

Contents

Chapter 1. Introduction

1.1. <i>Colloids: The fundamentals</i>	1
1.1.1. Colloidal solution	1
1.1.2. Classification of colloids	2
1.1.3. Properties of colloids	2
1.2. <i>Soils: The fundamentals</i>	10
1.2.1. Soil colloids	10
1.2.2. Clay minerals	11
1.2.3. Source of colloids	13
1.2.4. Precipitation of colloids	13
1.2.5. Surface charge of colloids	14
1.2.6. Electric charge and colloid stability	14
1.2.7. Stability of colloids	14
1.3. <i>The Vadose Zone</i>	16
1.3.1. Separation of colloids from sediments	17
1.3.2. Transport of colloids	19
1.3.3. Particle size	21
1.3.4. Association of contaminant with colloids	23
1.3.5. Colloid associated contaminant transport	23
1.3.6. Inorganic contaminants	24
1.3.7. Organic contaminants	27
1.3.8. Heavy metal contamination	29
1.3.9. Chemistry of chromium	31
1.4. <i>Organic colloids</i>	32
1.5. Aim of the thesis	34

Chapter 2. Experimental 36-56

2.0. <i>Study area</i>	36
2.1. <i>Geology of study area</i>	36
2.2. Experimental	39
2.2.1. Sample collection	39
2.2.2. Characterization of soil/sediment	39

2.2.3. Metal analysis of sediments	43
2.2.4. Colloid separation	44
2.3. <i>Characterization of colloids</i>	45
2.3.1. X- ray diffraction	45
2.3.2. Static light scattering	45
2.3.3. pH	46
2.3.4. Electrical conductivity	46
2.3.5. Colloid concentration	47
2.4. <i>Colloid adsorption</i>	47
2.4.1. Adsorption Kinetics	49
2.5. Colloid mobilization	50
2.6. Water analysis	53
Chapter 3. Results and discussion	57-209
3.0. Mini river section	57
3.1. Soil composition	57
3.2. <i>Colloidal properties</i>	61
3.2.1. pH	75
3.2.2. Colloid concentration	75
3.2.3. Colloid size distribution	75
3.2.4. Electrical conductivity	76
3.3. <i>Mini river section</i>	77
3.3.1. pH	83
3.3.2. Electrical conductivity	83
3.3.3. Colloid size distribution	83
3.4. <i>Characterization of colloids in water samples</i>	84
3.4.1. Colloid size distribution	84
3.4.2. Sample preparation	84
3.4.3. Aquatic colloids (Mahi river)	87
3.4.4. Elemental analysis of aquatic colloids	87
3.5. <i>X-Ray diffraction of colloids</i>	90
3.6. Transmission electron microscopy (TEM)	93
3.7. <i>Colloid mobilization experiments</i>	95

3.7.1. Rayka section	95
3.8 <i>Adsorption of cationic and anionic dyes on soil colloids in aqueous medium</i>	101
3.8.1. Effect of initial concentration	104
3.8.2. Adsorption isotherm	106
3.8.3. Effect of adsorbent mass	108
3.8.4. Effect of pH	109
3.8.5. Adsorption kinetics	113
3.8.6. Pseudo first order equation	115
3.8.7. Pseudo second order equation	115
3.8.8. Intra-particle diffusion studies	116
3.9 <i>Alizarin red dye adsorption and transport experiments</i>	119
3.9.1. Colloid characterization	119
3.9.2. Dye adsorption experiments	122
3.9.3. Mass balance calculations	122
3.9.4. Colloid mobilization	124
3.9.5. Particle release rate calculations	127
3.9.6. Particle size distribution	127
3.9.7. Effect of ionic strength	129
3.9.8. Effect of pH	133
3.10 <i>Methylene blue transport experiments</i>	138
3.10.1. Contaminant	138
3.10.2. Characterization of colloids	140
3.10.3. Mobilization of colloidal particles from the soil	142
3.10.4. Adsorption of methylene blue on colloids	144
3.10.5. Methylene blue transport Experiments	146
3.11 <i>Adsorption of Chromium on colloids</i>	149
3.11.1. Effect of pH	149
3.11.2. Cr(VI), Pb(II), Ni(II) and Cu(II) adsorption on colloids	151
3.11.3. Cr(VI), Pb(II), Ni(II) and Cu(II) transport	154
3.11.4. Transport of chromium in mixed bed	158
3.12 <i>Heavy metal analysis of sediments and water</i>	165

3.12.1. Sample collection	165
3.12.2. Water samples	165
3.12.3. Analytical methods	165
3.12.4. Enrichment factor	170
3.12.5. Water analysis	176
3.13. <i>Simulation experiments for the transport of contaminants in soil column</i>	179
3.13.1. Effect of partition coefficient on the transport of contaminants in clay, silt and sand	185
3.13.2. Effect of flow rate on the transport of chemicals	189
3.14. <i>Remediation of water</i>	193
3.14.1. Materials	193
3.14.2. Separation of humic acid	193
3.14.3. Characterization of humic acid	194
3.14.4. Adsorption experiments	200
3.14.4.1. Adsorption Kinetics	200
3.14.4.2. Effect of initial concentration	200
3.14.4.3. Pseudo first order equation	205
3.14.4.4. Pseudo second order equation	205
Chapter 4	210-213
Conclusions	210
Summary	212
Chapter 5	214
References	214
