<b>Synopsis</b>	<b>iv</b>
<b>Acknowledgements</b>	<b>xiv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 General . . . . .	1
1.2 Available Transfer capability and Congestion Management . . . . .	2
1.2.1 Available Transfer Capability (ATC) . . . . .	2
1.2.2 Congestion Management . . . . .	3
1.3 State-of-the-Art . . . . .	5
1.4 Motivation . . . . .	10
1.5 Thesis Organization . . . . .	13
<b>2 Restructured Electrical Power Network and Available Transfer Capability</b>	<b>14</b>
2.1 Introduction . . . . .	14
2.2 Significance of Restructured Electrical Power Network . . . . .	15
2.3 Regulation and Deregulation . . . . .	16
2.4 Deregulation of power Industry . . . . .	17
2.4.1 Disaggregation of traditionally vertically integrated utility . . . . .	17
2.4.2 Structure of deregulated industry . . . . .	18
2.4.3 Market Entities and Model for Electricity . . . . .	19
2.5 Deregulation and Current Scenario around the World . . . . .	24
2.5.1 History of Deregulation around the world: . . . . .	25
2.5.2 Indian Scenario of Deregulation . . . . .	25
2.5.3 The Electricity Act 2003: . . . . .	26

2.5.4	Salient feature of need for open access . . . . .	27
2.6	Congestion . . . . .	28
2.6.1	Effects of Congestion . . . . .	29
2.6.2	Congestion Management . . . . .	30
2.6.3	Significance of Congestion Management . . . . .	30
2.6.4	Methods for Congestion Management . . . . .	31
2.6.4.1	Price Area Congestion Management . . . . .	31
2.6.4.2	Optimal Power Flow based Congestion Management . . . . .	32
2.6.4.3	Available Transfer Capability based Congestion Management . . . . .	32
2.7	Available Transfer Capability . . . . .	32
2.7.1	Factors affecting Transfer Capability . . . . .	33
2.7.2	Definition of the Terms . . . . .	34
2.8	Available Transfer Capability and Congestion Management . . . . .	36
2.8.1	Network Sensitivity Factor based Approach . . . . .	37
2.8.2	DC Load Flow Based Approach (DC Method) . . . . .	38
2.8.3	A.C.Load Flow Based Approach . . . . .	39
2.8.4	Mathematical Modeling of ATC . . . . .	40
2.8.4.1	Real Power Congestion Distribution Factor based Available Transfer Capability Calculation . . . . .	40
2.8.4.2	Line Outage Distribution Factor based Available Transfer Capability Calculation . . . . .	44
2.8.4.3	Available Transfer Capability computation . . . . .	45
2.9	Conclusion . . . . .	46
<b>3</b>	<b>Available Transfer Capability Calculation using Artificial Neural Network</b>	<b>47</b>
3.1	Introduction . . . . .	47
3.2	Artificial Neural Network Based Available Transfer Capability computation	48
3.2.1	Back Propagation Algorithm . . . . .	49
3.2.2	Training of Neural network . . . . .	51
3.2.3	Implementation of Back Propagation for Available Transfer Capability Prediction . . . . .	53

3.3	System Studies and Results . . . . .	53
3.4	Conclusion . . . . .	58
<b>4</b>	<b>Evaluation of optimized value of Available Transfer Capability using Genetic Algorithm and Statistical Mathematical Modeling</b>	<b>59</b>
4.1	Introduction . . . . .	59
4.1.1	Genetic Algorithm . . . . .	60
4.1.2	Steps for Genetic Algorithm . . . . .	60
4.2	Different Methods to improvements in GA results . . . . .	61
4.2.1	Roulette wheel selection based Genetic Algorithm . . . . .	61
4.2.2	Tournament Selection based Genetic Algorithm . . . . .	62
4.2.3	Elitism . . . . .	63
4.3	Problem formulation for optimization of Available Transfer capability . . . . .	63
4.3.1	Objective Function . . . . .	63
4.3.2	Proposed Algorithm . . . . .	64
4.4	System Studies and Results . . . . .	64
4.4.1	IEEE 30 bus system . . . . .	64
4.4.1.1	Roulette Wheel Selection based Genetic Algorithm . . . . .	65
4.4.1.2	Tournament Selection Based Genetic Algorithm . . . . .	66
4.4.2	UPSEB 75 bus system . . . . .	72
4.4.2.1	Roulette Wheel Selection based Genetic algorithm . . . . .	72
4.4.2.2	Tournament Section Based Genetic Algorithm . . . . .	72
4.5	Statistical Model Analysis . . . . .	78
4.5.1	Mathematical Modeling using Multiple Regression analysis . . . . .	78
4.5.2	System Studies and Results . . . . .	80
4.6	Conclusion . . . . .	84
<b>5</b>	<b>Particle Swarm Optimization for estimation of optimized Available Transfer Capability</b>	<b>86</b>
5.1	Introduction . . . . .	86
5.2	Elementary of Particle Swarm Optimization . . . . .	88
5.2.1	Advantages of Particle Swarm Optimization . . . . .	90
5.2.2	Disadvantages of Particle Swarm Optimization . . . . .	91

5.3	Problem formulation of Available Transfer capability . . . . .	91
5.3.1	Objective Function . . . . .	92
5.3.2	Step by step procedure for implementing Particle Swarm Optimization	92
5.4	System Studies and Results . . . . .	94
5.4.0.1	IEEE 30 bus system . . . . .	94
5.4.0.2	UPSEB 75 bus system . . . . .	94
5.5	Conclusion . . . . .	101
<b>6</b>	<b>Novel approach of Teaching Learning Based Optimization to compute value of optimized Available Transfer Capability for manifold transactions</b>	<b>102</b>
6.1	Introduction . . . . .	102
6.2	Elementary of Teaching Learning Based Optimization . . . . .	104
6.2.1	Teacher Phase . . . . .	105
6.2.2	Learner Phase . . . . .	106
6.2.3	Steps for Teaching Learning Based Optimization . . . . .	107
6.2.4	Elitist TLBO . . . . .	107
6.3	Problem formulation of Available Transfer capability . . . . .	108
6.3.1	Proposed Algorithm . . . . .	108
6.3.2	Objective Function . . . . .	109
6.4	System Studies and Results . . . . .	109
6.4.0.1	IEEE 30 bus system . . . . .	109
6.4.0.2	UPSEB 75 bus system . . . . .	113
6.5	Conclusion . . . . .	117
<b>7</b>	<b>Result Comparison</b>	<b>118</b>
7.1	Introduction . . . . .	118
7.2	Result Comparison . . . . .	118
7.2.1	IEEE 30 bus system . . . . .	118
7.2.2	UPSEB 75 bus system . . . . .	121
7.3	Conclusion . . . . .	122
<b>8</b>	<b>Conclusions</b>	<b>123</b>
8.1	General . . . . .	123

8.2 Summary of Important Findings . . . . .	124
8.3 Scope for Further Research . . . . .	125
<b>A Data For IEEE 30-Bus Test System (At 100 MVA Base)</b>	<b>139</b>
<b>B Data For 75-Bus UPSEB System (At 100 MVA Base)</b>	<b>146</b>
<b>C Curriculum Vitae</b>	<b>155</b>
<b>D List of Publications</b>	<b>156</b>
