Chapter		Title	Page No
1	**Introduction**		**1-11**
	1.1	General	1
	1.2	Chlorine Disinfection	2
		1.2.1 Chlorine Decay	3
		1.2.2 Problems Associated with Excess Chlorination	3
	1.3	Booster Chlorination	4
	1.4	Need for Water Quality Modelling	5
	1.5	Optimization Techniques	6
	1.6	Motivation for the Study	7
	1.7	Objectives and Scope of Study	9
	1.8	Methodology Adopted	10
	1.9	Inferences	10
2	**Literature Review**		**12-76**
	2.1	Introduction	12
	2.2	Drinking Water Distribution System (DWDS)	13
	2.3	Drinking Water Distribution System Models	14

2.4	Hydraulic Models for Drinking Water Distribution System (DWDS)	15
	2.4.1 Development in Hydraulic Modelling	15
	2.4.2 Governing Equations for Hydraulic Modelling	17
	2.4.3 Analysis Methods	19
2.5	Water Quality Models for Drinking Water Distribution System (DWDS)	20
	2.5.1 Steady-state Water Quality Models	21
	2.5.2 Dynamic Water Quality Models	21
	2.5.3 Governing Equations for Water Quality Modelling	22
	2.5.4 Solution Methods	25
	2.5.5 Modelling Individual Constituents in Drinking Water	27
2.6	Water Quality Management in DWDS through chlorine disinfection	27
	2.6.1 Process Description	29
	2.6.2 Chlorine Chemistry	30
	2.6.3 Nomenclature for Residual Chlorine	31
	2.6.4 Forms of Chlorine	31
	2.6.5 Chlorine Decay	32
	2.6.6 Modelling the Decay of Residual Chlorine	33
	2.6.7 Application of Water Quality Models for Simulation of Residual Chlorine and DBP	47
	2.6.8 Investigation on Chlorine Decay Coefficients and Effect of Various Parameters on Chlorine Decay	50
2.7	Disinfection By-Product Formation and Modelling of DBP	53
2.8	Booster Chlorination	56
2.9	Optimization Methods	58
2.10	Requirements for Optimal Problem Formulation	60
	2.10.1 Mathematical Model for Optimization Problem	60
	2.10.2 Types of Optimization Algorithm / Methods to Solve Optimization Problem	60
	2.10.3 Linear Programming Optimization Method	61
	2.10.4 Particle Swarm Optimization (PSO)	62
	2.10.5 Basic Variants of PSO	62

		2.10.6 Applications of PSO	63
	2.11	Optimization Technique for Booster Chlorination	65
		2.11.1 Optimal Scheduling of Disinfectant Injection and Operation of Booster Station	67
		2.11.2 Optimal Location of Booster Stations	70
		2.11.3 Booster Chlorination responding to a Contamination Incident and other Applications	73
	2.12	Appraisal of Reviewed Literature	75
	2.13	Inferences	76
3		**Development of Hydraulic and Water Quality Models**	**77-98**
	3.1	Introduction	77
		3.1.1. Introduction to EPANET	78
	3.2	General Formulation for Hydraulic Model	80
	3.3	General Formulation for Water Quality Model	85
		3.3.1 Computation of Residual Chlorine	86
		3.3.2 Model Computations for Example Problem	95
		3.3.3 Analysis and Discussion of Results	96
	3.4	Inferences	98
4		**Development of Simulation Model using EPANET**	**99-152**
	4.1	General	99
	4.2	Hydraulic Modelling	100
	4.3	Water Quality Modelling	101
		4.3.1 Reaction Rate Data	102
	4.4	Residual Chlorine Simulation in Branch Network (Example Problem)	104
		4.4.1 Simulation Runs	105
		4.4.2 Simulation Results	106
		4.4.3 Discussions	107
	4.5	CASE STUDY 1: Water Quality Modelling using Booster Chlorination in Drinking Water Distribution System	109
		4.5.1 Simulation Results	111
		4.5.2 Discussions	113

4.6	Vadodara City at a Glance	115
	4.6.1 Sources of water for Vadodara City	116
	4.6.2. Scenario of Water Distribution Services of Vadodara City	116
4.7	Drinking Water Distribution Networks used for Case Studies	118
4.8	CASE STUDY 2: Hydraulic and Water Quality Analysis of Zoning System of Subhanpura Drinking Water Distribution System.	120
	4.8.1 Investigation of Bulk Decay Coefficients	122
	4.8.2 Simulation Results	124
	4.8.3. Discussions	128
4.9	CASE STUDY 3: Hydraulic and Water Quality Analysis of Channi Drinking Water Distribution System for Continuous and Intermittent Water Supply	128
	4.9.1 Simulation Results	131
	4.9.2 Discussions	137
4.10	CASE STUDY 4: Evaluating Booster Chlorination Strategies for North Harni Drinking Water Distribution System Using EPANET	138
	4.10.1 Simulation Results	140
	4.10.2. Discussions	144
4.11	CASE STUDY 5: Alternative Chlorine Management Strategy Using Booster Chlorination for Manjalpur Drinking Water Distribution System	145
	4.11.1 Simulation Results	147
	4.11.2 Discussions	151
4.12	Inferences	152
5	**Coupled Simulation - Optimization Model for Chlorine Management in Drinking Water Distribution Systems**	**153-242**
5.1	Introduction	153
5.2	Need for Simulation-Optimization Model	153
5.3	Linear Programming Optimization Method	155
5.4	Development of Optimization Model Using Linear Programming Optimization Method	157
	5.4.1 Impulse Response Coefficients	157

	5.4.2 General Formulation of Optimization Model for Booster Chlorination	157
	5.4.3 The impulse response coefficients for Sample and Example Network	158
	5.4.4 Methods to Compute Impulse Response Coefficients for Large Network	159
5.5	Details of Study Area (Manjalpur)	160
5.6	Case Study 6: Optimal Location and Scheduling of Booster Stations for One Hour Water Supply (MJ-1H-LP)	163
	5.6.1 Development of Optimization Model for Study Area (Manjalpur)	163
	5.6.2 Optimization Results	167
	5.6.3. Discussions	171
5.7	Case Study 7: Optimal Location and Scheduling of Booster Stations for Two Hours Water Supply (MJ-2H-LP)	172
	5.7.1 Optimization Results	174
	5.7.2. Discussions	178
5.8	Details of Study Area (North Harni)	178
5.9	Case Study 8: Optimal Location and Scheduling of Booster Chlorination for One Hour Water Supply (NH-1H-LP)	180
	5.9.1 Optimization Results	183
	5.9.2 Discussions	188
5.10	Case Study 9: Optimal Location and Scheduling of Booster Chlorination for Two Hours Water Supply (NH-2H-LP)	189
	5.10.1 Optimization Results	191
	5.10.2 Discussions	193
5.11	Case Study 10: Optimal Location and Scheduling of Booster Chlorination with Deficit Flow Conditions (NH-2HD-LP)	193
	5.11.1 Optimization Results	196
	5.11.2 Discussions	201
5.12	Particle Swarm Optimization (PSO) for Chlorine Management in DWDS	204
	5.12.1 Computational Implementation of PSO	206
5.13	Case Study 11: Coupled Simulation Optimization Model using PSO for North Harni DWDS Network with Deficit Flow Condition (NH-2HD-PSO)	210
	5.13.1 Optimization Results	214
	5.13.2 Sensitivity Analysis for PSO Parameters	217
	5.13.3 Discussions	219

	5.14	Case Study 12: Optimal Location and Scheduling of North Harni DWDS Network using PSO for Deficit flow conditions (NH-2HD-PSO-OL)	220
		5.14.1 Discussions	222
	5.15	Case Study 13: Optimal Location and Scheduling of Booster Stations using PSO for North Harni DWDS Network with One and two hours water supply (NH-1H-PSO-OL & NH-2H-PSO-OL)	222
		5.15.1 Discussions	224
	5.16	Case Study 14: Optimal Location and Scheduling of Booster Stations using PSO for Manjalpur DWDS with One Hour and Two Hours Water Supply (MJ-1H-PSO-OL & MJ-2H-PSO-OL)	225
		5.16.1 Discussions	227
	5.17	General Discussions	233
	5.18	Impact Matrix for Booster Chlorination	234
	5.19	Cost Analysis for the Optimum Locations of Booster Chlorination Station	238
	5.20	Inferences	242
6	**Summary and Conclusions**		**243-247**
	6.1	Summary	243
	6.2	Conclusions	244
	6.3	Research Contributions	247
	6.4	Scope for Further Research Work	247
	Appendix-1		248
	Input Parameters and Computations of Hydraulic Analysis
