List of Figures

Figure No	Title	Page No
1.1	Diagram of **C_{60}**	2
1.2	Electric Arc Discharge method	3
1.3	Laser Ablation Method	4
1.4.a	Chemical Vapor Deposition Method	4
1.4.b	Chemical Vapor Deposition Method	5
1.5	Structures of Diamond, Graphene and Fullerene	5
1.6	Illustration of (a) [6,6]-bond; (b) [6,5]-bond; and (c) the [5]radialene and 1,3,5-cyclohexatriene substructures of C_{60}	6
1.7	Fullerene solutions in Toluene	9
1.8	AFM images of C_{60} clusters deposited from A) water-toluene dispersion;B) water-methyl benzoate dispersions; C) STM image of C_{60} from toluene solution	14
1.9	Overview of the possible modifications of C_{60}. a) Exohedral functionalization; b) Heterofullerenes; c) Endohedral functionalization; d) Cage-opening modifications and e) Alkali metal fullerides	22
1.10	Examples of reactions involving C_{60}	24
1.11	Industrial applications of [60] fullerene	25
1.12	A dendrimer built on a fullerene nucleus	26
1.13	Potential biological applications of Fullerene	28
1.14	Commercial cosmetic products containing fullerene	29
1.15	Monocarboxylic acid- C_{60}	30
1.16	p,p-bis (aminoethyl)phenyl fullerene[60]	30
1.17	C_{60} – paclitaxel conjugate	31
2.1	Schematic representation of emulsion study	36
2.2	**S**chematic representation of microemulsion study	37
2.3	Fluorescence spectroscopy	39
3.1.a.1	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using Tween 80 without [60] fullerene	46
3.1.a.2	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using Tween 80 with [60] fullerene	46
3.1.b.1	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using Triton X 100 without [60] fullerene	51
3.1.b.2	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using Triton X 100 with [60] fullerene	51
3.1.c.1	Plot of amount of Water required versus ratio (Toluene/1-	56

	alkanol) using SDS without [60] fullerene	
3.1.c.2	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using SDS with [60] fullerene	56
3.1.d.1	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using CTAB without [60] fullerene	61
3.1.d.2	Plot of amount of Water required versus ratio (Toluene/1-alkanol) using CTAB with [60] fullerene	61
3.2	Microemulsion and emulsion	64
3.2.a.1	Triangular phase diagram for TW-80-1-propanol-Toluene and water in absence of [60] fullerene	67
3.2.a.2	Triangular phase diagram for TW-80-1-propanol-Toluene and water in presence of [60] fullerene	67
3.2.a.3	Triangular phase diagram for TW-80-1-butanol-Toluene and water in absence of [60] fullerene	70
3.2.a.4	Triangular phase diagram for TW-80-1-butanol-Toluene and water in presence of [60] fullerene	70
3.2.a.5	Triangular phase diagram for TW-80-1-prentanol-Toluene and water in absence of [60] fullerene	73
3.2.a.6	Triangular phase diagram for TW-80-1-pentanol-Toluene and water in presence of [60] fullerene	73
3.2.a.7	Triangular phase diagram for TW-80-1-hexanol-Toluene and water in absence of [60] fullerene	75
3.2.a.8	Triangular phase diagram for TW-80-1-hexanol-Toluene and water in presence of [60] fullerene	75
3.2.a.9	Triangular phase diagram for TW-80-1-octanol-Toluene and water in absence of [60] fullerene	77
3.2.a.10	Triangular phase diagram for TW-80-1-octanol-Toluene and water in presence of [60] fullerene	77
3.2.b.1	Triangular phase diagram for TX 100-1-propanol-Toluene and water in absence of [60] fullerene	81
3.2.b.2	Triangular phase diagram for TX 100-1-propanol-Toluene and water in presence of [60] fullerene	81
3.2.b.3	Triangular phase diagram for TX 100-1-butanol-Toluene and water in absence of [60] fullerene	84
3.2.b.4	Triangular phase diagram for TX 100-1-butanol-Toluene and water in presence of [60] fullerene	84
3.2.b.5	Triangular phase diagram for TX 100-1-prentanol-Toluene and water in absence of [60] fullerene	86
3.2.b.6	Triangular phase diagram for TX 100-1-pentanol-Toluene and	86

	water in presence of [60] fullerene	
3.2.b.7	Triangular phase diagram for TX 100-1-hexanol-Toluene and water in absence of [60] fullerene	88
3.2.b.8	Triangular phase diagram for TX 100-1-hexanol-Toluene and water in presence of [60] fullerene	88
3.2.b.9	Triangular phase diagram for TX 100-1-octanol-Toluene and water in absence of [60] fullerene	90
3.2.b.10	Triangular phase diagram for TX 100-1-octanol-Toluene and water in presence of [60] fullerene	90
3.2.c.1	Triangular phase diagram for SDS-1-propanol-Toluene and water in absence of [60] fullerene	94
3.2.c.2	Triangular phase diagram for SDS-1-propanol-Toluene and water in presence of [60] fullerene	94
3.2.c.3	Triangular phase diagram for SDS-1-butanol-Toluene and water in absence of [60] fullerene	97
3.2.c.4	Triangular phase diagram for SDS-1-butanol-Toluene and water in presence of [60] fullerene	97
3.2.c.5	Triangular phase diagram for SDS-1-pentanol-Toluene and water in absence of [60] fullerene	99
3.2.c.6	Triangular phase diagram for SDS-1-pentanol-Toluene and water in presence of [60] fullerene	99
3.2.c.7	Triangular phase diagram for SDS-1-hexanol-Toluene and water in absence of [60] fullerene	101
3.2.c.8	Triangular phase diagram for SDS-1-hexanol-Toluene and water in presence of [60] fullerene	101
3.2.c.9	Triangular phase diagram for SDS-1-octanol-Toluene and water in absence of [60] fullerene	103
3.2.c.10	Triangular phase diagram for SDS-1-octanol-Toluene and water in presence of [60] fullerene	103
3.2.d.1	Triangular phase diagram for CTAB-1-propanol-Toluene and water in absence of [60] fullerene	107
3.2.d.2	Triangular phase diagram for CTAB-1-propanol-Toluene and water in presence of [60] fullerene	107
3.2.d.3	Triangular phase diagram for CTAB-1-butanol-Toluene and water in absence of [60] fullerene	110
3.2.d.4	Triangular phase diagram for CTAB-1-butanol-Toluene and water in presence of [60] fullerene	110
3.2.d.5	Triangular phase diagram for CTAB-1-pentanol-Toluene and water in absence of [60] fullerene	112
3.2.d.6	Triangular phase diagram for CTAB-1-pentanol-Toluene and	112

	water in presence of [60] fullerene	
3.2.d.7	Triangular phase diagram for CTAB-1-hexanol-Toluene and water in absence of [60] fullerene	114
3.2.d.8	Triangular phase diagram for CTAB-1-hexanol-Toluene and water in presence of [60] fullerene	114
3.3.a	UV-visible spectrum of [60] fullerene solution and TW 80-[60] fullerene solution at 30^0C	118
3.3.b	UV-visible spectrum of [60] fullerene solution and TX 100-[60] fullerene solution at 30^0C	119
3.3.c	UV-visible spectrum of [60] fullerene solution and SDS-[60] fullerene solution at 30^0C	119
3.3.d	UV-visible spectrum of [60] fullerene solution and CTAB-[60] fullerene solution at 30^0C	120
3.4.a.i	Critical reverse micelle for TW 80-[60] fullerene solution at 30^0C	120
3.4.1.ii	Critical reverse micelle for TW 80-[60] fullerene solution at 40^0C	120
3.4.b.i	Critical reverse micelle for TX-100-[60] fullerene solution at 30^0C	120
3.4.b.ii	Critical reverse micelle for TX-100-[60] fullerene solution at 40^0C	120
3.4.c.i	Critical reverse micelle for SDS-[60] fullerene solution at 30^0C	122
3.4.c.ii	Critical reverse micelle for SDS-[60] fullerene solution at 40^0C	122
3.4.d.i	Critical reverse micelle for CTAB-[60] fullerene solution at 30^0C	122
3.4.d.ii	Critical reverse micelle for CTAB-[60] fullerene solution at 40^0C	122
3.4.a,b,c	Possible reverse micelle structures for non ionic and ionic Surfactants in [60] fullerene solution	124
3.4.d	Schematic representation of water-in-oil reverse micelles cationic surfactant salt CTAB (Cetyltrimethylammonium bromide)	125
3.5.a	Fluorescence spectra of [60] fullerene-Toluene solution +Water +TW 801-alkanol (co surfactant) microemulsion system	126
3.5.b	Fluorescence spectra of [60] fullerene-Toluene solution +Water +TX 100+ 1-alkanol (co surfactant) microemulsion system	126
3.5.c	Fluorescence spectra of [60] fullerene-Toluene solution +Water+SDS+ 1-alkanol (co surfactant) microemulsion system	127
3.5.d	Fluorescence spectra of [60] fullerene-Toluene solution +Water +CTAB+ 1-alkanol (co surfactant) microemulsion system	127
