## Synopsis

<b>Acknowledgement</b>	xii
<b>1 Introduction</b>	1
1.1 General . . . . .	1
1.2 Technology Comparision – Oil Cooled vs Dry Type . . . . .	2
1.3 State-of-the-Art . . . . .	6
1.4 Motivation . . . . .	7
1.5 Thesis Organization . . . . .	9
<b>2 Finite Element Method &amp; Transformer Design</b>	11
2.1 Finite Element Method . . . . .	11
2.1.1 Finite Elements . . . . .	16
2.1.2 Interpolation Functions with Generalized Coordinates: . . .	17
2.1.3 Interpolation Functions with Natural Coordinates . . . . .	25
2.2 FEM – Application in Transformer Designing - A Retrospective	27
2.2.1 Transformer Design Parameters - Realization using FEM .	28
2.2.2 Life evaluation of Transformer using FEM . . . . .	32
2.2.3 Fault detection in Transformer using FEM . . . . .	36
2.3 Conclusion . . . . .	37

<b>3 Determination of Design Parameters of a Dry Type Transformer using Finite Element Method</b>	<b>38</b>
3.1 Introduction . . . . .	38
3.2 Determination of Impedance Value and Estimation of Electromagnetic Forces under Short Circuit Condition . . . . .	41
3.2.1 Short Circuit Current and Force Calculation . . . . .	41
3.2.2 Determination of Stresses in a Model Coil using FEA . . . . .	44
3.2.3 Stress Strain Calculation and Deformation Prediction . . . . .	46
3.2.4 Stress and Deformation with Factor of Safety 1.5 for Transverse and Longitudinal Loading . . . . .	48
3.2.5 Stress and Deformation with Factor of Safety 2.0 for Transverse and Longitudinal Loading . . . . .	51
3.2.6 Results . . . . .	54
3.3 Determination of Temperature Rise . . . . .	55
3.3.1 Thermal Capacity of a Dry Type Transformer . . . . .	55
3.3.2 Heat Dissipation in Core . . . . .	55
3.3.3 Heat Dissipation in Winding and Insulation . . . . .	57
3.3.4 Heat Transfer Calculation using FEA . . . . .	59
3.3.5 Estimation of Temperature Rise in Model transformer . . . . .	66
3.3.5.1 Design Approach A . . . . .	66
3.3.5.2 Design Approach B . . . . .	69
3.3.6 Results . . . . .	72
3.4 Estimation of Magnetizing Inrush Current and Air Clearances . . . . .	73
3.4.1 Magnetizing Inrush Current . . . . .	73
3.4.2 Air Clearances . . . . .	78
3.4.3 Magnetic Field Estimation using FEA . . . . .	79
3.4.4 Case Studies and Results . . . . .	83
3.4.4.1 Determination of Inrush Current . . . . .	83
3.4.4.2 Determination of Air Clearances . . . . .	84
3.5 Conclusion . . . . .	87

---

<b>4 Design Optimization</b>	<b>89</b>
4.1 General . . . . .	89
4.2 Optimization Problem and Optimization Techniques . . . . .	90
4.2.1 Interior Penalty Function Method with Equality and Inequality Constraints . . . . .	92
4.3 Optimization Problem Formulation . . . . .	94
4.4 Design Optimization in an Isolation Transformer . . . . .	97
4.5 Results . . . . .	102
4.6 Conclusion . . . . .	102
<b>5 Conclusion and Future Scope</b>	<b>104</b>
5.1 General . . . . .	104
5.2 Salient Features of Research Work and Summary of Important Finding . . . . .	105
5.2.1 Salient Features . . . . .	105
5.2.2 Important Findings . . . . .	106
5.3 Scope for Further Research . . . . .	108
<b>Publications</b>	<b>110</b>
<b>Bibliography</b>	<b>111</b>
