

ACKNOWLEDGEMENT

I would like to add a few whole-hearted words for the people who were a part of the project in numerous ways, people who gave unending support right from the stage of beginning till the project was accepted.

I am sincerely thankful to my Ph.D Mentor Professor (Dr) Sanjay N.Soman, Professor and Head, Metallurgical and Materials Engineering department, The M.S.University of Baroda, Vadodara for his all kind of support and valuable technical and commercial guidance to conduct this Ph.D. research program successfully.

I would like to express appreciation for financial support provided by GUJCOST-DST under Minor Research Project Scheme award of Research grant (2014-15.) Ref. GUJCOST Letter Dated 30th March 2015. This research work is the outcome of the financial grant.

I express my heartfelt thanks to Dr. Damian Kotecki, President, Damian Kotecki Welding Consultants, Inc. Chapel Hill, North Carolina, USA for the review of the all experimental work results and for providing technical guidance from time to time to improve the quality of the work. Also extending sincere thanks for Weld Consumable Test support provided by his client Mr. Umesh Agarwal, CEO, Ms. GEE Ltd, Kalyan (West) Thane Mumbai, India for providing especially formulated SMAW Electrodes, on complimentary basis, to achieve the objectives of this research program.

It is my privilege to thank Mr. Fredrik Prabhu, Sr. Manager, ITW India Pvt. Ltd for giving permission for utilising International quality Miller Make XMT 350 OS Autoline Welding machine and technical guidance and resource support by his Welding engineer, Mr. Subhash Das for arranging the resource facility of the weld test coupons preparation.

I am sincerely thankful to my friends Mr. Subhash Das (Welding Engineer, ITW India Pvt. Ltd) and Dr Jaykumar Vora (Asst. Professor, Mechanical Engineering Department, School of Technology, PDP, Gandhinagar) for their valuable guidance in conducting experimentations and

I am extending my thanks to Mr. Paresh Haribhakti, M.D. TCR Advanced Engineering Pvt. Ltd, Baroda, Gujarat- India for his kind support by providing concessional rate discounts on various physical testing charges incurred in research program.

It is my privilege to thank, Mr. Amitbhai Dave of M/s Met-Heat Engineering for providing concessional rate charges of Stress Corrosion crack resistance test for large numbers of samples.

My Sincere thanks to Dr. I.B.Dave, Head, Metallurgy Department, Government Engineering College, Gandhinagar for constantly encouraging me and providing motivational support to undertake this research work.

My Sincere thanks to Professor Dr. V. V. Mathane, Mr. B. J. Chauhan, Associate Professor and Dr. S. D. Kahar Assistant Professor and all other colleagues of Metallurgical and Materials Engineering Department, M.S.University of Baroda, Vadodara.

My thanks are due to the authorities, Technical and Non-technical staff of the M.S.university.

Last but not the least, this work could not have seen this day without blessings of my belated father Kamleshbhai , my mother smt.Jyotshnaben. Moreover, there are no words to express patience shown by my wife Deepali and my two daughters Keshvi and Dhimahi.

P.K. NANAVATI
