

INDEX

Sr. No.	Title	Page #
	Chapter 1 Introduction	1 - 56
1.1	Reproductive process	1
1.2	Endocrine system	1
1.3	Neuroendocrinology	3
1.4	Male reproductive physiology	3
1.5	Testis	4
1.6	Hypothalamic-Pituitary-Testicular Axis	10
1.7	Spermatogenesis	11
1.8	Biosynthesis of steroid hormones (testosterone)	12
1.8.1	Cytochrome P450s	14
1.8.2	Hydroxy steroid dehydrogenases	16
1.9	Steroid hormone functions and biotransformation	17
1.10	Control of spermatogenesis	19
1.11	Mechanism of action of GnRH, gonadotropins and prolactin	20
1.12	Prostate	23
1.13	Physiology	24
1.14	Prostate endocrinology	26
1.15	Prostate disorders	26
1.15.1	Benign prostatic hyperplasia	30
1.15.2	Prostatitis	31
1.15.3	Prostate cancer	31
1.16	Environmental pollutants	31
1.17	Heavy metals	32
1.18	Lead exposure	35
1.19	Cadmium exposure	40
1.20	Aims and objectives	43
1.21	References	43
	Chapter 2 Materials and methods	57 - 87
2.1	Chemicals	58
2.2	Animals	58
2.3	Total RNA extraction	58
2.4	Reverse transcriptase polymerase chain reaction	59

Sr. No.	Title	Page #
2.5	17 β -hydroxy steroid oxidoreductase, 3 α -hydroxy steroid dehydrogenase (3 α -HSD) and 3 β -HSD/17 β -HSD	61
2.6	UDP-Glucoronyl transferase	63
2.7	Leydig cell isolation and purification	64
2.8	Radio Immuno Assay of Testosterone	66
2.9	Radio Receptor Assay (RRA)	67
2.10	Amine measurements (Norepinephrine and Dopamine)	69
2.11	Metal analysis	71
2.12	Oxidative parameters	72
	(a) Reduced glutathione (GSH)	73
	(b) Lipid peroxidation levels (LPO)	73
	(c) Superoxide dismutase (SOD)	74
	(d) Catalase (CAT)	75
	(e) Glutathione peroxidase (GPx)	75
	(f) Glutathione Reductase (GR)	76
	(g) Glucose 6-phosphat dehydrogenase (G6PDH)	77
	(h) Glutathione S-transferase (GST)	77
2.13	Alkaline phosphatase (ALP) and acid phosphatase (ACP)	78
2.14	Estimation of Deoxyribonucleic acid (DNA)	80
2.15	Estimation of Ribonucleic acid (RNA)	81
2.16	Glutamate pyruvate transaminase (GPT)	81
2.17	Prostate specific antigen (PSA)	82
2.18	Histology	83
2.19	Sperm isolation	83
2.20	Sperm count and viability	83
2.21	Sperm motility	84
2.22	Fructose content	84
2.23	Statistical analysis	84
	Chapter 3 Effect of lead and cadmium co-exposure on hypothalamus, pituitary, testicular and hepatic steroid metabolism in adult rats	88 - 110
3.1	Introduction	89
3.2	Experimental design	92
3.2.1	<i>In vivo</i> studies	92

Sr. No.	Title	Page #
3.2.2	<i>In vitro</i> studies	93
3.3	Results	93
3.3.1	<i>In Vivo</i> experiments	93
3.3.2	<i>In Vitro</i> experiments	100
3.4	Discussion	100
3.5	References	107
	Chapter 4 Effect of lead and cadmium co-exposure on hypothalamic-pituitary-testicular axis function	111 - 126
4.1	Introduction	112
4.2	Experimental design	114
4.3	Results	115
4.4	Discussion	118
4.5	References	122
	Chapter 5 Biochemical, cellular and molecular mechanism of lead and cadmium co-exposure on male reproductive system	127 - 186
5.1	Biochemical mechanism	128
5.1.1	Introduction	128
5.1.2	Experimental design	135
5.1.3	Results	136
5.1.4	Discussion	137
5.2	Molecular mechanism	151
5.2.1	Introduction	151
5.2.2	Experimental design	158
5.2.3	Results	159
5.2.4	Discussion	164
5.3	Cellular mechanism	166
5.3.1	Introduction	166
5.3.2	Experimental design	167
5.3.3	Results	168

Sr. No.	Title	Page #
5.3.4	Discussion	168
5.4	References	174
	Chapter 6 Association of environmental pollutants like lead and cadmium with incidence of benign prostatic hyperplasia in patients of western India	187 - 212
6.1	Introduction	188
6.2	Experimental design	191
6.3	Results	195
6.4	Discussion	208
6.5	References	210
	Chapter 7 Summary	213
	Conclusion	220
