

# List of Figures

Figure No.	Topics	Page No.
	<b>INTRODUCTION</b>	
1.1	Increasing prevalence of diabetes in India.	
	<b>ROL</b>	
2.1	Disorders of glycaemia: etiologic types and stages	
2.2	Comparison between Type 1 and Type 2DM	
2.3	Increasing Prevalence Of Diabetes In India (1991 - 2014)	
2.4	Rural - Urban Distribution of Indian Population	
2.5	Weighted Prevalence Of Diabetes And Prediabetes In Urban And Rural Population Of India (ICMR INDIAB, 2015)	
2.6	Map of India showing recent population based studies showing the prevalence of type 2 diabetes in different parts of India.	
2.7	Pathogenesis Of Type 2 Diabetes Characterized By Impaired Insulin Secretion And Insulin Resistance	
2.8	Pathophysiology of type 2 Diabetes mellitus	
2.9	The structure of the pancreas which houses islets of Langerhans	
2.10	Management of type I and type II Diabetes Mellitus	
2.11	Lifecycle: Obesity-The proposed links	
2.12	Various common herbs used by the traditional system of medicine for the treatment of diabetes	
2.13	Aegle Marmelos (L.) Correa fruits	
2.14	Aegle Marmelos (L.) Correa leaf	
	<b>METHODOLOGY</b>	
	Cultivated variety ( <i>Gomayashi</i> ) and wild variety of Aegle Marmelos (L.) Correa leaf	
	Results of Sensory evaluation of different doses of Aegle Marmelos (L.) Correa leaf juice	
	Map indicating location of Gir Somnath district in Gujarat	
	FIG: Clinical trial- Study venue: Spiritual centre of Veraval city, Dist Gir Somnath, Gujarat, India	

	<b>R &amp; D PHASE - I</b>	
4.1.1	Comparison of the proximate Principles of the two varieties of Aegle Marmelos (L.) Correa leaf	
4.1.5	Std Curve for FRAP Assay	
4.1.6 (a)	Graph on IC50 value of cultivated variety	
4.1.6 (b)	Graph on IC50 of Wild variety	
4.1.7	Graph of Total phenol content and total antioxidant capacity using FRAP and DPPH of Wild and cultivated variety of Aegle Marmelos (L.) Correa Leaves	
4.1.8	Graph of Antioxidant activity (FRAP) of Wild and cultivated variety of Aegle Marmelos (L.) Correa leaves	
4.1.9	Graph of Antioxidant activity (DPPH) of Wild and cultivated variety of Aegle Marmelos (L.) Correa leaves	
4.1.10 (a)	Std Curve for Total Phenol Content of wild variety	
4.1.10 (b)	Std Curve for Total Phenol Content of Cultivated variety	
4.1.11	Chromatogram for the Cultivated variety	
4.1.12	Chromatogram for the Wild variety	
	<b>R &amp; D PHASE - II</b>	
4.2.1	Various Branded Ayurvedic Formulations Of Aegle Marmelos (L.) Correa (Dabur, Baidyanath, Patanjali, Divya and Himalaya Pharmacy)	
4.2.2	Types of Preparation of AM Leaf	
4.2.3	Use of plant parts by the Naturopathic Practitioners and Ayurvedic practitioners	
4.2.4	Percent response of Ayurveda and Naturopathy Practitioners on the use of AM as single and PHF	
4.2.5	Summary of dosage recommended by the practitioners	
	<b>R &amp; D PHASE-III</b>	
4.3.1	Percent calories from macronutrients in type 2 diabetic subjects	
4.3.2	Food Habits of the Type II Diabetic subjects according to food groups	
4.3.3	Average daily intake of food items by type 2 diabetes mellitus subjects
