

ACKNOWLEDGEMENT

I express my deep sense of sincere and profound gratitude to my supervisor *Dr. R.K.George*, Department of Applied Mathematics, Faculty of Technology & Engineering, M. S. University of Baroda, India and currently he is with Department of Mathematical Sciences, University of Delaware, Newark 19711, Delaware State, U.S.A. I gratefully acknowledge the continuing debt to him for his excellent guidance, constant encouragement and keen interest in this work. In spite of his busy schedule, he has taken enough pain to conduct stimulating discussions, in the absence of which this work would not have been possible. I owe a great deal to him for his valuable assistance, guidance, extensive knowledge and for going through the manuscripts as well as improvement.

I would like to convey my heartfelt thanks to Professor A.K. Nandakumaran, Department of Mathematics, Indian Institute of Science (IISc), Bangalore. I sharpened the ideas and some results in this thesis by valuable discussion and suggestion with him from time to time.

I wish to express my sincere thanks to Sardar Vallabhbhai Patel Institute of Technology (S.V.I.T.), Vasad, Gujarat State, for giving me necessary facilities during my work. I owe my special gratitude to all the staff members of Applied Mathematics Department, M. S. University of Baroda, for encouraging co-operation during the course of this work.

Last but not least, I want to express my gratitude to my beloved parents, wife and child who were the great sources of strength during this time. I am also thankful to my dearest brother for his help in making the typesetting of this thesis in LATEX version.

DIMPLEKUMAR N. CHALISHAJAR
