

Table of Contents

List of Symbols	i
List of Figures	iv
List of Tables	xi
1 Introduction	1
1.1 Luminescence	2
1.2 Thermoluminescence	3
1.2.1 Theoretical basics	3
1.2.2 Historical account	8
1.2.3 Applications	10
1.3 Optically Stimulated Luminescence	12
1.3.1 Theoretical basics	12
1.3.2 Historical account and applications	13
1.4 TL/OSL instrumentation	16
1.5 TL/OSL phosphors	23
1.6 Chapter-wise details.	24
References	27
2 Feasibility study of various detectors for TL/OSL system	37
2.1 Introduction	37
2.2 A short review of various light detectors	38
2.2.1 Photomultiplier tube	38
2.2.2 P-N photo diode	39
2.2.3 P-I-N photo diode	40
2.2.4 Photo Transistor	40
2.2.5 Avalanche Photo Diode (APD)	40
2.2.6 Single Photon Avalanche Diode (SPAD)	41
2.2.7 Hybrid Photo Detector (HPD)	41

2.2.8 Charge Coupled Device (CCD)	42
2.2.9 Complementary Metal Oxide Semiconductor (CMOS) Sensors	42
2.2.10 Intensified CCD (ICCD)	44
2.2.11 Electron bombardment CCD (EBCCD)	44
2.3 Review of SiPM, dSiPM and EMCCD and its comparison with PMT	44
2.3.1 Silicon Photo Multiplier (SiPM)	44
2.3.2 Digital Silicon Photomultiplier (dSiPM)	48
2.3.3 Electron Multiplying Charge Coupled Device (EMCCD)	50
2.3.4 General comparison of PMT, SiPM, and dSiPM	51
2.3.4.1 Photon detection efficiency (PDE) of the detector	54
2.3.4.2 Spectral range	55
2.3.4.3 Dark Count Rate	56
2.3.4.4 Optical Cross-talk	57
2.3.4.5 Temperature Sensitivity	57
2.3.4.6 Minimum detectable power	58
2.3.4.7 Minimum number of photons needed for P_{min} .	59
2.4 Important parameters for light detection	59
2.4.1 Signal-To-Noise Ratio (SNR)	59
2.4.2 Effect of Quantum Efficiency (QE) and Detector Gain on SNR	61
2.4.3 Mode of operation (Analogue-Digital) and SNR	61
2.5 Detail analysis of SNR, QE and detector gain	63
2.5.1 Analogue Mode	63
2.5.2 Digital Mode (Photon Counting mode)	66
2.6 Conclusion	69
References	70
3 Development and evaluation of the TL/OSL system	72
3.1 Introduction	72
3.2 System description	72
3.3 Thermoluminescence	74
3.3.1 Heater Plate	75
3.3.2 Thermocouple	75
3.3.3 Thermocouple amplifier	76
3.3.4 Trigger circuit	78

3.3.5 FPGA logic for TL	79
3.4 Optically stimulated luminescence	80
3.4.1 Optical stimulation unit for OSL	81
3.4.2 FPGA logic for OSL	85
3.5 FPGA	85
3.6 Transformer design	87
3.6.1 Theoretical considerations in the design	88
3.6.2 Design of the transformer used in the system	90
3.7 Labview	93
3.8 RS232	94
3.9 Light detector (EMCCD)	95
3.10 Optical set-up	97
3.11 Performance results	100
3.12 Dose recovery tests	133
3.12.1 Dose recovery tests with Daybreak, Risoe, and FPGA-EMCCD system using CaF ₂	134
3.13 Conclusion	137
References	138
4. Synthesis and Characterization of the phosphor	139
4.1 Introduction	139
4.2 Synthesis of nano-CaF ₂ co-precipitation method	141
4.3 Structural Characterization using XRD	143
4.3.1 Theoretical background	143
4.3.2 Instrumentation	144
4.3.3 Results	145
4.4 Optical characterization	148
4.4.1 Ultra Violet/Visible Absorption Spectroscopy	148
4.4.1.1 Theoretical background	148
4.4.1.2 Instrumentation	150
4.4.1.3 Results	151
4.4.2 Photoluminescence	152
4.4.2.1 Theoretical background	152
4.4.2.2 Instrumentation	153

4.4.2.3 Results	155
4.5 Conclusion	156
References	157
5 Annealing parameter optimization and TL/OSL characteristics	159
5.1 Introduction	159
5.2 Annealing	159
5.2.1 Air versus vacuum annealing	161
5.2.2 Annealing temperature	162
5.2.3 Annealing duration	165
5.3 Thermal Quenching	168
5.4 TL Characteristics	169
5.4.1 Randall – Wilkins model	170
5.4.2 Garlick-Gibson model	171
5.4.3 General order kinetics	172
5.4.4 Methods for determining TL parameters	173
5.4.4.1 Initial rise method	174
5.4.4.2 Method based on glow curve shape	178
5.4.4.3 Value of the activation energy from the peak temperature	183
5.4.4.4 Various method of variable heating rate	183
5.4.5 TL dose response and minimum detectable dose	185
5.4.6 Mechanism of TL in CaF ₂	188
5.5 Optically stimulated luminescence	189
5.5.1 Optical stimulation	189
5.5.2 Modes of OSL	189
5.5.3 OSL Emission characteristics of the synthesised CaF ₂	192
5.5.3.1 IR-OSL	195
5.5.3.2 Blue OSL	197
5.5.4 OSL dose response	198
5.6 Correlation between TL and OSL of the synthesised CaF ₂	199
5.7 OSL vs TL debate	204
5.8 Radioluminescence (RL)	204
5.9 Conclusion	205
References	208

6 Summary and Future Scope	212
6.1 Summary	212
6.1.1 Development of the TL/OSL spatial luminescence system	212
6.1.2 Synthesis and characterization of nano-phosphor	213
6.2 Future scope	214
 Appendix: VHDL code	 216
