

## Acknowledgement

A good support system is important to survive and stay sane in unseen. Research is that unseen where there are a lot of dark roads ahead of every move and one need to choose the right one to reach the destination. Without proper guide it is impossible. No words will be sufficient to express my sincere and heartfelt thanks to my guides **Dr S S Bhattacharya**, Professor, Department of Textile Engineering, The Maharaja Sayajirao University of Baroda, Vadodara, Gujarat, India and **Dr Apurba Das**, Professor, Department of Textile Technology, Indian Institute of Technology, Delhi, India. So, I simply say thank you very much sir for giving me invaluable guidance during the entire journey since the inception to completion.

I am extremely thankful to **Prof. A N Mishra**, Ex-Dean and **Prof S S Bhattacharya**, Dean, Faculty of Technology and Engineering and **Dr M V Koranne**, Head, Department of Textile Engineering for providing me all kind of help and support I need. I am extremely thankful to **Indian Institute of Technology, Delhi** for giving me permission to work in the Department of Textile Technology as and when I needed. I also express my sincere thanks to **Department of Science and Technology, Government of India** for the project and funding provided under which banner I actually did the entire work and without this support probably it would have been next to impossible to carry out such lengthy and expensive work from my end. I am extremely thankful to **Autotest Mechanisms Pvt. Ltd.**, Noida, U.P., India to help me to fabricate the instrument and providing me all kind of help as and when it was required.

I extend my sincere thanks to all my **teachers and colleagues** of Department of Textile Engineering, Faculty of Technology and Engineering and The Maharaja Sayajirao University of Baroda, Vadodara for their constant support and encouragement.

My heartfelt thanks are due to **Prof Dipak Kumar De**, **Prof V A Bangalore**, **Shri N N Shah** for their constant motivation and encouragement.

I find lacking in words to express my sincere thanks to my **parents**. When I started this work shortly my **father Nepal Pratihhar** was diagnosed with cancer and being the only child of my parents, I had to be there beside him with proper medical attention. Even during that tough time they always used to encourage me to concentrate on my work. In short span of time my father took his last breath, but his blessings helped me to move on. My **mother Gitarani Pratihhar** is a true example of god to me. She never thinks of herself, only used to serve her family selflessly. Her love and care always encouraged me to move on. Thank you very much mom and dad.

I owe to my **wife Snigdha**; without her constant motivation and support this would have not been possible. As my major work was at IIT, Delhi and Noida, UP, I had to travel extensively. During this period, therefore, I could not fulfil many of the family commitments. Thanks to my wife, she never complained for the same; instead she used to encourage me always to concentrate on my work and she herself bore all the family responsibilities.

Thanks are due to my sweet **daughter Kankana** who was 12<sup>th</sup> Science board student during the tenure of my project work. I could not spare that much quality time for her help as she required for medical entrance examination. By God's grace she cleared the same. Thank you my princess for your cooperation.

Last but not the least, I thank you all who directly or indirectly associated in the successful completion of this thesis and I express my apology for not mentioning their name personally one to one.

Finally I thank almighty for blessings forever.....

**Pratihhar Prabir Nepal**
