NOMENCLATURES		...xxi
ABBREVIATION		...xxiii
CHAPTER - 1	INTRODUCTION	...1
1.1	General	...1
1.2	Overvoltages and their classification	...3
1.2.1	Characteristics of switching overvoltages	...5
1.2.2	Discharge characteristic of various types of overvoltages	...9
1.2.3	Breakdown mechanism under switching impulses	...11
1.3	Phase-to-phase and phase-to ground overvoltages	...12
1.4	Longitudinal insulation	...14
1.4.1	Specified one terminal test	...15
1.4.2	Bias voltage test	...16
1.4.3	Equivalent two-terminal tests	...17
1.4.4	Testing procedure	...17
1.5	Atmospheric correction factors	...18
1.6	Scope of work and aim	...20
CHAPTER - 2	LITERATURE REVIEW	...24
2.1	General	...24
2.2	Breakdown phenomena under switching impulses	...26
2.2.1	Influence of switching impulse waveshape	...27
2.2.2	Influence of gap clearance	...29
2.2.3	Influence of electrode configuration	...30
2.2.3.1	Gap factor concept	...31

2.3	Longitudinal insulation: General philosophy	...32
2.3.1	Self co-ordination of two gaps	...35
2.3.2	Voltage stresses	...37
2.3.3	Withstand voltage and tests	...39
2.3.3.1	Switching overvoltages	...39
2.3.4	Bias voltage test	...41
2.4	Longitudinal insulation testing	...44
2.4.1	Bias voltage test on rod- rod gap insulation	...45
2.4.1.1	Switching impulse bias test	...45
2.4.1.2	Lightning impulse bias test	...49
2.4.2	Bias voltage test on capacitive controlled gap insulation	...49
2.4.2.1	Switching impulse bias test	...51
2.4.2.2	Lightning impulse bias test	...54
2.5	Air density correction factor	...55
2.5.1	New correction approach	...57
2.6	Humidity correction factors	...59
2.6.1	Influence of humidity on rod-rod gap	...61
2.6.2	Influence of humidity on rod-plane gap.	...64
CHAPTER - 3	DEVELOPMENT OF BIAS VOL- TAGE TEST FACILITY	...66
3.1	General	...66
3.2	Requirement of equip- ments standard for con- ducting bias voltage withstand test	...68

3.2.1	Additional equipments required for conducting bias voltage test	...69
3.3	Method of protection against the recovery overvoltages	...69
3.3.1	Protective measures	...70
3.3.2	Protective device across the terminals of the test transformer	...71
3.3.3	High voltage damping resistor	...75
3.3.3.1	Location of high voltage damping resistor in the bias voltage test circuit	...76
3.4	Impulse voltage distribution in a cascade circuit	...87
3.4.1	Measurement of the self capacitance of the transformer	...88
3.4.2	Effect of front time on voltage distribution	...88
3.4.3	Voltage grading capacitor	...90
3.5	Low and high frequency oscillations	...92
3.6	Control of voltage distortion on AC wave	...96
3.7	Measurement of voltage drop on AC terminal	...102
3.8	Automatic triggering of impulse voltage generator	...105
3.9	Preliminary test procedure	...105
3.9.1	Check on control and measuring circuit	...106

		Page No.
3.9.2	Checks on point on wave selector circuit	...106
3.9.3	Check on protection circuit	...107
3.9.4	Calibration of impulse wave shape	...107
3.9.5	Measurement of the transferred impulse voltage	...108
3.10	Conclusion	...108
CHAPTER - 4	VOLTAGE DISTRIBUTION ACROSS THE TEST OBJECT AND SUPPORTING CAPACITANCE: EFFECT OF DAMPING RESISTOR	...111
4.1	General	...111
4.2	Requirement of standards and their interpretation	...112
4.3	Interpretation of standards as per the system requirements	...115
4.4	Test circuit adopted by various laboratories	...117
4.5	Measurement of transferr- ed impulse voltage at different points of the bias test circuit	...120
4.5.1	Measurement problems	...123
4.5.2	Capacitive controlled rod-rod gap	...124
4.5.2.1	Lightning impulse voltage distribution	...124
4.5.2.2	Switching impulse voltage distribution	...133
4.5.3	Rod-rod gap	...137
4.5.3.1	Lightning impulse voltage distribution	...137
4.5.3.2	Switching impulse voltage distribution	...144
4.6	Conclusion	...148

CHAPTER - 5	EFFECT OF DAMPING RESISTOR ON CRITICAL FLASHOVER VOL- TAGE U_{50} AND VOLTAGE DIS- TORTION ON AC WAVE	...154
5.1	General	...154
5.2	Up and Down method	...156
5.3	Measurement of critical flashover voltage and sigma	...161
5.3.1	Capacitive controlled rod- rod gap	...162
5.3.1.1	Lightning impulse voltage	...163
5.3.1.2	Switching impulse voltage	...167
5.3.2	Rod-rod gap	...170
5.3.2.1	Lightning impulse voltage	...170
5.3.2.2	Switching impulse voltage	...174
5.4	Comparison of measured and calculated U_{50}	...176
5.4.1	Capacitive controlled rod- rod gap	...176
5.4.2	Rod-rod gap	...180
5.5	Comparison of measured and calculated transferred im- pulse voltage U_A	...182
5.5.1	Capacitive controlled rod- rod gap	...182
5.5.1.1	Lightning impulse voltage	...182
5.5.1.2	Switching impulse voltage	...186
5.5.2	Rod-rod gap	...188
5.5.2.1	Lightning impulse voltage	...188
5.5.2.2	Switching impulse voltage	...191
5.6	Reduction of transferred impulse voltage u_B	...191

5.7	Total reduction of voltage stress across the test object	...196
5.8	Standard deviation sigma and their variances	...198
5.9	Protection of high voltage testing transformer	...202
5.10	Conclusion	...207
CHAPTER-6	BREAKDOWN PHENOMENA UNDER BIAS VOLTAGES: INFLUENCE OF HUMIDITY, TIME SHIFT AND AC BIAS VOLTAGE	...213
6.1	General	...213
6.2	Humidity correction reactor under bias voltages	...215
6.2.1	Test configuration and set-up	...215
6.2.2	Test procedure	...217
6.2.3	Analysis of test results	...218
6.2.3.1	Correction factors as per standards	...219
6.2.3.1.1	Air density correction factor	...219
6.2.3.1.2	Humidity correction factor	...221
6.2.3.2	Recommended correction approach	...226
6.3	Effect of $\propto$ on bias breakdown voltages	...233
6.4	Influence of time-to-crest of the impulse wave on bias breakdown voltages	...236
6.5	Influence of the time shift Δt between the two waves	...240
6.5.1	Effect of time shift Δt	...241

6.5.2	Effect of time shift Δt and peak magnitude of voltage U_{AC}^-	...245
6.6	Influence of rain under bias voltages	...248
6.7	Conclusion	...251
CHAPTER - 7	CONCLUSION	...254
7.1	Review of the work done and conclusions	...255
7.2	Suggestions for further work	...262
