

# List of Tables

2.1	Price Elasticity Analysis . . . . .	29
3.1	Losses in network as per various voltage levels in Gujarat state	34
3.2	Cross Subsidy Surcharge for HT consumers . . . . .	35
3.3	Net Open Access charges for 3 MW load at 11 kV for 24 hr of trading on Day-Ahead basis . . . . .	36
3.4	Landed cost in Rs/kWh to the consumers availing STOA at various voltage levels . . . . .	38
3.5	Yearly average IEX rate in Rs/kWh for W-2 region . . . . .	39
3.6	Average DISCOM tariff for the consumers in Rs/kWh . . . . .	39
3.7	Amount of gain/loss for 25 MW load in Rs/kWh . . . . .	40
3.8	Gain in Rs/kWh for HT consumer at 66KV . . . . .	41
4.1	Feeder Types . . . . .	52
4.2	Feeder allocation as per number of clusters . . . . .	53
4.3	Mean Silhouette values for k-means and SOM analysis . . . . .	55
5.1	Time-of-Use Rates in MGVCL . . . . .	64
5.2	Billing Information of May 2016 . . . . .	67
5.3	Case-wise Constraints . . . . .	68

5.4	Optimum results to attain maximum night rebate as per the set constraints . . . . .	71
6.1	Tariff change after CoSC adjusted to 100% at the end of 5 <sup>th</sup> year . . . . .	81
6.2	Rise and Fall in the Tariff at the end of 5 <sup>th</sup> year compared to reference year . . . . .	83
6.3	Consumption and Tariff realized from Regression models . .	98
6.4	Cost-of-Service (CoS) resulted from case 1 and case 2 . . . .	98
6.5	Distribution Company profit and Tariff rise rate for every category of consumers . . . . .	100
6.6	Profit and <i>UC</i> resulted for FY1 to FY11 . . . . .	102
