

List of Figures

FIGURE NO.	PARTICULARS	PAGE NO.
1.1	Installed capacity growth of India since 1947	4
1.2	Split up of target capacity of 175GW up to 2022 in India	11
1.3	Trajectory of Solar PV project capacity at different level of difficulty 2012-2047	14
1.4	Trajectory of Wind power project capacity at different level of difficulty 2012-2047	15
4.1	Sampling process in flow chart mode	105
4.2	Complete research methodology in the graphical form	108
5.1	Graphical presentation of breakup of respondents with reference to `Years of Experience`.	116
5.2	Graphical presentation of Breakup of respondents companies presence in various state of India	117
5.3	Graphical presentation of Breakup of respondents companies by `Types of Organizations`	118
5.4	Graphical presentation of Perception of various stakeholders for their contribution	120
5.5	Graphical presentation of descriptive statistic with respect to the perception of various respondent/stack holders	127
5.6	Scree Plot for factors influencing the decision of installation of renewable energy projects	151
5.7	Scree Plot for the factors on constraints for Renewable Energy project capacity development wrt available RE potential	159
5.8	Scree Plot for factors related to the challenges / barriers affect for the developments of utility scale RE projects	166
5.9	Scree Plot for focuses on the government policies those are supportive for the investment in the utility scale RE projects	173
5.10	Scree Plot for factors that contribute to make utility scale renewable energy project more affordable and viable	180
