

LIST OF FIGURES

Figure 2. 1 Classification of Frequency control techniques	9
Figure 2. 2 Scalar control using Voltage fed Inverter based induction motor control	10
Figure 2. 3 Volts/Hz speed control with voltage fed Inverter	11
Figure 2. 4 speed control with Volts/Hz control and slip regulation	11
Figure 2. 5 Torque and Flux control system.....	12
Figure 2. 6 General block diagram of current controlled voltage fed Inverter I.M.drive	12
Figure 2. 7 Vector control approach	13
Figure 2. 8 General Block diagram of Vector control of Induction Motor	13
Figure 2. 9 Direct Vector control using Estimator	14
Figure 2. 10 General block diagram of Indirect vector control	15
Figure 2. 11 Phase portrait of a sliding motion [46-50]	18
Figure 2. 12 chattering phenomena [46-50]	19
Figure 2. 13 Phase planes (a), (b), phase plane of composite system with VSS (c) [46-47]	20
Figure 2. 14 variable structure systems (a), (b), state plane of variable structure system (c)	21
Figure 2. 15 Multi rate output Feedback(MROF) based DSMC for D.C.motor system [25]	26
Figure 2. 16 Separately excited d.c.motor [2]	27
Figure 2. 17 <i>Control Input u</i>	32
Figure 2. 18 <i>Sliding Surface S</i>	32
Figure 2. 19 <i>Position state x_1</i>	33
Figure 2. 20 <i>Angular velocity state x_2</i>	33
Figure 2. 21 <i>Armature current state x_3</i>	33
Figure 3. 1 Conventional sliding mode control approach [13, 16]	37
Figure 3. 2 SMC based Speed, Current & Flux controller [2]	37
Figure 3. 3 Adaptive VSC controller [3]	38
Figure 3. 4 Observer based VSC controller approach [7]	39
Figure 3. 5 MRAS based Sliding mode controller approach [6]	40
Figure 3. 6 General close loop system	41
Figure 3. 7 Performance comparison of SMC and P-I controller	42
Figure 3. 8 Vector controlled Induction motor with SMC [9]	44
Figure 3. 9 Trapezoidal Velocity profile for incremental motion control [52-57,65]	45
Figure 3. 10 Acceleration MATLAB simulink Block	46
Figure 3. 11 Run segment MATLAB simulink Block	46
Figure 3. 12 Deceleration segment MATLAB simulink Block	47
Figure 3. 13 Position control segment MATLAB simulink Block	47
Figure 3. 14 velocity control segment MATLAB simulink Block	47
Figure 3. 15 Velocity controller MATLAB simulink Block	49

Figure 3. 16 Position mode MATLAB simulink Block	49
Figure 3. 17 Position controller MATLAB simulink Block.....	50
Figure 3. 18 Multi segment Sliding Mode controller MATLAB Simulink Block.....	50
Figure 3. 19 MSMC based closed loop control of Induction motor drive.....	51
Figure 3. 20 Response of a MSMC based rotor velocity controller	51
Figure 3. 21 Response of a MSMC based rotor position controller	52
Figure 3. 22 FIS Editor for MSMC	53
Figure 3. 23 Rule Editor for MSMC.....	55
Figure 3. 24 GA-Fuzzy based MSMC	56
Figure 3. 25 Comparison of rotor velocity controller outputs	56
Figure 3. 26 Comparison of rotor position controller outputs	57
Figure 4. 1 Conceptual idea of PWM Generation	59
Figure 4. 2 PWM Inverter fed Induction motor drive[5]	61
Figure 4. 3 Three phase 180 degree mode inverter	63
Figure 4. 4 Block diagram of PWM switching pulse Generation using DSP	64
Figure 4. 5 MATLAB SIMULINK model of 3Phase inverter based PWM	65
Figure 4. 6 Gate pulse for switch SW1 & Gate pulse for switch SW3.....	65
Figure 4. 7 Gate pulse for switch SW5.....	66
Figure 4. 8 Output Line-Line voltage waveform.....	66
Figure 4. 9 FFT analysis of Voltage signal using MATLAB-Simulink	67
Figure 4. 10 SPWM based Three phase VSI fed I.M.drive.....	68
Figure 4. 11 Drive signal generated for S1.....	68
Figure 4. 12 Inverted drive signal of s1 applied to S2.....	69
Figure 4. 13 Drive signal generated for S3.....	69
Figure 4. 14 Drive Signal generated for S5.....	70
Figure 4. 15 Output voltage between Line -Line	70
Figure 5. 1Real Image of Hardware set up.....	73
Figure 5. 2 Gate pulses from DSP	74
Figure 5. 3 Inverted Gate pulse from DSP.....	74
Figure 5. 4 Dead band between pulses	75
Figure 5. 5 Output Voltage between R-Y and Y-B phases.....	75
Figure 5. 6 Output voltage between R-B phases.....	76
Figure 5. 7 FFT signal of output voltage.....	76
Figure 5. 8 Real time Pulse generation Simulink-MATLAB model.....	78
Figure 5. 9 Drive signals for three phase voltage source inverter.....	79
Figure 5. 10 High frequency drive signals.....	79
Figure 5. 11 Dead band between normal & inverted drive signal	80
Figure 5. 12 Output voltage of inverter	81

Figure 5. 13 Insight view of output voltage	81
Figure 5. 14 SMC voltage control for Inverter fed Induction motor drive.....	82
Figure 5. 15 Real time Experimental set up for SMC of Induction motor drive.....	83
Figure 5. 16 PIL simulation block of MSMC of Induction Motor drive	84
Figure 5. 17 Response of a MSMC based rotor velocity controller using PIL	84
Figure 5. 18 Response of a MSMC based rotor position controller using PIL.....	85
Figure A. 1 Real time workshop architecture	117
Figure A. 2 Files developed by built Process.....	118
Figure A. 3 Target Environments supported by Embedded Coder	119
Figure A. 4 Embedded Coder Block sets	120
Figure A. 5 ePWM MATLAB SIMULINK Block.....	121
Figure A. 6 General Block Parameters of ePWM.....	122
Figure A. 7 Block Parameters of ePWMA	123
Figure A. 8 Block Parameters of ePWMB.....	124
Figure A. 9 Block Parameters of Deadband Unit.....	124
Figure A. 10 Structure of Fuzzy Controller.....	126
Figure A. 11 Operational block diagram of Fuzzy controller.....	127
Figure A. 12 Membership functions in Fuzzy Logic tool box-MATLAB	128
Figure A. 13 Variables of Problem setup and Results.....	133
Figure A. 14 Constraints of GA	134
Figure A. 15 Options of GA tools	134
Figure A. 16 Run Solver dialog box.....	135
Figure A. 17 Practice board of DSP F28335.....	136
Figure A. 18 PWM Isolator Module	138
Figure A. 19 Interfacing of DSP module with PWM Isolator module	139
Figure A. 20 Model Configuration parameters	142
Figure A. 21 Solver parameters.....	142
Figure A. 22 Hardware Implementation Tab	143
Figure A. 23 Simulation Target.....	143
Figure A. 24 Code Generation	144
Figure A. 25 System Target File Browser	144
Figure A. 26 Configuration parameters for Target Hardware.....	145
Figure A. 27 MATLAB –Simulink based PWM Generation	146
Figure A. 28 PWM for 6.9% duty cycle	147
Figure A. 29 PWM for 25.2% duty cycle	147
Figure A. 30 PWM for 50.2% duty cycle	148
Figure A. 31 PWM for 75.2% duty cycle	148
Figure A. 32 PWM for 93.6% duty cycle	149
