

CONTENTS

CHAPTER No.	TITLE	Pg.No.
CHAPTER I	INTRODUCTION	1-18
1.1	Tetravalent metal acid salts	1
1.2	Salient features of tetravalent metal acid (TMA) salts	2
1.3	A literature survey on structural aspects of Cerium(IV) and Thorium(IV) Phosphates	3
1.4	Aim and scope of the present work	9
	References	12
CHAPTER II	SYNTHESIS AND CHARACTERIZATION OF CERIUM (IV) AND THORIUM (IV) PHOSPHATES	19-49
2.1	Introduction	19
2.2	A literature survey in the current area of study	19
2.3	Material synthesis	21
2.4	Experimental	24
2.5	Material characterization	27
2.6	Conclusion	42
	References	45
CHAPTER III	APPLICABILITY OF CERIUM (IV) AND THORIUM(IV) PHOSPHATES AS CATION EXCHANGERS	50-112
3.1	Introduction	50
3.2	Thermodynamics of exchange	52
3.3	Adsorption isotherms	55
3.4	Concepts in ion exchange and metal separations	58
3.5	Aim and scope of the present work	66
3.6	Literature survey in the current area of study	67

3.7	Experimental	68
3.8	Results and discussion – PART I	72
3.9	Results and discussion – PART II	90
3.10	Conclusions	108
	References	109
<hr/>		
CHAPTER IV	APPLICABILITY OF CERIUM (IV) AND THORIUM(IV) PHOSPHATES AS SOLID ACID CATALYSTS	113-168
4.1	Introduction	113
4.2	Principles of green chemistry	113
4.3	Green chemistry and catalysis	114
4.4	Aim and scope of the present work	116
4.5	Esters and esterification	118
4.6	Literature survey in the current area of study	121
4.7	Synthesis of esters	125
4.8	Acetal formation	138
4.9	Literature survey in the current area of study	139
4.10	Acetalization of carbonyl compounds with pentaerythritol (PET)	141
	References	154
<hr/>		
CHAPTER V	APPLICABILITY OF CERIUM (IV) AND THORIUM(IV) PHOSPHATES AS SOLID STATE PROTON CONDUCTORS	169-200
5.1	Introduction	169
5.2	Criteria for ion conduction in solid electrolytes	170
5.3	Criteria for high ionic mobility	170
5.4	Types of solid electrolytes	171
5.5	Mechanism of proton conduction	173

5.6	Limitations of proton conductors	177
5.7	Classification of proton conductors	177
5.8	Applications of proton conductors	179
5.9	Fuel cells - novel concept for power generation	181
5.10	Current status	182
5.11	Literature survey in the current area of study	185
5.12	Experimental	188
5.13	Results and discussion	190
5.14	Conclusions	194
	References	195
