

LIST OF TABLES

TABLE		PAGE
1	Language-wise Distribution of Primary Schools of Gujarat State	5
2	Multipurpose courses in Gujarat	12
3	Analysis of Some Non-Verbal Tests of Intelligence for Selection of Sub-Tests	67
4	Selection of Subtests in the Present Test	70
5	Number of Children by Age Groups	72
6	Enrolment of Children in the Age Group 6-11	73
7	Enrolment of Children in the Age Group 11-14	73
8	Details of the Sample of the Tryout	87
9	Time-Limits for the Tests	89
10	Difficulty Values of the Items (Irrespective of Age)	93
11	Agewise Difficulty Values of the Items of the First Five Subtests	98
12	Biserial Coefficients of Test Items (First Five Subtests)	105
13	Agewise Distribution of Difficulty Values of Items (N = 370)	108
14	Administrative Divisions of the Gujarat State	119

TABLE		PAGE
15	Population and Area of Districts of the Gujarat State	119
16	Enrolment by Standards in Primary Schools (1961-62)	122
17	Craftwise Classification of Basic Schools (1961-62)	124
18	Distribution of Pupils Actually under Basic Instruction (as on 31.3.62)	125
19	Villages with and without School (1961-62)	126
20	Languagewise Distribution of Primary Schools (1961-62)	127
21	Primary Schools According to Management (1961-62)	127
22	Children of School-going Age by Age Groups (1961-62)	128
23	Children in the Age Group 6-11 (1961-62)	128
24	Children in the Age Group 11-14 (1961-62)	129
25	Children in the Age Group 14-17 (1961-62)	129
26	Regionwise Selection of Children in the Final Testing	130
27	Selection of Children According to Districts	131
28	Agewise Analysis of the Sample	132
29	Gradewise Analysis of the Sample	132
30	Analysis of the Sample Tested According to the Occupation of Fathers	133
31	Details of the Sample Selected for Final Testing	135

TABLE		PAGE
32	Checking Normality of the Distribution of IQs of Pupils Tested by χ^2 Test	144
33	Agewise Distribution of Scores (N = 6037)	150
34	Agewise Means and Standard Deviations	151
35	Significance of Difference Between Means of Different Ages	156
36	Significance of Difference Between Half-Yearly Means of Different Ages	159
37	Reliability by Test - Retest Method N = (400)	163
38	Scattergram to Determine Reliability by the Split-half Method	165
39	Reliability by Rational Equivalence Methods (N = 400)	166
40	Correlation of the Scores of the Present Test with the Verbal Test	175
41	Correlation of IQs with the Total Examination Scores of Four Subjects (Science, Mathematics, English and Gujarati)	177
42	Correlation of IQs with Teachers' Estimates of Intelligence	178
43	Original Correlation Matrix (N = 1000)	180
44	Rearranged Correlation Matrix (N = 1000)	181
45	First Residual Correlation Matrix	182
46	Second Residual Correlation Matrix	183
47	Third Residual Correlation Matrix	184
48	Centroid Factor Matrix	185
49	Calculation of 'g' Saturation	188

TABLE		PAGE
50	Comparison of the 'g' Saturations Obtained by Thurstone's Centroid Method and Spearman's Method	189
51	Ready Reckoner for IQs	192
52	Decile Points of Raw Scores	197
53	Agewise Classification of Pupils (N = 6037)	200
54	Significance of Difference Between Means of Boys and Girls at Different Ages	206
55	Significance of Difference Between the Means of Rural and Urban Pupils at Different Ages	212
56	Correlation Between Occupations of Fathers and IQs of Children	217
