

List of Tables

2.1	Calculated and Measured Equivalent Circuit Parameters for Sample Transformers	30
2.2	Specifications of Typical Traction Transformer	31
2.3	Leakage Inductances of Traction Transformer	31
3.1	Specifications of Air Core Reactor	45
3.2	Boundary Conditions	48
3.3	Stress Strain Values and Deformation for SF 1.5	49
3.4	Stress Strain Values and Deformation for SF 2	52
3.5	Specification of 160 kVA Transformer	67
3.6	Initial & Boundary Conditions	67
3.7	Design Approach A	68
3.8	Temperature Rise for Coil Geometry A	69
3.9	Design Approach B	70
3.10	Temperature Rise for Coil Geometry B	70
3.11	Temperature Rise of Transformer by Simulation Load Method	72
3.12	Specifications of 1.5 kVA Transformer	83

3.13	Inrush Current	84
3.14	Specifications of Inrush Current Limiting Reactor	85
3.15	Electric Field Strength at Winding Ends of Inrush Current Limiting Reactor	86
3.16	Nominal Air Clearances for Various System Voltages Up to 36 kV Class	87
4.1	Optimization Techniques	92
4.2	Specifications of 100 kVA Isolation Transformer	99
4.3	Design Variables / Parameters after Initial Design	99
4.4	Lower and Upper Bound for Design Variables	100
4.5	Obtained Values of Design Variables	101
4.6	Obtained Values of Design Parameters	101
4.7	Design Variables / Parameters after Optimized Design	101
4.8	Obtained Values of Design Parameters	102
