

List of Figures

Figure No.	Title of Figure	Page No.
2.1.1	Vicious Cycle of Intergenerational Malnutrition	13
2.1.2	Factors contributing to Poor Eating Habits of Adolescents	25
2.1.3	Food group components of the Healthy Eating Index	38
2.1.4	Stages of Behaviour Change.	56
2.1.5	Four possible ways that qualitative and quantitative methods might be integrated	60
3.1.1	Formative research – Enrollment profile of the study subjects	65
3.1.2	Wedge slide technique for preparation of a peripheral blood smear	72
4.1.1	Population Pyramid (N=1041)	99
4.1.2	Growth Pattern in Boys at Different ages (N=613)	99
4.1.3	Growth pattern in Girls at Different Ages (N=428)	102
4.1.4	Peak Height Velocity of the Study Subjects (N=1041)	102
4.1.5	Peak Weight Velocity of the Study Subjects (N=1041)	103
4.1.6	Growth Pattern (Mean BMI) Boys V/s Girls at different ages (N=1041)	103
4.1.7	Comparison of Height for Age with other Reference Standards – Boys (N=613)	106
4.1.8	Comparison of Height for Age with other Reference Standards – Girls	106
4.1.9	Comparison of Weight for Age with other Reference Standards – Boys	107
4.1.10	Comparison of Weight for Age with other Reference Standards – Girls	107
4.1.11	Comparison of BMI for Age with other Reference Standards – Boys	108
4.1.12	Comparison of BMI for Age with other Reference Standards – Girls	108
4.1.13	Mean Waist Circumference According to Age and Sex (N=1041)	110
4.1.14	Waist and Hip Circumference at Different Ages- Boys (N=613)	113
4.1.15	Waist and Hip Circumference at Different Ages- Girls (N=428)	113
4.1.16	Waist Circumference and Waist Hip Ratio at Different Ages - Boys (N=613)	114
4.1.17	Waist Circumference and Waist Hip Ratio at Different Ages - Girls (N=428)	114

Figure No.	Title of Figure	Page No.
4.1.18	Mean Mid Upper Arm Circumference According to Age and Sex (N=1041)	116
4.1.19	Comparison of MUAC with Different Standards – Boys (N=613)	116
4.1.20	Comparison of MUAC with Different Standards – Girls (N=428)	117
4.1.21	Prevalence of Underweight (N=1041)	120
4.1.22	Prevalence of Underweight according to the Stage of Adolescence	120
4.1.23	Prevalence of Stunting (N=1041)	121
4.1.24	Prevalence of stunting according to the Stage of Adolescence (N=1041)	121
4.1.25	Prevalence of Thinness (N=1041)	124
4.1.26	Prevalence of Thinness According to the Stage of Adolescence (N=1041)	124
4.1.27	BAZ scores (Present study) in comparison to WHO 2007 BAZ scores	125
4.1.28	Prevalence of Overweight and Obesity (N=1041)	125
4.1.29	Prevalence of Overweight and Obesity According to the Stage of Adolescence	126
4.1.30	Prevalence of Dual Burden of Malnutrition – Boys (N=613)	127
4.1.31	Prevalence of Dual Burden of Malnutrition – Girls (N=428)	127
4.1.32	Mean Intakes of Food groups (N=478)	136
4.1.33	Mean Intake of Food Groups as % RDA – Boys (N=300)	136
4.1.34	Mean Intake of Food Groups as % RDA – Girls (N=178)	138
4.1.35	Food Pyramid Based on the Intakes of the Subjects - Present Study (N=478)	138
4.1.36	Mean Nutrient Intakes as % RDA (N=478)	144
4.1.37	Nutrient intakes at various levels of RDA	145
4.1.38	Frequency of Vegetable Consumption Among the Study Subjects	151
4.1.39	Mean Hemoglobin Levels of the Study Subjects (N=61)	158
4.1.40	Frequency Distribution of the Hemoglobin Levels of the Study Subjects (N=61)	158
4.1.41	Prevalence of Anemia among the subjects in the present study according to the Stage of Adolescence (N=61)	160

Figure No.	Title of Figure	Page No.
4.1.42	Mean Hemtological Indices – Sexwise (N=61)	163
4.1.43	Mean Serum Total Protein Levels According to the Stage of Adolescence	163
4.1.44	Morbidity Profile of the Study Subjects (N=478)	166
4.1.45	Morbidity (ies) Experienced - Agewise (N=478)	166
4.1.46	Morbidities Experienced According to the Stage of Adolescence(N=478)	166
4.1.47	Physical Activity Performed by the Subjects on the Previous Day –Sexwise (N=478)	171
4.1.48	Physical Activity Performed by the Subjects on the Previous Day –Agewise (N= 478)	171
4.1.49	Reported Playtime at Home and at School –Agewise (N=478)	172
4.1.50	Reported Playtime at Home and at School –Agewise (N=478)	172
4.1.51	Reported Sleptime of the Study Subjects – Sexwise (N=478)	173
4.1.52	Reported Sleptime of the Study Subjects – Agewise (N=478)	173
4.1.53	Reported Leisure Time - Sexwise (N=478)	175
4.1.54	Reported Leisure Time - Sexwise (N=478)	175
4.1.55	Reported Studytime of the Study Subjects – Sexwise (N=478)	176
4.1.56	Reported Studytime of the Study Subjects – Sexwise (N=478)	176
4.1.57	Mean Cognitive Test Scores According to the Stage of Adolescence (N=478)	179
4.1.58	Mean cognitive Test Scores of the Anemic Subjects According to WAZ	181
4.1.59	Mean cognitive Test Scores of the Anemic Subjects According to HAZ Scores (N=61)	181
4.1.60	Mean cognitive Test Scores of the Anemic Subjects According to BAZ	181
4.1.61	Subjects Responses (%)Regarding Foods that Help them Grow(N=478)	187
4.1.62	Commonly Consumed Food Items for Breakfast (N=478)	189
4.1.63	Commonly Consumed Food Items as Evening Snacks (N=478)	189
4.1.64	Attitudes based on Food Choices	195
4.1.65	Reported Water Intake (Glasses/ Day) of the Subjects for the Past 24 Hours (N=478)	195

Figure No.	Title of Figure	Page No.
4.1.66	Percent Subject Response Regarding Foods Most Liked While Eating Out	200
4.1.67	Foods Purchased from Street Vendor / Shops Apart from Pocket Money (N=478)	200
4.1.68	Prevalence of Overweight / Obesity among the Teachers	209
4.1.69	Response (%) of the Teachers Regarding the Harmful effects of Soft Drinks	209
4.1.70	Response (%) Regarding Foods Required by Adolescents During Illness (N=14)	211
4.1.71	Response (%) Regarding Foods to be Served when the Child is Back from Play	211
4.1.72	Response (%) Regarding Foods to be Served for Breakfast	213
4.1.73	Response (%) Regarding Foods to be Served as Evening Snacks	213
4.2.1	Mean HEIA Scores v/s Nutritional Status (N=478)	223
4.2.2	Mean HEIA Component Scores according to Religion	227
4.2.3	Mean HEIA Component Scores according to the Type of Family	227
4.2.4	Relationship between Mean HEIA Component Score and Family Size	229
4.2.5	Relationship between Mean HEIA Component Scores and Per Capita Income	229
4.2.6	Relationship between Mean HEIA Component Score and Father's Education	230
4.2.7	Relationship between Mean HEIA Component Scores and Mother's Education	230
4.2.8	Relationship between Mean HEIA Component Scores and Mother's Occupation	231
4.2.9	Relationship between Mean HEIA Component Scores and Dietary Habits	231
4.2.10	Scatter plot showing HEIA scores for Individual Components	233
4.2.11	Quality of Practices as per FBACA Scores (N=631)	241
4.2.12	Mean FBACA Components Score and Religion	245
4.2.13	Mean FBACA Component Scores and Type of Family	245
4.2.14	Mean FBACA Components Scores and Family Size	246
4.2.15	Relationship between Mean FBACA component Scores and Per Capita Income	246
4.2.16	Mean FBACA Component Scores and Father's Education	247

Figure No.	Title of Figure	Page No.
4.2.17	Mean FBACA Component Scores and Mother's Education	247
4.2.18	Mean FBACA Component Scores and Mother's Occupation	249
4.2.19	Mean FBACA Component Scores and Dietary Habits	249
4.2.20	Scatter plot showing FBACA scores for Individual Components	250
4.2.21	Scree plot – Principal Component Analysis of HEIA	259
4.2.22	Scree plot – Principal Component Analysis of FBACA	259
4.3.1	Age and Sexwise Distribution of the Study Subjects	267
4.4.1	Mean Energy, Protein and Fat Intakes at Various Levels of RDA: Impact of the CHALK Programme (Percent Subjects)	305
4.4.2	Mean Calcium and Iron Intakes at Various Levels of RDA: Impact of the CHALK Programme (Percent Subjects)	306
5.4.1	Overview of the Impact of the CHALK Programme on increase in Knowledge levels of the study subjects	330
5.4.2	Overview of the Impact of the CHALK Programme on the Knowledge Levels of the study subjects	331
5.4.3	Overview of the Impact of the CHALK Programme on the Dietary Practices of the study subjects	332
