

List of Tables

Chapter 1

Table 1.1. Characteristics of selected remote sensing sensors.....	09
---	----

Chapter 2

Table 2.1. Attributes of Hyperion (EO-1) instrument.....	38
Table 2.2. List of Indices tested for estimation of Chlorophyll, Chlorophyll a and b from laboratory spectra.....	52
Table 2.3. Factor loadings for PLS model generation.....	56

Chapter 3

Table 3.1. Structural and floristic dynamics of the mixed vegetation cover (Total number of quadrats n=9).....	64
Table 3.2. Total quadrats marked for each vegetation class in the study area.....	69
Table 3.3. Bands selected with the help of Stepwise Discriminant Analysis.....	70
Table 3.4a. Confusion matrix obtained using ANN classifier with 22 selected bands.....	73
Table 3.4b. Confusion matrix obtained using SAM classifier with 22 selected bands	73
Table 3.4c. Confusion matrix obtained using SVM classifier with 22 selected bands.....	74
Table 3.5a. Confusion matrix obtained using SAM classifier with all 165 bands.....	76
Table 3.5b. Confusion matrix obtained using SVM classifier with all 165 bands.....	76

Table 3.6a. Biophysical attributes for teak and bamboo vegetation covers.....	81
Table 3.6b. Biophysical attributes for mixed vegetation covers.....	81
Table3.7. Biochemical attributes for teak and bamboo	81
Table 3.8a. Error in prediction of biophysical attributes of teak vegetation cover.....	81
Table 3.8b. Error in prediction of biophysical attributes of bamboo vegetation cover.....	82
Table 3.9. Error in prediction of biophysical attributes of mixed vegetation cover.....	82
Table 3.10a. Error in prediction of biochemical attributes of teak vegetation cover.....	82
Table 3.10b. Error in prediction of biochemical attributes of bamboo vegetation cover.....	82
Table 3.11 . Developed vegetation indices for measured parameters.....	91
Table 3.12. Comparison of developed indices with other published indices.....	92
Table 3.13. Thickness of leaves for species selected for Laboratory spectra acquisition.....	100
Table 3.14. Measured biochemical attributes for species selected for Laboratory spectra acquisition.....	101
Table 3.15. Discrimination analysis (DA) between leaf level reflectance spectra (<i>Tectona</i> , <i>Dendrocalamus</i> , <i>Mangifera</i> , <i>Madhuca</i> , <i>Ficus</i>).....	101
Table 3.16. Performance of different indices for estimation of total chlorophyll.....	102
