

ACKNOWLEDGMENTS

First and foremost, I would like to express gratitude and admiration for my guide Dr. Jagrut J. Gadit, without whose constant encouragement and direct active interest, this work would not have seen completion. I am very much thankful to him for his positive and painstaking efforts, constructive suggestions, and readiness to help at any time even after office hours. I feel genuinely grateful to him for providing friendly, conducive and homely environment for my work.

I am also thankful to Prof. S. K. Joshi, Head of Electrical Engineering Department, Faculty of Technology & Engineering, and all thesis committee members for their inspiration and support.

I would like to thank Dr. Poonal Mondal for the proof reading of the thesis.

I would like to convey my sincere thanks to the management of Parul University for providing me an opportunity to pursue my doctoral program.

I would like to convey my sincere thanks to family members specially my wife Pritee, son Stavan and Parents, whose love and blessings are always the greatest source of empowerment for me. Finally, I thank all those who had helped me directly or indirectly and whose names would have been inadvertently missed above.

Haresh A. Suthar
