

LIST OF TABLES

Table 2.1	Jet breakup regimes (Lin and Reitz, 1998 and Atay, 1986)	12
Table 2.2	References on jet breakup and primary atomization	13
Table 2.3	Flow patterns for gas-liquid two-phase flow in horizontal and vertical pipes: dependence on the gas volume fraction (Frank, 2005)	21
Table 2.4	Optical methods of characterization of two-phase flow	27
Table 2.5	Performance of HEVS versus EVS	34
Table 2.6	References for pressure drop and collection efficiency of HEVS	36
Table 2.7	Geometrical parameters of ejectors used by different investigators (Yadav and Patwardhan, 2008)	45
Table 2.7a	Mass ratio correlations from dimensionless analysis given by various authors (Balamurugan et al. (2007)	51
Table 2.7b	Mass ratio correlations from theoretical analysis given by various authors	52-53
Table 2.8	Limiting values of θ_0 and E_a for the various chemical regimes used to measure the mass transfer parameters (Midoux et al., 1980)	58
Table 2.9	Hold-up, $k_L a$ and a measurement methods and correlations given by various authors	60-61
Table 3.1	Dimensions of jet ejectors	74
Table 4.1.1	Rate constant for $Cl_2 - NaOH$ reaction as reported by different investigators	84
Table 4.1.2	Henry's law constant of Cl_2 and diffusion coefficients of Cl_2 (D_1), $HOCl$ (D_2), and OH^- (D_6) (Ashour et al., 1996)	92
Table 4.1.3	Values for Equilibrium constants of Reactions (4.1.2) and (4.1.5) at various temperatures, (Ashour et al., 1996)	92
Table 4.1.4	The values of rate constants for reaction 4.1.3, k_2 , at atmospheric pressure for Cl_2 -Aqueous $NaOH$ system	93
Table 4.4.1	Typical range of experimental values	124
Table 4.4.2	Summary of analysis of results for different C_{B0} and nozzles	138

Table 4.5.1	Codification of the operating variables for the statistical analysis	140
Table 4.5.2	Experimental matrix for chlorine removal efficiency using setup – 1	140
Table 4.5.3	Experimental matrix for chlorine removal efficiency using setup – 3	141
Table 4.5.4	Parameters for multiple regression analysis	142-143
Table 4.5.5	Regression coefficient from multi regression analysis	143
Table 4.5A (1)	Estimation Results for nozzle N1	144
Table 4.5A (2)	Analysis of Variance for nozzle N1	144
Table 4.5A (3)	Results of statistical tests for nozzle N1	144
Table 4.5A (4)	Residual Analysis for nozzle N1	144
Table 4.5B (1)	Estimation Results for nozzle N5	146
Table 4.5B (2)	Analysis of Variance for nozzle N5	147
Table 4.5B (3)	Results of statistical tests for nozzle N5	147
Table 4.5B (4)	Residual Analysis for nozzle N5	147
Table 4.5C (1)	Estimation Results for nozzle N6	149
Table 4.5C (2)	Analysis of Variance for nozzle N6	149
Table 4.5C (3)	Results of statistical tests for nozzle N6	149
Table 4.5C (4)	Residual Analysis for nozzle N6	150
Table 4.5D (1)	Estimation Results for nozzle N7	152
Table 4.5D (2)	Analysis of Variance for nozzle N7	152
Table 4.5D (3)	Results of statistical tests for nozzle N7	152
Table 4.5D (4)	Residual Analysis for nozzle N7	152
Table 4.5.6	Summary of statically results	155
Table 4.5.7	Summary of analysis of contours for removal efficiency	157
