

LIST OF FIGURE

FIG. NO.	TITLE	PAGE
2.1	Mechanisms of particle deposition in the airways	18
2.2	The structure of multilamellar vesicles showing the organization of phospholipid bilayers and the encapsulation of lipophilic and hydrophilic compounds	36
3.1	Regressed calibration curve for the estimation of AMK	93
3.2	Regressed calibration curve for the estimation of AMK In biological fluids	96
3.3	Regressed calibration curve for the estimation of PC	98
3.4	Regressed calibration curve for the estimation of Chol	100
3.5	Regressed calibration curve for the estimation of AMB	106
3.6	Regressed calibration curve for the estimation of AMB in biological fluids	108
4.1	Flow diagram showing formulation technique in the preparation of AMK liposomes by TFH method	118
4.2	Flow diagram showing formulation technique in the preparation of AMK liposomes by REV method	119
4.3	Flow diagram showing formulation technique in the preparation of AMB liposomes by TFH method	121
4.4	Flow diagram showing formulation technique in the preparation of AMB liposomes by REV method	122
4.5	Photomicrographs showing liposomal vesicles under normal light for AMB37	147
5.1	AMB liposomes before lyophilization under polarized light	180
5.2	AMB liposomes after lyophilization under polarized light	181
5.3	SEM photomicrographs of AMK69 (1000X)	183
5.4	SEM photomicrographs of AMK70 (3000X)	184
5.5	SEM photomicrographs of AMB77 (3000X)	185
5.6	SEM photomicrographs of AMB78 (2000X)	186

5.7	Schematic of the apparatus showing the standard glass twin stage impinger	187
6.1	Drug leakage profile under freezer and refrigerator storage of LDPI formulations of AMK	197
6.2	Drug leakage profile under controlled room temperature and accelerated storage of LDPI formulations of AMK	198
6.3	Drug leakage profile under freezer and refrigerator storage of LDPI formulations of AMB	200
6.4	Drug leakage profile under controlled room temperature and accelerated storage of LDPI formulations of AMB	201
7.1	Schematic diagram of <i>in vitro</i> diffusion cell	208
7.2	Chart illustrating comparative in vitro diffusion of AMK LDPI formulations with plain drug	213
7.3	Chart illustrating comparative in vitro diffusion of AMB LDPI formulations with plain drug	214
7.4	Comparative mean flux of plain drug and LDPI formulations across artificial membrane	218
7.5	Comparative diffusion coefficient of plain drug and LDPI formulations across artificial membrane	219
8.1	Drug level in biological samples following instillation of liposomal DPI of AMK and plain drug	228
8.2	Drug level in biological samples following instillation of liposomal DPI of AMB and plain drug formulation	230
