

## List of Tables

Table No.	Description	Page No
2.1	Details of the preparation of calibration curve of selected elements using Atomic Absorption Spectroscopy	34
3.1	Comparative microscopic studies of aerial parts of the selected plants	77
3.2	Extractive values of successive solvent extraction of aerial parts of <i>L. reticulata</i> , <i>D.volubilis</i> and <i>P.microphylla</i>	79
3.3	Comparative phytoprofile of the extract in successive solvent extractions	80
3.4	Summary of Chromatographic conditions for development of Chromatograms using HPTLC	83
3.5	Comparative Peak Analysis of triterpenoidal and steroidal compounds in Pet Ether extract	84
3.6	Comparative Peak Analysis of triterpenoidal and steroidal compounds in Chloroform extract	86
3.7	Comparative Peak Analysis of Flavonoidal compounds in ethyl acetate extract	88
3.8	Comparative Peak Analysis of flavonoidal compounds in methanol extract	89
3.9	WHO parameters for aerial parts of <i>L.reticulata</i> , <i>D.volubilis</i> and <i>P.microphylla</i>	93
3.10	Estimation of various elemental ions from plants	95
3.11	Analysis of chromatogram of Aerial parts and roots of <i>L.reticulata</i>	97
3.12	Analysis of chromatograms of Aerial parts and roots of <i>D.volubilis</i>	98
3.13	Analysis of chromatograms of aerial parts and roots of <i>P.microphylla</i>	99
3.14	Linear Regression Data of calibration curve for salicylic acid and stigmasterol	109
3.15	Intra-day and Inter-day precision of HPTLC method	19
3.16	Recovery studies	109
3.17	Estimation of Salicylic acid and Stigmasterol in Methanolic extracts of plants.	110
3.18	Summary of Validation of the developed analytical method for estimation of salicylic acid and stigmasterol	110
3.19	Linear Regression Data for calibration curves	114
3.20	Intra-day and Inter-day precision of HPTLC method:	114
3.21	Recovery studies for estimation of $\beta$ carotene	114
3.22	Estimation of $\beta$ Carotene in Acetone extracts of plants	115
3.23	Summary of Validation studies	115
3.24	Calibration Curve for determination of Flavonoidal content by $AlCl_3$ Method	117
3.25	Estiamtion of flavonoid content by Aluminium chloride method	117

3.26	Calibration curve of Estimation of Flavonoid contend by 2,4-DNPH method	118
3.27	Estiamtion of flavonoid content by 2,4-DNPH method	119
3.28	Total Flavonoid Content of plant materials	120
3.29	Development of calibration curve for estimation of Total Phenolics	121
3.30	Estimation of Total Phenolic Content of the plant extracts	121
3.31	Comparative summary of physico chemical parameters evolved for aerial parts of <i>L.reticulata</i> , <i>D.volubilis</i> and <i>P.microphylla</i> .	122
3.32	Stability studies of the Methanolic extract of Aerial parts of <i>L.reticulata</i> , <i>D.volubilis</i> and <i>P.microphylla</i>	124
3.33	Physico chemical Evaluation of authentic plant material.	127
3.34	Physico chemical evaluation of Market samples and coded standards.	127
3.35	Evaluation of Marketed and freshly prepared samples of <i>Jivantaydi Ghrit</i> :	133
3.36	Effect of Heating Time and Temperature on formulation	133
3.37	<i>in vitro</i> radical scavenging activity of Methanolic and Aqueous extract of the aerial parts of the plants:	139
3.38	<i>in vitro</i> radical scavenging activity of the Methanolic and Aqueous extract of the stem of the plants:	139
3.39	Reducing Power of Aqueous Extract of the selected plants	141
3.40	Reducing Power of Methanolic Extract of the selected plants	141
3.41	The highest tolerable level of the extracts evaluated	143
3.42	Assessment of <i>In vivo</i> Hepatoprotective Activity	146
3.43	<i>In vitro</i> Hepatoprotective activity:	148
3.44	Assessment of Comparative Potential of Methanolic Extract against Swim Endurance Test	151
3.45	Percentage alterations in selected biochemical markers in swim endurance test	152
3.46	Biochemical and Histological Studies on mammary glands of rat	158
3.47	Percentage alterations in Biochemical and Histological parameters as compared to control	162
3.48	Lactogenic Potential of formulations assessed	167
3.49	Comparison of Lactogenic Potential of formulations with respective controls	167
