

List of Figures

2.1	Structure of Regulated Environment	18
2.2	Fully Deregulation Market structure	22
3.1	Fundamental structure of ANN	50
3.2	Block diagram of ANN based ATC Prediction	56
3.3	Bar chart comparison of Actual and Predicted value of ATC for IEEE 30 Bus system	57
4.1	Flow chart for GA algorithm	65
4.2	Optimized value of ATC using RWSGA without Elitism strategy for IEEE 30 bus test system for 1 st loading condition	68
4.3	Optimized value of ATC using RWSGA with Elitism strategy for IEEE 30 bus test system for 1 st loading condition	69
4.4	Optimized value of ATC using TSBGA without Elitism strategy for IEEE 30 bus test system for 1 st loading condition	70
4.5	Optimized value of ATC using TSBGA with Elitism strategy for IEEE 30 bus test system for 1 st loading condition	71
4.6	Optimized value of ATC using RWSGA without Elitism strategy for UP- SEB 75 bus system for 1 st loading condition	74
4.7	Optimized value of ATC using RWSGA with Elitism strategy for UPSEB 75 bus system for 1 st loading condition	75
4.8	Optimized value of ATC using TSBGA without Elitism strategy for 75 bus UPSEB system for 1 st loading condition	76
4.9	Optimized value of ATC using TSBGA with Elitism strategy for 75 bus UPSEB system for 1 st loading condition	77

4.10	Graphical representation of Actual and predicted value of ATC using Statistical model for 1 st loading condition	83
5.1	Graphical representation of PSO	90
5.2	Flow chart for PSO algorithm	93
5.3	Optimized value of ATC using PSO without Elitism strategy for IEEE 30 bus test system for 1 st loading condition	95
5.4	Optimized value of ATC using PSO with Elitism strategy for IEEE 30 bus test system for 1 st loading condition	96
5.5	Optimized value of ATC using PSO without Elitism strategy for 75 bus UPSEB system for 1 st loading condition	98
5.6	Optimized value of ATC using PSO with Elitism strategy for 75 bus UPSEB system for 1 st loading condition	99
6.1	Optimized value of ATC using TLBO without Elitism strategy for IEEE 30 bus test system for the 1 _{st} loading condition	111
6.2	Optimized value of ATC using TLBO with Elitism strategy for IEEE 30 bus test system for the 1 _{st} loading condition	112
6.3	Optimized value of ATC using TLBO without Elitism strategy for 75 bus UPSEB system for the 1 _{st} loading condition	114
6.4	Optimized value of ATC using TLBO with Elitism strategy for 75 bus UPSEB system for the 1 _{st} loading condition	115
7.1	Graphical of comparison between different methods for IEEE 30 bus system	120
7.2	Graphical of comparison between different methods for 75 bus UPSEB system	122
A.1	IEEE 30-bus system	145
B.1	75-bus UPSEB system	154
