

## **CONTENTS**

|                                                                                      |              |
|--------------------------------------------------------------------------------------|--------------|
| <b>ACKNOWLEDGEMENTS</b>                                                              | <b>I</b>     |
| <b>CERTIFICATE</b>                                                                   | <b>III</b>   |
| <b>DECLARATION</b>                                                                   | <b>IV</b>    |
| <b>DEDICATION</b>                                                                    | <b>V</b>     |
| <b>ABSTRACT</b>                                                                      | <b>VI</b>    |
| <b>CONTENTS</b>                                                                      | <b>VIII</b>  |
| <b>LIST OF FIGURES</b>                                                               | <b>XVII</b>  |
| <b>LIST OF TABLES</b>                                                                | <b>XXIII</b> |
| <b>LIST OF ABBREVIATIONS</b>                                                         | <b>XXIV</b>  |
| <br><b><u>CHAPTER 1</u></b>                                                          |              |
| <b><u>INTRODUCTION</u></b>                                                           |              |
| 1.1 INTRODUCTION                                                                     | 001          |
| 1.2 V-BLAST IMPLEMENTATION, ANALYSIS AND<br>ARCHITECTURE FOR OFDM AND CDMA BASED MUD | 004          |
| 1.2.1 Introduction                                                                   | 004          |
| 1.2.2 Spatial Multiplexing Schemes                                                   | 004          |
| 1.2.3 Layered Schemes                                                                | 004          |
| 1.2.4 Comparison of V-Blast with D-Blast                                             | 004          |
| 1.2.5 General Assumptions for V-Blast Implementation                                 | 005          |
| 1.2.6 MIMO V-Blast System Model                                                      | 005          |
| 1.2.6.1 Transmitter Model                                                            | 006          |
| 1.2.6.2 Receiver Model                                                               | 007          |
| 1.2.7 CDMA MIMO V-Blast Models                                                       | 008          |
| 1.2.7.1 Transmitter Model                                                            | 008          |
| 1.2.7.2 Receiver Model                                                               | 008          |

## CONTENTS

|       |                                                                                |     |
|-------|--------------------------------------------------------------------------------|-----|
| 1.3   | GENETIC ALGORITHM IMPLEMENTATION, ANALYSIS AND ARCHITECTURE FOR CDMA BASED MUD | 009 |
| 1.3.1 | Genetic Algorithm Assisted M.U.D. for S-CDMA                                   | 009 |
| 1.4   | PDA ALGORITHM IMPLEMENTATION, ANALYSIS AND ARCHITECTURE FOR CDMA BASED MUD     | 010 |
| 1.4.1 | System Model                                                                   | 010 |

| 1.9   | ORGANIZATION OF THE THESIS                                                     | 015 |
| 1.10  | LIST OF PAPERS (BASED ON THE RESEARCH WORK) PRESENTED                          | 016 |

## **CHAPTER 2**

### **MULTIPLE ACCESS SCHEMES OVERVIEW AND MULTI - USER DETECTOR**

|       |                                           |     |
|-------|-------------------------------------------|-----|
| 2.1   | INTRODUCTION                              | 019 |
| 2.2   | FREQUENCY DIVISION MULTIPLE ACCESS (FDMA) | 020 |
| 2.2.1 | Advantages                                | 021 |
| 2.2.2 | Disadvantages                             | 021 |
| 2.3   | TIME DIVISION MULTIPLE ACCESS (TDMA)      | 021 |
| 2.3.1 | Advantages                                | 022 |
| 2.3.2 | Disadvantages                             | 023 |
| 2.4   | CODE DIVISION MULTIPLE ACCESS (CDMA)      | 024 |
| 2.4.1 | Concept of Spread Spectrum and CDMA       | 024 |
| 2.5   | MULTI USER DETECTION FOR CDMA SYSTEM      | 027 |
| 2.5.1 | Multi-path Propagation                    | 028 |
| 2.5.2 | Conventional CDMA system/Receiver         | 028 |

## CONTENTS

|           |                                                   |     |
|-----------|---------------------------------------------------|-----|
| 2.5.3     | Disadvantages with Conventional Receiver          | 028 |
| 2.6       | MULTI-USER DETECTION                              | 029 |
| 2.6.1     | CDMA Channel Model for Multi-user Detection       | 030 |
| 2.7       | DIFFERENT TYPES OF MULTIUSER DETECTORS            | 031 |
| 2.7.1     | Linear Detectors                                  | 032 |
| 2.7.1.1   | Zero Forcing Detectors                            | 032 |
| 2.7.1.1.1 | Zero forcing algorithm performances               | 033 |
| 2.7.1.1.2 | Aspects of concern                                | 033 |
| 2.7.1.2   | MMSE Detector                                     | 033 |
| 2.7.1.2.1 | Performance                                       | 034 |
| 2.7.1.2.2 | Concerns in MMSE                                  | 034 |
| 2.7.2     | Linear MUD Implementation Issues                  | 034 |
| 2.8       | INTERFERENCE CANCELLATION TECHNIQUES              | 035 |
| 2.8.1     | Successive Interference Cancellation              | 035 |
| 2.8.1.1   | Performance                                       | 036 |
| 2.8.1.2   | Concerns in implementation                        | 036 |
| 2.8.2     | Parallel Interference Cancellation                | 036 |
| 2.8.2.1   | Using De-correlating detector as the first stage. | 037 |
| 2.9       | SUMMARY                                           | 037 |

## **CHAPTER 3**

### **ORTHOGONAL FREQUENCY DIVISION MULTIPLEXING TECHNIQUES**

|      |                                     |     |
|------|-------------------------------------|-----|
| 3.1  | INTRODUCTION                        | 038 |
| 3.2  | PRINCIPLES OF OFDM                  | 039 |
| 3.3  | ORTHOGONALITY                       | 039 |
| 3.4  | GENERATION AND RECEPTION OF OFDM    | 039 |
| 3.5  | OFDM CARRIERS                       | 040 |
| 3.6  | SERIAL TO PARALLEL CONVERSION       | 041 |
| 3.7  | OFDM MODULATION                     | 041 |
| 3.8  | OFDM DEMODULATION                   | 044 |
| 3.9  | GUARD INTERVAL AND CYCLIC EXTENSION | 045 |
| 3.10 | SUB-CARRIER MODULATION              | 046 |

## CONTENTS

|          |                                                 |     |
|----------|-------------------------------------------------|-----|
| 3.11     | ADVANTAGES OF OFDM                              | 047 |
| 3.11.1   | Multi-path Delay Spread Tolerance               | 047 |
| 3.11.2   | Immunity to Frequency selective fading Channels | 047 |
| 3.11.3   | High Spectral Efficiency                        | 048 |
| 3.11.4   | Efficient Modulation and Demodulation           | 048 |
| 3.11.5   | Frequency Diversity                             | 048 |
| 3.12     | APPLICATIONS OF OFDM                            | 048 |
| 3.12.1   | Wireless LAN Applications                       | 049 |
| 3.12.1.1 | HIPERLAN/2                                      | 049 |
| 3.12.1.2 | IEEE 802.11                                     | 049 |
| 3.12.2   | Digital Audio Broadcasting (DAB)                | 049 |
| 3.12.3   | Digital Video Broadcasting (DVB-T)              | 050 |
| 3.13     | SUMMARY                                         | 050 |

## **CHAPTER 4**

### **MULTIPLE INPUT MULTIPLE OUTPUT SYSTEMS**

|        |                                                    |     |
|--------|----------------------------------------------------|-----|
| 4.1    | INTRODUCTION                                       | 051 |
| 4.2    | DIVERSITY                                          | 052 |
| 4.2.1  | Diversity Techniques                               | 052 |
| 4.2.2  | Transmit Diversity                                 | 053 |
| 4.3    | MULTIPLE-INPUT MULTIPLE-OUTPUT CHANNEL             | 053 |
| 4.3.1  | Mathematical Model                                 | 054 |
| 4.3.2  | Narrowband Vs. Wideband                            | 054 |
| 4.3.3  | Physical Vs. Non-Physical Models                   | 055 |
| 4.3.4  | Measurement Based Vs. Scattering Models            | 055 |
| 4.3.5  | MIMO Systems with One Modulator/Demodulator        | 055 |
| 4.3.6  | MIMO Systems with Multiple Modulators/Demodulators | 056 |
| 4.3.7  | Capacity                                           | 056 |
| 4.3.8  | Single-Input, Single-Output (SISO)                 | 057 |
| 4.3.9  | Single-Input, Multiple-Output (SIMO)               | 057 |
| 4.3.10 | Multiple-Input, Single-Output (MISO)               | 057 |
| 4.3.11 | MIMO- Same signal transmitted by each antenna      | 058 |
| 4.3.12 | MIMO- Different signal transmitted by each antenna | 058 |

## CONTENTS

|       |                                      |     |
|-------|--------------------------------------|-----|
| 4.4   | ADVANTAGES AND DISADVANTAGES OF MIMO | 059 |
| 4.4.1 | Advantage of MIMO                    | 059 |
| 4.4.2 | Disadvantage and Limitation of MIMO  | 060 |
| 4.5   | SUMMARY                              | 060 |

## **CHAPTER 5**

### **V-BLAST ALGORITHM AND ARCHITECTURE**

|       |                                             |     |
|-------|---------------------------------------------|-----|
| 5.1   | INTRODUCTION                                | 061 |
| 5.2   | SPATIAL MULTIPLEXING SCHEMES                | 061 |
| 5.3   | LAYERED SCHEMES                             | 062 |
| 5.3.1 | Layered Schemes in Transmitter Side         | 062 |
| 5.3.2 | Layered Schemes in Receiver (Detector) Side | 062 |
| 5.4   | COMPARISON OF V-BLAST WITH D-BLAST          | 063 |
| 5.5   | GENERAL ASSUMPTIONS FOR V-BLAST             | 064 |
| 5.6   | V- BLAST ARCHITECTURE                       | 064 |
| 5.7   | V-BLAST ALGORITHM                           | 066 |
| 5.8   | SUMMARY                                     | 069 |

## **CHAPTER 6**

### **OFDM AND CDMA MIMO V-BLAST SYSTEM**

|       |                                     |     |
|-------|-------------------------------------|-----|
| 6.1   | INTRODUCTION                        | 070 |
| 6.2   | OFDM MIMO V-BLAST SYSTEM            | 070 |
| 6.3   | MIMO V-BLAST SYSTEM MODEL           | 071 |
| 6.3.1 | Transmitter Model                   | 072 |
| 6.3.2 | Receiver Model                      | 073 |
| 6.4   | CDMA MIMO V-BLAST SYSTEM            | 074 |
| 6.4.1 | CDMA MIMO V-BLAST Transmitter Model | 076 |
| 6.4.2 | CDMA MIMO V-BLAST Receiver Model    | 077 |
| 6.5   | SUMMARY                             | 078 |

## **CHAPTER 7**

### **MODULATION SCHEMS & SPREADING CODES USED FOR SIMULATION**

|     |              |     |
|-----|--------------|-----|
| 7.1 | INTRODUCTION | 079 |
|-----|--------------|-----|

## CONTENTS

|       |                                     |     |
|-------|-------------------------------------|-----|
| 7.2   | DIGIAL MODULATION BASICS            | 079 |
| 7.3   | MODULATION SCHEMES                  | 080 |
| 7.3.1 | QPSK                                | 080 |
| 7.3.2 | 16-QAM                              | 081 |
| 7.3.3 | 64-QAM                              | 083 |
| 7.4   | INTRODUCTION TO SPREADING SEQUENCES | 083 |
| 7.4.1 | Walsh Code                          | 084 |
| 7.4.2 | PN Code                             | 084 |
| 7.4.3 | Gold Code                           | 086 |
| 7.5   | SUMMARY                             | 087 |

## **CHAPTER 8**

### **GENETIC ALGORITHM**

|       |                                 |     |
|-------|---------------------------------|-----|
| 8.1   | HISTORY                         | 088 |
| 8.2   | INTRODUCTION                    | 088 |
| 8.3   | GENETIC ALGORITHM AT WORK       | 091 |
| 8.4   | CROSSOVER                       | 093 |
| 8.5   | MUTATION                        | 093 |
| 8.6   | SELECTION                       | 094 |
| 8.6.1 | Fitness-proportionate Selection | 094 |
| 8.6.2 | Sigma scaling                   | 094 |
| 8.6.3 | Linear Ranking Selection        | 095 |
| 8.6.4 | Tournament Selection            | 095 |
| 8.7   | TERMINATION CRITERION           | 095 |
| 8.8   | SUMMARY                         | 096 |

## **CHAPTER 9**

### **GENETIC ALGORITHM ASSISTED M.U.D. FOR S-CDMA**

|     |                                                |     |
|-----|------------------------------------------------|-----|
| 9.1 | INTRODUCTION                                   | 097 |
| 9.2 | S-CDMA SYSTEM MODEL                            | 098 |
| 9.3 | DISCRETE TIME S-CDMA MODEL                     | 101 |
| 9.4 | OPTIMUM MULTI-USER DETECTOR FOR S-CDMA SYSTEMS | 102 |
| 9.5 | SUMMARY                                        | 103 |

## **CHAPTER 10**

**COMPARISON OF GA WITH ZF & MMSE FOR MUD FOR  
CDMA BASED SYSTEMS**

|      |                            |     |
|------|----------------------------|-----|
| 10.1 | INTRODUCTION               | 104 |
| 10.2 | ZF-PREVIOUS RESULTS        | 104 |
| 10.3 | MMSE-PREVIOUS RESULTS      | 107 |
| 10.4 | GENETIC ALGORITHMS RESULTS | 110 |
| 10.5 | SUMMARY                    | 113 |

**CHAPTER 11**

**PROBABILISTIC DATA ASSOCIATION ALGORITHM**

|      |                       |     |
|------|-----------------------|-----|
| 11.1 | INTRODUCTION          | 114 |
| 11.2 | SYSTEM MODEL          | 114 |
| 11.3 | FLOW OF PDA ALGORITHM | 115 |
| 11.4 | PDA DETECTOR          | 116 |
| 11.5 | BASIC ALGORITHM       | 117 |
| 11.6 | SUMMARY               | 118 |

**CHAPTER 12**

**COMPARISON & PERFORMANCE OF PDA ALGORITHM  
WITH ZF & MMSE**

|      |                                        |     |
|------|----------------------------------------|-----|
| 12.1 | INTRODUCTION                           | 119 |
| 12.2 | ZERO FORCING – RESULTS                 | 119 |
| 12.3 | MINIMUM MEAN SQUARE ERROR – RESULTS    | 123 |
| 12.4 | PROBABILITY DATA ASSOCIATION – RESULTS | 125 |
| 12.5 | PDA PERFORMANCE                        | 128 |
| 12.6 | SUMMARY                                | 129 |

**CHAPTER 13**

**ANALYSIS OF RESULTS OBTAINED BASED ON ALL  
ALGORITHMS**

|        |                                          |     |
|--------|------------------------------------------|-----|
| 13.1   | INTRODUCTION                             | 130 |
| 13.2   | BACKGROUND                               | 130 |
| 13.2.1 | System Performance                       | 131 |
| 13.3   | SIMULATION RESULTS FOR V-BLAST ALGORITHM | 133 |

## CONTENTS

|          |                                              |     |
|----------|----------------------------------------------|-----|
| 13.3.1   | Plots for OFDM MIMO V-BLAST                  | 133 |
| 13.3.1.1 | Using Zero Forcing                           | 133 |
| 13.3.1.2 | Using Minimum Mean Square Error              | 136 |
| 13.3.2   | Plots for CDMA MIMO V-BLAST Using Walsh Code | 139 |
| 13.3.2.1 | Using Zero Forcing Cancellation              | 139 |
| 13.3.3   | Plots for CDMA MIMO V-BLAST Using Gold Code  | 145 |
| 13.3.3.1 | Using Zero Forcing Cancellation              | 145 |
| 13.3.3.2 | Using MMSE Cancellation                      | 148 |
| 13.3.4   | Plots for CDMA MIMO V-BLAST Using PN Code    | 151 |
| 13.3.4.1 | Using Zero Forcing Cancellation              | 151 |
| 13.3.4.2 | Using MMSE Cancellation                      | 154 |
| 13.4     | SIMULATION RESULTS FOR GENETIC ALGORITHM     | 157 |
| 13.4.1   | Plots for QPSK                               | 157 |
| 13.4.1.1 | AWGN Channel                                 | 157 |
| 13.4.1.2 | Rayleigh Fading Channel                      | 160 |
| 13.4.2   | Plots for 16-QAM                             | 163 |
| 13.4.2.1 | AWGN Channel                                 | 163 |
| 13.4.2.2 | Rayleigh Fading Channel                      | 166 |
| 13.4.3   | Plots for 64-QAM                             | 169 |
| 13.4.3.1 | AWGN Channel                                 | 169 |
| 13.4.4   | Plots for GMSK                               | 175 |
| 13.4.4.1 | AWGN Channel                                 | 175 |
| 13.4.4.2 | Rayleigh Fading Channel                      | 178 |
| 13.5     | SIMULATION RESULTS FOR PDA ALGORITHM         | 181 |
| 13.5.1   | Plots for AWGN Channel                       | 181 |
| 13.5.1.1 | QPSK                                         | 181 |
| 13.5.1.2 | 16-QAM                                       | 184 |
| 13.5.1.3 | 64-QAM                                       | 187 |
| 13.5.1.4 | GMSK                                         | 190 |
| 13.5.2   | Plots for Rayleigh Fading Channel.           | 193 |
| 13.5.2.1 | QPSK                                         | 193 |
| 13.5.2.2 | 16-QAM                                       | 196 |

CONTENTS

|                                                       |                                      |     |
|-------------------------------------------------------|--------------------------------------|-----|
| 13.5.2.3                                              | 64-QAM                               | 200 |
| 13.5.2.4                                              | GMSK                                 | 203 |
| 13.6                                                  | SUMMARY                              | 205 |
| <b><u>CHAPTER 14</u></b>                              |                                      |     |
| <b><u>CONCLUSION AND FUTURE SCOPE OF THE WORK</u></b> |                                      |     |
| 14.1                                                  | CONCLUSION                           | 206 |
| 14.1.1                                                | ZF and MMSE for CDMA based MUD       | 206 |
| 14.1.2                                                | V-BLAST for CDMA and OFDM based MUD  | 206 |
| 14.1.3                                                | Genetic Algorithm for CDMA based MUD | 207 |
| 14.1.4                                                | PDA for CDMA based MUD               | 208 |
| 14.2                                                  | FUTURE SCOPE OF THE WORK             | 210 |
| <b><u>APPENDIX – A</u></b>                            |                                      |     |
| <b><u>BIBLIOGRAPHY</u></b>                            |                                      | 211 |
