

List of Figures

Sr. No.	Figure No.	Figure Description	Page No.
Chapter 2 Literature Review			
1	2.1	Novel method of organizing Creel	20
2	2.2	Cross section of the creel arrangement	21
3	2.3	Arrangement of switching creel	22
4	2.4	Switching Mechanism	23
5	2.5	Wooden beam with metal sleeves	23
6	2.6	Warp beam with a sleeve	24
7	2.7	Detailed view of the flange with sleeve	25
8	2.8	A novel design of flange and the barrel with a detailed view as inset diagram	26
9	2.9	(a) Warp knitting beam as per Storey (b) Warp knitting beam as per Storey	27 28
10	2.10	Light weight beam flanges	29
11	2.11	Conical beam flange	30
12	2.12	Full view of the conical flange in use	31
13	2.13	Modified design of weaver's beam	32
14	2.14	An early version of sectional warping	34
15	2.15	Wooden beam with metal sleeve	35
16	2.16	Multi-component warp beam	37
17	2.17	Narrow Width Beam	38
18	2.18	Final beaming	39
19	2.19	Narrow width beam specially made	40
20	2.20	Narrow width beam for fine count high twist yarn	40

21	2.21	Two beams from a sectional warping process	41
22	2.22	Section beam separator plates	43
23	2.23	Multiple beamer for Raschel Knitting	45
24	2.24	Double beam warper	46
25	2.25	Double beam for warping or sizing	47
26	2.26	(a) Semicircular plate	48
		(b) Plate fixed on the beam	49
27	2.27	Semicircular plate for Warp Beam	49
28	2.28	Arrangement for making beam	50
29	2.29	Arrangement for warping	51
30	2.30	Close up view of the reed and section separator	52
31	2.31	(a) Normal beam and narrow width beam	53
		(b) Beams with same and unequal widths	54
		(c) Arrangement of Beams and reeds	55
		(d) Beaming operation	55
Chapter 3 Experimental Set Up			
32	3.1	Manual Model	63
33	3.2	Screen of NX Software	65
34	3.3	Working Principle of FDM 3D Printer	70
35	3.4	Various components of Dimension 3D Printer	73
36	3.5	(a) Weaver's Beams	75
		(b) Warper's Beams	75
37	3.6	(a) Outer Barrel	76
		(b) Outer Barrel – 3D view	76
		(c) Tapered Slot on Outer Barrel	77
38	3.7	Outer Barrel Assembly	78
39	3.8	Inner Barrel	79
40	3.9	Inner Fixed Flange	82
41	3.10	Separator Plate	84

42	3.11	Detailed view of the separator plate, strip and slot	86
43	3.12	Retainer Block	87
44	3.13	Main Assembly	88
45	3.14	An exploded view of the main assembly	89
46	3.15	Diagrams of 3D model	91
47	3.16	Screen shots of various views from motion simulation	92
48	3.17	Second Design of Inner Barrel	93
49	3.18	Second Design of Separator Plate	95
50	3.19	Full Assembly – Second Attempt	96
51	3.20	Third Design of Inner Barrel	97
52	3.21	Third Design of Separator Plate	98
53	3.22	Full Assembly – Third Attempt	99
Chapter 4 Results & Discussion			
54	4.1	Flanges, Inner fixed flange, Retainer and Separator Plates	102
55	4.2	Inner Barrels	103
56	4.3	Outer Barrels	103
57	4.4	Assembly	104
58	4.5	Design of the Inner Barrel Third Attempt	106
59	4.6	3D printed Prototype of Inner Barrel - Third Attempt	106
60	4.7	Separator Plate and Pin - Third Attempt	107
61	4.8	Fully assembled view of the design – Third Attempt	108
62	4.9	Fully Assembled Prototype – Third Attempt	108
