

LIST OF TABLES

TABLES	PAGE No
1 Early Childhood Care and Development (ECCD) Programmes in Developing Countries : In Brief	43
2 Distribution of Infants During Pre-Test According to Gender and Age	62
3 Background Information on Infants Family in Frequencies and Percentages	64
4 Description of Tools	65-66
5 Patterns of Mother - Infant Interactions : An Example	75
6 Plan of Analysis	76
7 Percentage Gains in Pre-Post Test Scores of AWWs Regarding Developmental Milestones of Infancy	91
8 Supportive Maternal Interaction in Frequency and Average Per Mother and Total	106
9 Neutral Maternal Interaction in Frequency Average Per Mother and Total	107
10 Restrictive Maternal Interaction in Frequency Average Per Mother and Total	108
11 MCA Results on Effects of the Programme on Supportive Maternal Interactions of the Experimental Group	109
12 MCA Results on Effects of Programme on Neutral Maternal Interactions of Experimental Group	110
13 Modes of Infants' Interaction in Frequency Average Per Child and Total	112
14 Comparison of Pre-test Scores for Experimental and Control Groups on BSID Motor Development	115
15 Comparison of Pre-test scores for Experimental and Control Groups on BSID Mental Scale Using t-test	115
16 Comparison Post-test Scores Experimental and Control Groups on BSID Motor Scale Using t-test	116
