

List of Figures

3.1	Conventional 1DOF control system	25
3.2	Conventional 2DOF control system	26
3.3	2DOF Control System with reference input only	27
3.4	2DOF Control System with disturbance input only	29
3.5	Block diagram representation of heat exchanger control system	32
3.6	Transfer function of heat exchanger with controller and disturbances	34
4.1	Pareto front of two objective functions [62].	39
4.2	Procedure ideal multiobjective optimization [36].	40
4.3	Preference based multiobjective optimization [36].	41
5.1	Flow chart for working principle of GA.	48
5.2	Step response of 2DOF controller optimization using GA.	49
5.3	Flow disturbance response of 2DOF controller optimization using GA.	50
5.4	Temperature disturbance response of 2DOF controller optimization using GA.	50
5.5	Reference point (H=15) shown on normalized 3 objective problem with p=4 [15].	56
5.6	Computing intercepts and forming hyper-plane for a three objective prob- lem [15].	57
5.7	Association of population members with reference points [15].	58
5.8	Plot of Pareto optimal front using NSGA-II based optimization under IAE Criterion.	61
5.9	Plot of Pareto optimal front using NSGA-II based optimization under ISE Criterion.	62

5.10 Plot of Pareto optimal front using NSGA-II based optimization under ITAE Criterion.	62
5.11 Set point response obtained using NSGA-II optimization of 2DOF controller under IAE.	66
5.12 Flow disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under IAE.	67
5.13 Temperature disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under IAE.	67
5.14 Set point response obtained using NSGA-II optimization of 2DOF controller under ISE.	68
5.15 Flow disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under ISE.	68
5.16 Temperature disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under ISE.	69
5.17 Set point response obtained using NSGA-II optimization of 2DOF controller under ITAE.	69
5.18 Flow disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under ITAE.	70
5.19 Temperature disturbance rejection response obtained using NSGA-II optimization of 2DOF controller under ITAE.	70
5.20 Plot of Pareto optimal front using NSGA-III based optimization under IAE Criterion.	72
5.21 Plot of Pareto optimal front using NSGA-III based optimization under ISE Criterion.	72
5.22 Plot of Pareto optimal front using NSGA-III based optimization under ITAE Criterion.	73
5.23 Set point response obtained using NSGA-III optimization of 2DOF controller under IAE.	82
5.24 Flow disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under IAE.	83
5.25 Temperature disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under IAE.	83

5.26	Set point response obtained using NSGA-III optimization of 2DOF controller under ISE.	84
5.27	Flow disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under ISE.	84
5.28	Temperature disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under ISE.	85
5.29	Set point response obtained using NSGA-III optimization of 2DOF controller under ITAE.	85
5.30	Flow disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under ITAE.	86
5.31	Temperature disturbance rejection response obtained using NSGA-III optimization of 2DOF controller under ITAE.	86
6.1	Step response of 2DOF controller optimization using PSO.	91
6.2	Flow disturbance response of 2DOF controller optimization using PSO. . .	91
6.3	Temperature disturbance response of 2DOF controller optimization using PSO.	92
6.4	Plot of Pareto optimal front using MOPSO based optimization under IAE Criterion.	99
6.5	Plot of Pareto optimal front using MOPSO based optimization under ISE Criterion.	99
6.6	Plot of Pareto optimal front using MOPSO based optimization under ITAE Criterion.	100
6.7	Set point response obtained using MOPSO optimization of 2DOF controller under IAE.	105
6.8	Flow disturbance rejection response obtained using MOSPO optimization of 2DOF controller under IAE.	106
6.9	Temperature disturbance rejection response obtained using MOSPO optimization of 2DOF controller under IAE.	107
6.10	Set point response obtained using MOPSO optimization of 2DOF controller under ISE.	108
6.11	Flow disturbance rejection response obtained using MOSPO optimization of 2DOF controller under ISE.	108

6.12	Temperature disturbance rejection response obtained using MOSPO optimization of 2DOF controller under ISE.	109
6.13	Set point response obtained using MOPSO optimization of 2DOF controller under ITAE.	110
6.14	Flow disturbance rejection response obtained using MOSPO optimization of 2DOF controller under ITAE.	111
6.15	Temperature disturbance rejection response obtained using MOSPO optimization of 2DOF controller under ITAE.	112
7.1	Set point response with the best rank result from TOPSIS for 2DOF controller optimization.	132
7.2	Flow disturbance rejection response with the best rank result from TOPSIS for 2DOF controller optimization.	132
7.3	Temperature disturbance rejection response with the best rank result from TOPSIS for 2DOF controller optimization.	133
