

Acknowledgment

I pay my sincere gratitude to my supervisor **Dr. Chetan J. Panchal** for sharing his immense technical and scientific knowledge for carrying out my research work. He always extended his hands for supporting me to perform all experiments individually for understanding the technical mechanism of vacuum coating units and other research facilities. He always incentivizes me during the failures of experiments and keeps guiding me to find out new ways to reach success.

I am grateful to my parents Shri. Shashikant Y. Suryavanshi and Smt. Anita S. Suryavanshi and my younger brother Akash S. Suryavanshi for supporting me to carry out my research work.

I owe my gratitude to Dr. Bharati R. Rehani for supporting me in analyzing the X-Ray diffraction data and writing manuscripts. Her best knowledge of the subject and data analyzing skills have put my knowledge to one next level in research.

I am thankful to Prof. B. M. Arora and Dr. Sandip Ghose (Tata Institute of Fundamental Research, Mumbai) for helping me to understand the physics of semiconductor photovoltaic devices and optical measurement set-up.

A high-class research facility was provided by Dr. Sanjay R. Dhage (International Advanced Research Center for Powder Metallurgy and New Materials (ARCI), Hyderabad) for performing a few experiments at the initial learning stage of the research period, and for that, I will be always grateful to him.

Prof. Naresh Padha (Jammu University, Jammu and Kashmir) has always extended his hands to help for characterizations with the available facilities at Jammu University, and for that, I am indebted to him.

I thank Prof. M. S. Desai and Prof. P. K. Mehta for their contribution in writing my Ph. D. thesis. Their expertise always helped me to correct my scientific and grammatical flaws for writing a thesis.

I have great admiration for Prof. K. R. Biyani, Late Prof. P. P. Prabhakaran, and Prof. D. L. Shah for preaching spiritual and administrative stratagem to deal with entanglements of research work.

My senior colleagues, Dr. Vipul Kheraj, Dr. Jaymin R. Ray, Dr. Keyur J. Patel, and Dr. Gopal B. Bhatt have always helped me to understand the function of the coating unit and characterization measurement set-ups and other research facilities available at my research laboratory. I am always grateful to them for their contributions.

I am also very much thankful to Dr. Arvind L. Patel (Director, The Sahjanand Laser Technology Ltd., Gujarat) for providing the laser scribing facility and Dr. Subhash Pai, CEO, Excel Instruments, Mumbai for providing technical support to accelerate my experimental work.

I am very much thankful to the Department of Science and Technology (DST) for providing the financial support as JRF under the SERI research project during my Ph. D.

My sincere thanks to the Dean, Faculty of Technology and Engineering, The M. S. University of Baroda, and the Head, Applied Physics Department for their timely administrative and academic help since my Ph. D. registration under the department.

I am obliged to Mr. P. B. More (Department staff member), for helping me in many non-technical aspects at my research lab during my Ph.D. work.

I express my warm thanks to all my friends, Maya P. Trivedi, Puja V. Iyer, Indumati S. Nair, Dipeeka V. Patanwadia, Shubhangini M. Marathe, Ratan K. Singh, and Dhawal K. Khakhar for cherishing me for my work.

Priya S. Suryavanshi
