

CONTENTS

List of Publications.....	i
Conference Presentations.....	ii
List of Figures.....	iii
List of Tables.....	vi
List of Abbreviations.....	vii
List of Symbols.....	ix
Chapter 1. Introduction.....	1
1.1. Introduction.....	2
1.2. Research objective.....	4
1.3. Theoretical background.....	5
1.3.1. Transport parameters	5
1.3.2. Solution-diffusion mechanism.....	9
1.3.3. Selectivity or Separation factor.....	10
1.3.4. Plasticization phenomenon.....	11
1.4. Literature survey	12
1.5. Thesis overview	17
References.....	18
Chapter 2. Experimental Techniques.....	25
2.1. Introduction.....	25
2.2. Materials.....	27
2.2.1. Pure and composite membranes.....	27
2.2.2. Gasses for permeation.....	28
2.3. Membrane fabrication.....	28
2.3.1. Metal coated polycarbonate membrane.....	28
2.3.2. Silica nanocomposite polycarbonate membrane.....	29
2.3.3. Nanosilica doped PC/PSF blend composite membrane.....	30
2.4. Gas permeation techniques.....	32
2.4.1. Constant volume/variable pressure method.....	32
2.4.2. Constant pressure/variable volume method.....	34

2.4.3. Differential pressure method for gas transmission rate.....	40
2.5. Additional characterization techniques.....	42
2.5.1. Scanning Electron Microscopy (SEM).....	42
2.5.2. Differential Scanning Calorimetry (DSC).....	44
2.5.3. Dynamic Mechanical Analysis (DMA).....	46
References.....	49

Chapter 3. Gas Transport through Layered Polymer Nanocomposite

Membrane.....	51
3.1. Introduction.....	51
3.2. PC and PC/Pt-Pd membranes.....	53
3.2.1. Gas permeation	53
3.2.2. Effect of metal coating on selectivity.....	57
3.2.3. Scanning Electron Microscopy (SEM).....	59
3.3. CO ₂ plasticization effect.....	60
3.3.1. CO ₂ permeability.....	60
3.3.2. Effect of feed pressure on selectivity.....	64
3.4. Summary.....	66
References.....	67

Chapter 4. Hydrogen Transport through Metal Coated and Nanofiller

Polycarbonate.....	70
4.1. Introduction.....	70
4.2. Hydrogen flux through membrane.....	72
4.2.1. Rate of H ₂ transport across metal coated PC membrane.....	72
4.2.2. Rate of H ₂ transport across MMMs.....	75
4.3. Hydrogen permeability through the membrane.....	78
4.3.1. Metal/alloy coated PC membrane.....	78
4.3.2. Mixed Matrix Membrane.....	79
4.4. Additional characterizations.....	81
4.4.1. Scanning Electron Microscopy (SEM).....	81
4.4.2. Differential Scanning Calorimetry (DSC).....	83
4.4.3. Dynamic Mechanical Analysis (DMA).....	83

4.5. Selectivity.....	84
4.6. Summary.....	85
References.....	86
Chapter 5. Gas Permeation through Polymer Blends and Blend Composite	
Membranes.....	89
5.1. Introduction.....	89
5.2. Effect of blend composites on gas transport parameters.....	91
5.2.1. Study of hydrogen transport.....	91
5.2.2. Study of carbon dioxide transport.....	96
5.2.3. Study of oxygen transport.....	100
5.3. Other analytical characterizations.....	103
5.3.1. Membrane appearance.....	103
5.3.2. Scanning Electron Microscopy (SEM).....	104
5.3.3. Differential Scanning Calorimetry (DSC).....	105
5.3.4. Dynamic Mechanical Analysis (DMA).....	108
5.4. Effect of blend composites on selectivity.....	112
5.5. Summary.....	114
References.....	115
Chapter 6. Conclusion and Future Scopes.....	118
6.1. Conclusion.....	118
6.2. Future scopes.....	121
References.....	123
