Acknowledgements

I feel privileged to express my deep sense of gratitude and sincere thanks to my guide Prof.(Dr.) S. N. Soman, Metallurgical and Materials Engineering Department of Faculty of Technology & Engineering, The Maharaja Sayajirao University of Baroda., for his motivation and indispensable guidance towards the successful completion of this research work. During my association with him I have been persistently encouraged and educated by him through fruitful discussions throughout the entire period of this research work.

I take this opportunity to thank Prof. (Dr.) S. N. Soman, Head of Metallurgical and Materials Engineering Department, Faculty of Technology & Engineering, M. S. University of Baroda as well as all past Heads of the Department for extending me the laboratory facilities available in the department for research, showing active interest in my work and encouraging me from time to time.

I humbly express my thanks to Prof. (Dr.) Arun Pratap, Dean, Faculty of Technology and Engineering, The Maharaja Sayajirao University of Baroda, for his concern at every step of my project and providing me the necessary facilities and support. He has always been a source of encouragement.

I am highly grateful to Prof. Parimal Vyas, Honorable Vice Chancellar, The Maharaja Sayajirao University of Baroda, for providing the opportunity to carry out the thesis work.

I would like to express my heartfelt thanks to Prof. H. K.D. H. Bhadeshia and his Phase Transformation and Complex Properties Group., Cambridge University, U.K., has given me the inspiration to work in field of Neural Networks and Genetic Algorithms of the Ferritic Steel Welds.

I would also like to thank the past members of the Phase Transformation and Complex properties Group, in particular Dr. Thomas Sourmail, Dr. Harsha Sree lalam, and Anne Delorme for their contribution in Neural network software and Genetic Algorithms software and make it available for the research work.

I am thankful to all the faculty and staff of Metallurgical and Materials Engineering Department, specifically Dr. Liladhar Vitthalrao Kamble, Dr. P. K. Nanavati, Mr. Himmat Baraiya, Mr. Anil Parmar, Mr. Kaizar Bhaishab, Mr. Vivek Macchi, for their cooperation during my thesis work.

At this stage I would like to express my thanks to all teaching & non-teaching staff members of Metallurgical and Materials Engineering Department of Faculty of Technology & Engineering, M. S. University of Baroda.

Lastly, I express my sincere thanks to my parents, wife Uma, and son Rudrang for their moral support, understanding and cooperation throughout the course of my research work.

M. S. UNIVERSITY OF BARODA B. J. Chauhan
