

ACKNOWLEDGEMENTS

I offer flowers of gratitude to the Almighty God who has been the source of strength throughout my life.

The thesis has been an inspiring, very challenging, but always interesting and exciting experience for me. This prologue serves a way to express the debt of gratitude and thankfulness to the mighty minds that have been a beacon light in carrying out and completing this thesis.

I take this privilege to express my deepest regards and gratitude to my supervisor Prof. Krutika Sawant for her inspiring sagacious guidance, patience, crucial contribution and constant encouragement which made her a backbone throughout the study. Her wide knowledge and logical way of thinking have been of great value for me. Her truly scientific intuition has made her as a constant oasis of ideas and passions in science, which exceptionally inspired and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to her more than she knows.

I owe my deepest gratitude to Prof. R. S. R. Murthy, for his valuable suggestions and help whenever sought for.

I express my sincere thanks to Prof. M. R. Yadav, Head, Pharmacy Department, and Prof. (Mrs.) S. J. Rajput, Prof. (Mrs.) Rajani Giridhar, Coordinator, Shri G. H. Patel Pharmacy Building, Pharmacy Department, for providing me with the necessary laboratory facilities and congenial ambience. I sincerely thank Prof. A. N. Misra, Prof. S. H. Mishra, Prof. R. Balraman, Dr. Rajashree Mashru, Dr. Hetal Thakkar for their valuable suggestions and help whenever sought for.

I owe special thanks to Prof. Alok Dhawan (Director, Institute of Life Sciences, Ahmedabad University, Ahmedabad, Gujarat on lien from Scientist E-II & Area Coordinator, Nanomaterial Toxicology Group, Indian Institute of Toxicology Research, Lucknow) for providing me with best facilities to carry out the cell culture studies. My sincere thanks to Dr. Alok Panday (Scientist C, Indian Institute of Toxicology Research, Lucknow) for his support throughout my cell culture studies.

I wish to convey my sincere thanks to Dr. Aruna Korde and Dr. Archana Mukherjee, Radiopharmaceutical Division, Bhabha Atomic Research Centre, Mumbai for their constant support and constructive suggestions throughout my work at BARC.

Acknowledgements are also due to my experimental animals who silently sacrificed their lives for completion of research work.

I take this opportunity to express my thanks to non-teaching staff members at Pharmacy Department, Kalabhavan and Pharmacy Department, Shri G. H. Patel Building for their kind cooperation.

Gift samples of Anastrozole and Exemestane by Sun Pharma Advanced Research Centre, Vadodara, Gujarat are duly acknowledged. I also acknowledge the help provided in term of gifts sample of PLGA, Poloxamer 188 and Capric/caprylic triglyceride by Purac Biomaterials, Netherlands, BASF, Germany and Abitec Corporation, respectively.

I take this opportunity to sincerely thank the All India Council for Technical Education (AICTE), New Delhi for the financial support in terms of National Doctoral Fellowship during this course and Indian Council of Medical Research for providing the international travel grant to present a part of this work at Bionanomed-2013, Danube University, Krems, Vienna, Austria.

Where would I be without my family? My family deserves special mention for their inseparable support and prayers. Whatever Endeavour I have put to complete this work, would not have been possible without their support. I deeply thank my mother, father, brother, sister and bhabhi for their never-ending love and support throughout the years and their encouragement and confidence in me. Words fail me to express my gratitude to all my family members, their dedication, love and persistent confidence in me. I owe for their patience until completion of my dissertation.

My special gratitude is due to my friend Kiran, Garima, Hardik, Piyush and Srikanth who always stood by my side. Their good wishes and emotional push up made me to overcome all sorts of hurdles. They motivated me whenever I felt shorts of energy and rhythm.

No thanks would be enough to appreciate the constant encouragement by my friends to make my work smooth and hassle free. I extend my heartfelt thanks to my dear friends Vaibhav, Greeshma, Abhishek, Praveen, Manjappa, Premal, Vijay, Rakhee, Aditi, Ansarullah, Anshuman, Mohan, Nilambari, Krishna, Govind, Violet, Diti, Reshma, Deepa, Rahul for the help provided by them. I wholeheartedly thank all of them for tireless efforts in all these studies without any constraint.

I would also like to extend my appreciation to my colleagues and friends, especially Khushwant sir, Jigar sir, Vinod sir, Ashutosh sir, Ritesh sir, Sandip sir, Kaustubh sir, Himanshu sir, Deepti mam, Manisha mam, Prudhvi sir, for their advice and their willingness to share their bright thoughts with me, which was very fruitful for shaping up my ideas and research.

I would like to avail this rare opportunity to articulate my genuine appreciation to my most treasured friends Upasana, Sanjay, Srawan, Girish and Jyotsna.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Abhinesh Kumar
