

LIST OF FIGURES

Figure No.	Title	Page No.
2.1	Global trends in Under five mortality	2.2
2.2	Indian trends in U5MR	2.3
2.3	Global causes of U5MR	2.5
2.4	Percentage of undernourished children below 3 years in India and Gujarat	2.8
2.5	Conceptual framework of determinants of child undernutrition	2.14
2.6	Contributions in DALYs of individual diseases to the total burden of ill-health preventable by improvements in HSW.	2.21
2.7	GAPPD- Pneumonia and diarrhoea intervention scores (%) 2013 for countries shown from left to right in order of highest child pneumonia and diarrhoea mortality.	2.26
2.8	Protest Prevent and treat framework	2.28
2.9	Relative risk of diarrhea and pneumonia incidence and mortality among infants 0–5 months	2.36
2.10	IYCF practices in India for 6-23 months old children (in %)	2.37
3.1	Study Design	4.2
5.1.1	Percent undernutrition in different age groups	5.7
5.1.2	Mean z scores of the children	5.7
5.1.3	Predictors of nutritional status of children (WFA)	5.37
5.1.4	Predictors of nutritional status of children (HFA)	5.41
5.1.5	Predictors of nutritional status of children (WFH)	5.43
5.1.6	Predictors of diarrhoeal morbidities in children	5.46
5.2.1	NS of children in EG before and after the intervention	5.52
5.2.2	NS of children in CG before and after the intervention	5.52
5.2.3	Percentage of children with no diarrhoeal episodes over a period of five months	5.59

Figure No.	Title	Page No.
5.2.4	Ranking of the mother for EH Knowledge scores before and after the intervention	5.63
5.2.5	Ranking of the mother for EH practice scores before and after the intervention	5.64
5.2.6	Ranking of the mother for FH knowledge scores before and after the intervention	5.66
5.2.7	Ranking of the mother for FH practice scores before and after the intervention	5.67
5.2.8	Ranking of the mother for PH Knowledge scores before and after the intervention	5.71
5.2.9	Ranking of the mother for PH practice scores before and after the intervention	5.72
5.2.10	Ranking of the households for EH observations scores before and after the intervention	5.74
5.2.11	Ranking of the mothers for PH observations scores before and after the intervention	5.75
5.2.12	: Ranking of the children for PH observations scores before and after the intervention	5.76
5.2.13	Ranking of the mothers for BF knowledge scores before and after the intervention	5.78
5.2.14	Ranking of the mothers for CF knowledge scores before and after the intervention	5.80
5.2.15	Ranking of the mothers for CF practices scores before and after the intervention	5.81
5.2.16	Ranking of the mothers for knowledge on diarrhea cause and management scores before and after the intervention	5.84
5.2.17	Ranking of the mothers for diarrhea cause and management practice scores before and after the intervention	5.85
