Abstract	v
Acknowledgements	vii
1 Introduction	1
2 Literature Review	4
2.1 Noise Generation	5
2.2 Effect of Noise	6
2.3 Noise Control	7
2.4 Basics of Acoustic	8
2.4.1 Sound Generation	9
2.4.2 Propagation of Sound	9
2.4.2.1 Wavelength and Frequency	10
2.4.2.2 Intensity of Sound	11
2.4.2.3 Sound Pressure	13
2.4.3 Mechanism of sound interaction with receiving surface	15
2.4.3.1 Sound Absorption	15
2.4.3.1.1 Sound absorption mechanism of fibrous materials	17
2.4.3.1.2 Sound Absorbing coefficient	18
2.4.3.2 Sound Transmission	19
2.4.3.3 Sound Reflection	20
2.4.3.4 Sound Refraction	20
2.4.3.5 Sound Diffraction	21
2.5 Acoustic Textiles Materials	21
2.5.1 Raw Materials	23

2.5.1.1	Synthetic Fibre	23
2.5.1.2	Natural Fibre	25
2.5.2	Porous Materials	30
2.5.3	Nano Materials	34
2.5.4	Composites	40
2.6	Factors Influencing Acoustic Performance of Sound Absorptive Materials .	42
2.6.1	Fibre Diameter	42
2.6.2	Fibre Cross-sectional Shapes	43
2.6.3	Density	44
2.6.4	Thickness	44
2.6.5	Porosity	45
2.6.6	Tortuosity	46
2.6.7	Airflow Resistance	47
2.6.8	Surface Impedance	49
2.6.9	Compression	50
2.6.10	Air Gap (Position of Sound Absorptive)	50
2.7	Performance of Sound Absorbing Materials	51
2.8	Assessment Methods for Sound Absorption Performance	52
2.8.1	Theory and Measurement of Sound Absorption	54
2.8.1.1	Method Using Standing Wave Ratio	54
2.8.1.2	Transfer Function Method	55
2.9	Application of Sound Absorbers	56
2.10	Kapok Fibre	57
2.10.1	Physical Characteristics of Kapok Fibre	58
2.10.2	Physical Properties of Kapok Fibre	61
2.10.3	Absorbency	64
2.10.4	Sound Absorption	65
2.10.5	Compressibility of the Kapok Fibre	65
2.10.6	Thermal Behavior of Kapok	66
2.10.7	Spinnability	66
2.10.8	Weavability	67
2.10.9	Chemical Composition of Kapok	67
2.10.10	Dyeability of Kapok Fibre	68

2.10.11 Effect of Microorganisms	69
2.10.12 Advantages	69
2.10.13 Disadvantages	69
2.10.14 Applications of Kapok fibres	70
2.11 Estabragh Fibre	71
2.11.1 Appearance and Physical Properties of Milkweed fibre	74
2.11.2 Physical Characteristics of Milkweed Fibre	76
2.11.3 Mechanical Properties of Milkweed Fibre	78
2.11.4 Chemical Composition of Milkweed Fibre	79
2.11.5 Chemical Properties of Milkweed Fibre	80
2.11.6 Moisture Property of Milkweed Fibres	80
2.11.7 Thermal Stability of Milkweed Fibres	80
2.11.8 Application of Milkweed Fibres	81
2.12 Response Surface Methodology – Central Composite Design (RSM-CCD) .	81
2.12.0.1 Central Composite Design	84
2.12.0.2 Box-Behnken Design	85
3 Experimental Work	86
3.1 Material and Methodology	86
3.1.1 Fibre Collection	86
3.1.2 Experiments Plan	89
3.1.3 Carded Web Preparation	94
3.1.4 Production of Nonwoven Fabric	95
3.2 Sample Testing	97
3.2.1 Fabric Thickness	98
3.2.2 Fabric GSM	98
3.2.3 Air permeability	98
3.2.4 Porosity	99
3.2.5 Sound absorption coefficient (α)	99
4 Development of Impedance Tube	101
4.1 Construction of Impedance Tube	101
4.1.1 Design Consideration for Microphone Spacing and Tube Diameter .	104

4.1.2	Sound Source and Microphone	105
4.2	Validation Study	105
5	Results and Discussions	108
5.1	Kapok Fibre	109
5.1.1	Interactive effect of different process parameters on the sound absorption coefficient	109
5.1.1.1	Interactive effect of kapok fibre blend% and carded web mass on sound absorption coefficient	109
5.1.1.2	Interactive effect of kapok fibre blend% and stroke frequency on sound absorption coefficient	111
5.1.1.3	Interactive effect of kapok fibre blend% and needle depth on sound absorption coefficient	112
5.1.1.4	Interactive effect of carded web mass and stroke frequency on sound absorption coefficient	114
5.1.1.5	Interactive effect of carded web mass and needle depth on sound absorption coefficient	116
5.1.1.6	Interactive effect of stroke frequency and needle depth on sound absorption coefficient	117
5.1.1.7	Analysis of Variance for the sound absorption coefficient of kapok fibre nonwoven fabric	119
5.1.1.8	Regression Analysis: Kapok fibre nonwoven fabric	123
5.1.2	Effect of proportion of kapok fibre in the blend on the sound absorption coefficient	126
5.1.3	Effect of carded web mass on the sound absorption coefficient	129
5.1.4	Effect of stroke frequency on the sound absorption coefficient	131
5.1.5	Effect of needle depth on the sound absorption coefficient	132
5.1.6	Effect of fabric thickness on the sound absorption coefficient	135
5.1.7	Effect of fabric GSM on the sound absorption coefficient	136
5.1.8	Effect of fabric air permeability on the sound absorption coefficient	138
5.1.9	Effect of fabric porosity on the sound absorption coefficient	140
5.1.10	Interactive effect of different physical properties on the sound absorption coefficient	141

5.1.10.1	Regression Analysis: physical properties of kapok fibre nonwoven fabric	144
5.2	Estabragh (Milkweed) Fibre	148
5.2.1	Interactive effect of different process parameters on the sound ab- sorption coefficient	148
5.2.1.1	Interactive effect of milkweed fibre blend% and carded web mass on sound absorption coefficient	148
5.2.1.2	Interactive effect of milkweed fibre blend% and stroke fre- quency on sound absorption coefficient	150
5.2.1.3	Interactive effect of milkweed fibre blend% and needle depth on sound absorption coefficient	151
5.2.1.4	Interactive effect of carded web mass and stroke frequency on sound absorption coefficient	153
5.2.1.5	Interactive effect of carded web mass and needle depth on sound absorption coefficient	155
5.2.1.6	Interactive effect of stroke frequency and needle depth on sound absorption coefficient	156
5.2.1.7	Analysis of Variance for the sound absorption coefficient of Milkweed fibre nonwoven fabric	158
5.2.1.8	Regression Analysis: Milkweed fibre nonwoven fabric . . .	162
5.2.2	Effect of proportion of milkweed fibre in the blend on the sound absorption coefficient	166
5.2.3	Effect of carded web mass on the sound absorption coefficient . . .	169
5.2.4	Effect of stroke frequency on the sound absorption coefficient . . .	171
5.2.5	Effect of needle depth on the sound absorption coefficient	173
5.2.6	Effect of fabric thickness on the sound absorption coefficient	175
5.2.7	Effect of fabric GSM on the sound absorption coefficient	176
5.2.8	Effect of fabric air permeability on the sound absorption coefficient	178
5.2.9	Effect of fabric porosity on the sound absorption coefficient	180
5.2.10	Interactive effect of different physical properties on the sound ab- sorption coefficient	182
5.2.10.1	Regression Analysis: physical properties of milkweed fibre nonwoven fabric	185

5.3 Validation Test Results of Experimental Setup	189
6 Conclusions	193
Future scope of work	196
