

LIST OF FIGURES

| | |
|--|-----|
| Plate 2.1 First Diesel Engine..... | 10 |
| Plate 2.2 Rudolph Diesel | 11 |
| Figure 2.1 Pressure vs. Crank Angle at 3.88mg per cycle [63]..... | 65 |
| Figure 2.2 Pressure vs. Crank Angle at 5 mg per cycle [63]..... | 66 |
| Figure 2.3 Pressure vs Crank Angle for 6.11 mg per cycle [63]..... | 66 |
| Figure 2.4 Pressure vs Crank Angle at 7.22 mg per cycle [63]..... | 67 |
| Figure 2.5 Variation of Combustion Efficiency and Exhaust Temperature with Air-Fuel Ratio [82].... | 68 |
| Figure 2.6 Variation of Oxygen Concentration and CO with Air-Fuel Ratio [82]..... | 69 |
| Figure 2.7 Comparison of Heat Release Rates for Different Fuels [84]..... | 70 |
| Figure 2.8 Structure of ANN for Dual Fuel (CNG-Diesel) Operated Diesel Engine [93]..... | 79 |
| Figure 2.9 Flow chart for the proposed study..... | 83 |
| Plate 3.1 Experimental Test Rig..... | 87 |
| Figure. 3.1 Schematic Diagram of Experimental Test Rig..... | 88 |
| Plate 3.2 Variable Compression Ratio Diesel Engine..... | 91 |
| Plate 3.3 Rear View of the Engine..... | 92 |
| Figure 3.2 Principle of Tilting Cylinder Block Assembly..... | 93 |
| Plate 3.4 Tilting Cylinder Block Arrangement..... | 93 |
| Plate 3.5 Compression Ratio Setting..... | 94 |
| Plate 3.6 Fuel Injection Pump..... | 95 |
| Plate 3.7 Eddy Current Dynamometer..... | 96 |
| Plate 3.8 Assembly of Eddy Current Dynamometer and Engine..... | 97 |
| Plate 3.9 Components Connected to the Eddy Current Dynamometer..... | 98 |
| Plate 3.10 Load Cell..... | 99 |
| Plate 3.11 Dynamometer Loading Unit..... | 100 |
| Plate 3.12 Engine Panel Box..... | 101 |
| Figure 3.3 Schematic Diagram of the Loading Dimmerstat..... | 102 |
| Figure 3.4 Circuit Diagram of the Loading Dimmerstat..... | 102 |
| Plate 3.13 Piezosensor..... | 103 |
| Plate 3.14 The Nut Adjustment for Setting Injection Pressure..... | 104 |

| | |
|--|-----|
| Plate 3.15 Location of Pressure Sensors..... | 105 |
| Plate 3.16 Sensors Interface Circuit..... | 106 |
| Plate 3.17 Assembly of Emission Measurement Systems..... | 109 |
| Plate 3.18 Exhaust Gas Analyzer..... | 110 |
| Figure. 3.5 Principle of Non-Dispersive Infra Red Technique..... | 110 |
| Plate 3.19 Measurement of Exhaust Gas Constituents..... | 111 |
| Plate 3.20 Smoke Meter..... | 112 |
| Figure 3.6 Principle of Folded Geometry..... | 113 |
| Plate 3.21 Measurement of Exhaust Smoke..... | 114 |
| Plate 3.22 Interface of EnginesoftLV..... | 115 |
| Figure 4.1 Input and Output Variables of the Engine System..... | 122 |
| Figure 4.2 Comparison of Variation of BTHE with Load at CR of 17.5 and IP of 200bar..... | 123 |
| Figure 4.3 Comparison of Variation of BSFC with Load at CR of 17.5 and IP of 200bar..... | 124 |
| Figure 4.4 Comparison of BTHE at Rated Load, CR of 17.5 and IP of 200bar | 124 |
| Figure 4.5 Comparison of BSFC at Rated Load, CR of 17.5 and IP of 200bar | 125 |
| Figure 4.6 Variation of HC with Load at CR of 17.5 and IP of 200bar | 126 |
| Figure 4.7 Variation of O ₂ with Load at CR of 17.5 and IP of 200bar | 126 |
| Figure 4.8 Variation of NO _x with Load at CR of 17.5 and IP of 200bar | 127 |
| Figure 4.9 Variation of HC with CR at Load of 12kg and IP of 200bar | 127 |
| Figure 4.10 Variation of O ₂ with CR at Load of 12kg and IP of 200bar | 128 |
| Figure 4.11 Variation of NO _x with CR at Load of 12kg and IP of 200bar | 128 |
| Figure 4.12 Variation of HC with IP at Load of 12kg and CR of 17.5 | 129 |
| Figure 4.13 Variation of O ₂ with IP at Load of 12kg and CR of 17.5 | 129 |
| Figure 4.14 Variation of NO _x with IP at Load of 12kg and CR of 17.5 | 130 |
| Figure 4.15 Comparison of Variation of BTHE with CR at a Load of 12kg and IP of 200bar | 131 |
| Figure 4.16 Comparison of Variation of BSFC with CR at a Load of 12kg and IP of 200bar | 132 |
| Figure 4.17 Comparison of Variation of BTHE and BSFC with CR at a Load of 12kg and IP of 200bar with Earlier Studies | 133 |
| Figure 4.18 Comparison of Variation of BMEP with CR at a Load of 12kg and IP of 200bar..... | 134 |

| | |
|--|-----|
| Figure 4.19 Comparison of Variation of Volumetric Efficiency with CR at a Load of 12kg and IP of 200bar | 135 |
| Figure 4.20 Comparison of Variation of HBP with CR at a Load of 12kg and IP of 200bar | 136 |
| Figure 4.21 Comparison of Variation of HGas with CR at a Load of 12kg and IP of 200bar | 137 |
| Figure 4.22 Comparison of Variation of EGT with CR at a Load of 12kg and IP of 200bar | 138 |
| Figure 4.23 Comparison of Variation of EGT with CR at a Load of 12kg and IP of 200bar with Earlier Studies | 139 |
| Figure 4.24 Comparison of Variation of BTHE with Load at a CR of 18 and IP of 200bar | 140 |
| Figure 4.25 Comparison of Variation of BSFC with Load at a CR of 18 and IP of 200bar | 141 |
| Figure 4.26 Comparison of Variation of BTHE and BSFC with Load at a CR of 18 and IP of 200bar with Earlier Studies | 142 |
| Figure 4.27 Comparison of Variation of BMEP with Load at a CR of 18 and IP of 200bar..... | 143 |
| Figure 4.28 Comparison of Variation of Volumetric Efficiency with Load at a CR of 18 and IP of 200bar | 144 |
| Figure 4.29 Comparison of Variation of HBP with Load at a CR of 18 and IP of 200bar | 144 |
| Figure 4.30 Comparison of Variation of HGas with Load at a CR of 18 and IP of 200bar | 145 |
| Figure 4.31 Comparison of Variation of EGT with Load at a CR of 18 and IP of 200ba | 146 |
| Figure 4.32 Comparison of Variation of EGT with Load at a CR of 18 and IP of 200bar with Earlier Studies | 147 |
| Figure 4.33 Comparison of Variation of BTHE with IP at CR of 18 and Load of 12kg | 148 |
| Figure 4.34 Comparison of Variation of BSFC with IP at CR of 18 and Load of 12kg..... | 148 |
| Figure 4.35 Comparison of Variation of BTHE and BSFC with IP at a CR of 18 and IP of 200bar with Earlier Studies..... | 149 |
| Figure 4.36 Comparison of Variation of BMEP with IP at CR of 18 and Load of 12kg..... | 150 |
| Figure 4.37 Comparison of Variation of Volumetric Efficiency with IP at CR of 18 and Load of 12kg | 151 |
| Figure 4.38 Comparison of Variation of HBP with IP at CR of 18 and Load of 12kg | 151 |
| Figure 4.39 Comparison of Variation of HGas with IP at CR of 18 and Load of 12kg..... | 152 |
| Figure 4.40 Comparison of Variation of EGT with IP at CR of 18 and Load of 12kg..... | 153 |
| Figure 4.41 Comparison of Variation of EGT with IP at a CR of 18 and Load of 12kg of Present Study with Jindal et al. [66] | 154 |
| Figure 4.42 Comparison of Variation of CO with CR at Load of 12kg and IP of 200bar..... | 155 |
| Figure 4.43 Comparison of Variation of HC with CR at Load of 12kg and IP of 200bar | 156 |

| | |
|--|-----|
| Figure 4.44 Comparison of Variation of HC with CR at a Load of 12kg and IP of 200bar Present Study with Earlier Studies | 157 |
| Figure 4.45 Comparison of Variation of NO _x with CR at Load of 12kg and IP of 200bar | 158 |
| Figure 4.46 Comparison of Variation of CO ₂ with CR at Load of 12kg and IP of 200bar | 159 |
| Figure 4.47 Comparison of Variation of O ₂ with CR at Load of 12kg and IP of 200bar | 160 |
| Figure 4.48 Comparison of Variation of SO _x with CR at Load of 12kg and IP of 200bar | 161 |
| Figure 4.49 Comparison of Variation of HSU with CR for at Load of 12kg and IP of 200bar | 162 |
| Figure 4.50 Comparison of Variation of NO _x and HSU with CR at a Load of 12kg and IP of 200bar with Earlier Studies..... | 163 |
| Figure 4.51 Comparison of Variation of CO with Load at CR of 18 and IP of 200bar | 164 |
| Figure 4.52 Comparison of Variation of HC with Load at CR of 18 and IP of 200bar | 165 |
| Figure 4.53 Comparison of Variation of NO _x with Load at CR of 18 and IP of 200bar | 166 |
| Figure 4.54 Comparison of Variation of CO ₂ with Load at CR of 18 and IP of 200bar | 167 |
| Figure 4.55 Comparison of Variation of O ₂ with Load at CR of 18 and IP of 200bar | 168 |
| Figure 4.56 Comparison of Variation of SO _x with Load at CR of 18 and IP of 200bar | 169 |
| Figure 4.57 Comparison of Variation of HSU with Load at CR of 18 and IP of 200bar..... | 170 |
| Figure 4.58 Comparison of Variation of NO _x and HSU with Load at a CR of 18 and IP of 200bar with Earlier Studies..... | 171 |
| Figure 4.59 Comparison of Variation of CO with IP at CR of 18 and Load of 12kg..... | 172 |
| Figure 4.60 Comparison of Variation of CO with IP at a CR of 18 and Load of 12kg with Jindal et al. [66]..... | 173 |
| Figure 4.61 Comparison of Variation of HC with IP at CR of 18 and Load of 12kg | 173 |
| Figure 4.62 Comparison of Variation of HC with IP at CR of 18 and Load of 12kg of Present Study with Jindal et al. [66] | 174 |
| Figure 4.63 Comparison of Variation of NO _x with IP at CR of 18 and Load of 12kg | 174 |
| Figure 4.64 Comparison of Variation of CO ₂ with IP at CR of 18 and Load of 12kg..... | 175 |
| Figure 4.65 Comparison of Variation of CO ₂ with IP at a CR of 18 and Load of 12kg of Present Study with Jindal et al. [66] | 176 |
| Figure 4.66 Comparison of Variation of O ₂ with IP for Tested Fuels at CR of 18 and Load of 12kg... | 177 |
| Figure 4.67 Comparison of Variation of SO _x with IP at CR of 18 and Load of 12kg | 178 |
