

## **ACKNOWLEDGEMENTS**

First and foremost, I express my deep sense of gratitude to our God Almighty for providing me strength during the period of this research work. I wish to look back with a sense of contentment and to be thankful to several people, some of who were with me from the beginning and some who joined me at different stages during this journey whose kindness, love and blessings in some way or the other have brought me to this day.

It gives me an immense pleasure to express my deep sense of gratitude to my research guide Prof. Arun Pratap (Prof. & Head, Applied Physics Department, Faculty of Technology and Engineering, The M.S. University of Baroda) for giving me an opportunity to work under his guidance and his extensive contribution to my research work. His enthusiasms, dedication to research and positive attitude have always been inspirational to me. This thesis would not have been possible without his constant support and encouragement during the entire period of my Ph.D research work.

I am also truly indebted to my co-guide Prof. P.K. Jha (Professor, Department of Physics, Faculty of Science, The M.S. University of Baroda) for his valuable suggestions and guidance throughout the work. I admire his scientific inputs, patience and generous support which always motivated me.

I am grateful to Dr. Bharati Rehani (Department of Metallurgical and Materials Engineering, Faculty of Technology and Engineering, The M.S. University of Baroda) for her valuable suggestion and discussion during the preparation of nanocomposites.

I am thankful to every faculty and staff member of Applied Physics Department for their kind support.

I would like to acknowledge UGC, New Delhi, for providing the financial support under Research Fellowship in Science for Meritorious Students (RFSMS) scheme.

I am grateful to Dr. Kusum Yadav (Head of the Department, Shri Maneklal M. Patel Institute of Sciences and Research, Kadi Sarva Vishwavidyalaya, Gandhinagar) for allowing me to pursue my research work.

I express my sincere thanks to my senior lab mates Dr. Ashmi T. Patel and Dr. Nirav Joshi who have been supportive in my work. I am very much thankful to my colleagues Supriya

Kashyap, Sonal Prajapati and Prapti Pandya for maintaining a warm and encouraging atmosphere. They made my working in the laboratory very enjoyable.

I am deeply thankful to my friend and colleague Dr. Venu Mankad for her support and advice at the various stages of this journey. I would like to express my thanks to my seniors Dr. Shree Mishra and Dr. Sanjeev Gupta for their remarkable suggestion during my research work.

I would especially like to thank my lab mates as well as room mates Nidhi Astik and Shweta Dabhi for making my stay cheerful at Vadodara. I am also thankful to my friends and lab mates Himadri Soni and Priyanka Jakhmola who have been supportive and provided lively atmosphere.

I convey my respectful regards to my most adorable parents Mr. Ashok H. Bhatt and Mrs. Varsha A. Bhatt. They have always been my source of strength. I am deeply grateful for their unconditional love and emotional support. The present work would have not been possible without my father's encouragement. He always gave me freedom to choose my path independently. Today wherever he is, I pray to God, to shower me always with his blessings.

I wish my special grateful thanks to my husband Dr. Kaushal K. Oza for his constant support and patience in my endeavor. He helped me to believe in myself and encouraged me by sharing his own research experiences.

My loving thanks go to my younger sister Niyati Shah and brother-in-law Parth Shah whose love and care kept me focused during my research journey.

I am very much thankful to my father-in-law, Mr. Kamlesh Oza. mother-in-law, Mrs. Varsha K. Oza and brother-in-law, Mr. Chintan Oza for their valuable support and understanding.

**- Purvi A. Bhatt**
