

List of Tables

3.1	The ensemble averaged values of parameters γ_1 (skewness) and γ_2 (excess) for various embedded ensemble examples used in this chapter.	34
3.2	Average values of the closest neighbor spacings ($\langle s_{CN} \rangle$) and farther neighbor spacings ($\langle s_{FN} \rangle$) obtained numerically for various embedded ensemble examples used in this chapter. Theoretical average values for Poisson and GOE are also given.	34
