

List Of Tables

Table No	Title	Page No
2.1	Chemical composition of some steels have been used Power Plant, all units are in wt%.	11
2.2	Yield and Ultimate tensile strength (MPa) regression models of weld metals. The alloying element concentrations are expressed in wt%.	39
2.3	The fitness value f_i of each chromosome i and the corresponding probability P_i of selection	63
3.1	The Input Variables for Yield Strength Model. “p.p.m .’ corresponds to parts per million by weight.	68
3.2	Comparison of Neural network models {MLP, RBF, GRNN}	79
3.3	Comparison of Significance of Best Trained Models of Yield Strength	81
3.4	The Input Variables for UltimateTensileStrengthModel.	86
3.5	Comparison of Neural network models (MLP, RBF, GRNN)	96
3.6	Comparison of Significance of Best Trained Models of Ultimate Tensile Strength	99
3.7	The Input Variables for Elongation Model. “p.p.m .’ corresponds to parts per million by weight.	104
3.8	Comparison of Neural network models (MLP, RBF, GRNN)	115
3.9	Comparison of Significance of Best Trained Models of Elongation	118
3.10	The Input Variables for Charpy Toughness Model. “p.p.m .’ corresponds to parts per million by weight.	123
3.11	Comparison of Neural network models (MLP, RBF, GRNN)	133
3.12	Comparison of Significance of Best Trained Models of Elongation	136
4.1	Predicted yield strength by BNN model for unseen data of three ferritic weld	181
4.2	Predicted yield strength by GRNN model for unseen data of three ferritic weld	182
4.3	Predicted Input variables by NN-GA model for two targeted Yield Strength of ferritic weld deposits	184
4.4	Predicted Ultimate Tensile strength by BNN model for unseen data of three ferritic weld deposits	230
4.5	Predicted Ultimate Tensile strength by GRNN model for unseen data of three ferritic weld deposits	231
4.6	Predicted Input variables by NN-GA model for two targeted Ultimate Tensile Strength of ferritic weld deposits	233
4.7	Predicted Elongation by BNN model for unseen data of three ferritic weld deposits	272
4.8	Predicted Elongation by GRNN model for unseen data of three ferritic weld deposits	273

4.9	Predicted Input variables by NN-GA model for two targeted Elongation of ferritic weld deposits	275
4.10	The normalized scale of Ternary Plot 0 to 1 First row red colour converted to Actual scale of variables	324
4.11	Predicted Charpy Toughness by BNN model for unseen data of three ferritic weld	328
4.12	Predicted Charpy Toughness by GRNN model for unseen data of three ferritic weld deposits	329
4.13	Predicted Input variables by NN-GA model for two targeted Charpy Toughness of ferritic weld deposits	331
