

LIST OF TABLES

Table 1: Genome features of lactobacilli	4
Table 2: Source of lactobacilli	5
Table 3: Ecology of lactobacilli	6
Table 4: Bacterial sources of α -galactosidase enzyme.....	11
Table 5: Lactobacilli and raw materials used in the production of lactic acid.....	15
Table 6: Lactobacilli used for lactic acid production from synthetic medium.....	16
Table 7: List of commercially available fermented food using lactobacilli	18
Table 8: Common pulses consumed globally.....	19
Table 9: Lactobacilli isolated from fermented legume products across world.....	21
Table 10: Proximate composition of pulses.....	21
Table 11: Summary of physicochemical parameter of naturally fermented dal flour batter....	42
Table 12: Colony characteristics of isolates.....	43
Table 13: Biochemical test of isolates.....	48
Table 14: Carbohydrate fermentation profile of isolates.....	48
Table 15: Phenotypic characteristics of isolates from fermented batter.....	49
Table 16: Results of 16S identification by BLAST analysis.....	53
Table 17: Kinetic parameters of lactic acid production using MRS-glu medium.....	56
Table 18: Kinetic parameter of bacterial growth curve in MRS-glu medium.....	58
Table 19: Retention time of standard lactic acid.....	77
Table 20: Retention time (t_R) and area for LA at different hours in PP.....	78
Table 21: Retention time (t_R) and area for LA at different hours in RL	79
Table 22: Retention time (t_R) and area for LA at different hours in BG.....	80
Table 23: Retention time (t_R) and area for LA at different hours in BB.....	81
Table 24: Retention time (min) and area of standard acetic acid and ethanol	83
Table 25: Retention time (t_R) and area of acetic acid and ethanol in PP.....	83
Table 26: Retention time (t_R) and area of acetic acid and ethanol in RL.....	84
Table 27: Retention time (t_R) and area of acetic acid and ethanol in BG	85
Table 28: Retention time (t_R) and area of acetic acid and ethanol in BB.....	85
Table 29: Effect of processing methods on tannin content in some pulses beans.....	88
Table 30: Effect of processing methods on saponin content in some pulses beans.....	89
