

## LIST OF FIGURES

| FIGURES NO.        | TITLE OF FIGURES                                                                          | PAGE NO |
|--------------------|-------------------------------------------------------------------------------------------|---------|
| <b>CHAPTER – I</b> |                                                                                           |         |
| 1.1.1              | Map Showing the Study Area                                                                | 21      |
| 1.1.2              | Map Showing the Geographical Boundaries                                                   | 22      |
| 1.3.5.1            | Map of Vidarbha Showing the Major Minerals Available                                      | 32      |
| 1.3.5.2            | Map Showing the Important Iron Ore and Coal Deposits                                      | 33      |
| 1.3.5.3            | Map Showing the Close Proximity of the Sites to the Natural Mineral Resources             | 35      |
| 1.3.5.4            | Map Showing the Close Proximity of the Megalithic Sites to the Economic Iron Ore Deposits | 36      |
| 1.4.1.1            | Exposed Cairn Circle at Dhamna Linga                                                      | 38      |
| 1.4.1.2            | Iron Lamp along with Pottery Sherds as Burial Offering                                    | 39      |
| 1.4.1.3            | Terracotta Boat Shaped Sarcophagus from the Periphery of Megalith 19                      | 39      |
| 1.4.2.1            | General Overview of Dhavalameti                                                           | 40      |
| 1.4.2.2            | The Excavated Cairn Circle at Dhavalameti Showing a Double Stone Circle                   | 41      |
| 1.4.2.3            | Exposed Human Skeletal Remains                                                            | 41      |
| 1.4.2.4            | Exposed Human Skeletal Remains along with Iron Object Offering                            | 42      |
| 1.4.2.5            | Broken Spike as Funerary Offering                                                         | 42      |
| 1.4.3.1            | River Venna as the Dividing Boundary between Habitation and Burial                        | 43      |
| 1.4.3.2            | Double Stone Circle at the Site of Vyahad                                                 | 44      |
| 1.4.3.3            | Exposed Cairn Circle                                                                      | 45      |
| 1.4.3.4            | Pottery along with Iron Objects and a Copper Bangle as Funerary Offering                  | 45      |
| 1.4.3.5            | Human Skeletal Remains from the Cairn Circle                                              | 46      |
| 1.4.4.1            | General view of the site of Mahurjhari                                                    | 47      |
| 1.4.4.2            | Close- Up of the Megalith at Locality-I of Mahurjhari                                     | 48      |
| 1.4.5.1            | Incomplete Stone Circle at Khapa                                                          | 49      |
| 1.4.5.2            | Destruction of the Site of Khapa in Progress                                              | 50      |
| 1.4.6.1            | Unexcavated Cairn Circle at the site of Khairwada                                         | 51      |
| 1.4.7.1            | General Overview at the Site of Bhagimohari                                               | 52      |

|                      |                                                                                                     |     |
|----------------------|-----------------------------------------------------------------------------------------------------|-----|
| 1.4.7.2              | Cairn Circle at the Site of Bhagimohari                                                             | 53  |
| 1.4.8.1              | Stone Sarcophagus (??) from the Site of Borgaon                                                     | 54  |
| 1.4.9.1              | General View of Naikund                                                                             | 55  |
| 1.4.9.2              | Closer View of a Stone Circle at Naikund                                                            | 55  |
| 1.4.9.3              | Reconstructed Iron Smelting Furnace from Naikund                                                    | 56  |
| 1.4.10.1             | Cairn Circle at the Site of Raipur Hingna                                                           | 57  |
| 1.4.11.1             | General View of the Site Junapani                                                                   | 58  |
| 1.4.11.2             | Double Stone Circle at Junapani                                                                     | 58  |
| 1.4.11.3             | Intersecting Stone Circles (One with Double Boulder Boundary and the other Single Boulder Boundary) | 59  |
|                      |                                                                                                     |     |
| <b>CHAPTER – II</b>  |                                                                                                     |     |
| 2.3.3.1              | Body Centered Cubic Structure                                                                       | 66  |
| 2.3.3.2              | Face Centered Cubic Structure                                                                       | 66  |
| 2.3.3.3              | Iron (Fe)-Cementite ( $\text{Fe}_3\text{C}$ ) Equilibrium Diagram                                   | 68  |
| 2.3.4.3.a            | Microstructure Showing Both Ferrite and Pearlite                                                    | 70  |
| 2.3.4.3.b            | Microstructure Showing Only Pearlite                                                                | 70  |
| 2.4.3.1              | Optical Micrograph Showing Dendritic Microstructure                                                 | 73  |
|                      |                                                                                                     |     |
| <b>CHAPTER – III</b> |                                                                                                     |     |
| 3.1                  | Household Objects                                                                                   | 81  |
| 3.2                  | Agricultural Objects                                                                                | 82  |
| 3.3                  | Carpentry Tools                                                                                     | 83  |
| 3.4                  | Surgical Tools                                                                                      | 84  |
| 3.5                  | Fishing Tool                                                                                        | 85  |
| 3.6                  | Horse Ornaments                                                                                     | 86  |
| 3.7a                 | Defensive and Offensive Weapons                                                                     | 87  |
| 3.7b                 | Defensive and Offensive Weapons                                                                     | 88  |
| 3.8                  | Diagram Showing Transverse and Longitudinal Sampling Areas                                          | 97  |
| 3.9                  | Diagram Showing Sampled Specimen to be Later Plastic Mounted                                        | 98  |
| 3.10                 | Plastic Mounted Specimen Ready for Microscopic Viewing                                              | 100 |

|                     |                                                                                |     |
|---------------------|--------------------------------------------------------------------------------|-----|
| 3.11                | Belt Polisher used for Rough Grinding                                          | 101 |
| 3.12                | Wheel Polisher Used for Fine Polishing                                         | 101 |
| 3.13                | Diagram Showing the Process of Fine Polishing used Diamond Paste               | 102 |
| 3.14                | Optical Microscope Used for Microscopic Studies                                | 104 |
| 3.15                | Scanning Electron Microscope Coupled with Energy Dispersive X-Ray Spectrometry | 104 |
|                     |                                                                                |     |
| <b>CHAPTER – IV</b> |                                                                                |     |
| 4.1.A               | Adzes                                                                          | 116 |
| 4.1.B               | Arrow Head                                                                     | 117 |
| 4.1.C               | Axe                                                                            | 119 |
| 4.1.D               | Bangle                                                                         | 120 |
| 4.1.E               | Bevelled Point                                                                 | 120 |
| 4.1.F               | Borer                                                                          | 120 |
| 4.1.G               | Chisel                                                                         | 121 |
| 4.1.H               | Dagger                                                                         | 122 |
| 4.1.I               | Digging Tool                                                                   | 123 |
| 4.1.J               | Drill Point                                                                    | 123 |
| 4.1.K               | Engraver                                                                       | 123 |
| 4.1.L               | Fish Hook                                                                      | 124 |
| 4.1.M               | Hoe                                                                            | 125 |
| 4.1.N               | Horse Ornaments                                                                | 126 |
| 4.1.O               | Knife                                                                          | 127 |
| 4.1.P               | Ladle                                                                          | 128 |
| 4.1.Q               | Lamp Stand                                                                     | 129 |
