

INDEX

1. Introduction	 01
2. Review of literature	33
3. Aims and objectives	 41
4. Experimental	 46
5. Methods, Results and discussion	
i. Atorvastatin and Fenofibrate	48
ii. Atorvastatin and Amlodipine	85
iii. Atorvastatin and Ezetimibe	113
iv. Atorvastatin and Ramipril	140
v. Nebivolol and Hydrochlorthiazide	182
6. Summary	 212

Serial No.	Particulars	Page No.
01	Introduction	01
1.1	High Performance Liquid Chromatography	02
1.2	High Performance Thin Layer Chromatography	07
1.3	Spectrophotometric methods	07
1.3.1	Simultaneous equation method (Vierodt's method)	09
1.3.2	The absorption ratio method (Q- Analysis)	10
1.3.3	Zero-crossing derivative spectra method	10
1.3.4	Derivative spectrophotometric method	10
1.3.5	Ratio derivative spectra (Derivative quotient spectra)	11
1.4	Chemometrics	12
1.4.1	Classical least squares (CLS)	13
1.4.2	Inverse least squares (ILS)	13
1.4.3	Principle component regression (PCR)	14
1.4.4	Partial least squares (PLS)	15
1.5	Drug profile	
1.5.1	Atorvastatin	17
1.5.2	Fenofibrate	17
1.5.3	Amlodipine Besylate	18
1.5.4	Ramipril	18
1.5.5	Ezetimibe	19
1.5.6	Nebivolol	19
1.5.7	Hydrochlorothiazide	20
1.6	Biological significance of drugs	
1.6.1	Atorvastatin (ATOR)	21
1.6.2	Fenofibrate (FENO)	21
1.6.3	Ezetimibe (EZET)	22
1.6.4	Ramipril (RAMP)	22
1.6.5	Nebivolol (NEB)	23
1.6.6	Hydrochlorothiazide (HCTZ)	24
1.7	Rationale of combination	
1.7.1	ATOR and FENO	24
1.7.2	ATOR and AMLO	25
1.7.3	ATOR and RAMP	25
1.7.4	ATOR and EZET	26
1.7.5	NEB and HCTZ	27
02	Review of literature	
2.1	Atorvastatin	33
2.2	Fenofibrate	33
2.3	Amlodipine besylate	33
2.4	Ramipril	33

2.5	Ezetimibe	34
2.6	Nebivolol	34
2.7	Hydrochlorothiazide	34
03	Aims and objectives	41
3.1	In summary, the primary objective of proposed work	43
3.1.1	ATOR and FENO	43
3.1.2	ATOR and AMLO	43
3.1.3	ATOR and EZET	43
3.1.4	ATOR and RAMP	43
3.1.5	NEB and HCTZ	44
04	EXPERIMENTAL	46
4.1	HPLC instrumentation	46
4.2	Spectrophotometric instrumentation	46
4.3	HPTLC instrumentation	46
4.4	Pure standards and reagents	47
05	Simultaneous estimation of atorvastatin and fenofibrate	48
5.1	Pure standards and reagents	48
5.2	Procedure	48
5.3	Results and discussion	52
5.3.1	Simultaneous equation method (SEM)	52
5.3.2	Q - Absorbance method (Q- ANAL)	54
5.3.3	First derivative Zero-crossing method (FDZC)	56
5.3.4	Ratio spectra first derivative spectrophotometry (RFD)	58
5.3.5	Spectrophotometric method validation	62
5.4	Results and discussion Chromatography, HPTLC and Chemometric methods	68
5.5	Validation of analytical method	72
06	Simultaneous estimation of atorvastatin and amlodipine	85
6.1	Reagents, Standards and Pharmaceutical preparations	85
6.2	Procedure	85
6.3	Results and discussion	89
6.4	Validation of the developed methods	95
07	Simultaneous estimation of atorvastatin and ezetimibe	113
7.1	Reagents and Pharmaceutical preparations	113
7.2	Procedure	113
7.3	Results and discussion	117
7.3.1	Q - Absorbance method (Q- ANAL)	117
7.3.2	Chemometric techniques	121
7.3.3	RP-HPLC and HPTLC methods	124
7.4	Validation of analytical method	124
08	Simultaneous estimation of atorvastatin and ramipril	140
8.1	Reagents and Pharmaceutical preparations	140

8.2	Procedure	140
8.3	Results and discussion (Spectrophotometric methods)	143
8.3.1	Simultaneous equation method (SEM)	143
8.3.2	First derivative Zero-crossing method (FDZC)	147
8.3.3	Ratio spectra first derivative spectrophotometry (RFD)	149
8.4	Spectrophotometric method validation	153
8.5	Results and discussion Chromatography, HPTLC and Chemometric methods	159
8.5.1	Chromatography method	159
8.5.2	HPTLC method	162
8.5.3	Chemometric methods	163
8.6	Validation of methods	165
09	Simultaneous estimation of nebivolol and hydrochlorthiazide	182
9.1	Reagents and Pharmaceutical preparations	182
9.2	Procedure	182
9.3	Results and discussion Spectrophotometric methods (simultaneous equation, first derivative zero-crossing and ratio first derivative methods)	186
9.3.1	Simultaneous equation method (SEM)	186
9.3.2	First derivative Zero-crossing method (FDZC)	188
9.3.3	Ratio spectra first derivative spectrophotometry (RFD)	190
9.4	Spectrophotometric method validation	193
9.5	Results and discussion Chromatography and chemometric methods	199
9.5.1	Chromatography	199
9.5.2	Chemometric methods	200
9.6	Validation of the developed methods	201
10	Summary and conclusion	212
