Marmelos (L.) Correa leaves - Mechanism of Action (Bahera and Yadav 2013)
