

TABLE OF CONTENTS

CHAPTER-1

Introduction & Review of Literature.....	1
1.1 Antibiotics	1
1.1.1 Targets of antibiotics	1
1.2 Antibiotic resistance/tolerance.....	2
1.2.1 Acquired Resistance.....	2
1.2.2 Intrinsic Resistance	2
1.3 Escherichia coli	5
1.4 Bacterial global regulatory system.....	6
1.5 The Stringent response	6
1.5.1 Involvement of RelA and SpoT in metabolism of ppGpp.....	7
1.5.2 Pivotal role of global regulator - (p)ppGpp	15
1.5.3 BarA ("bacterial adaptive responses")	21
1.6 Growth rate regulation and ppGpp.....	22
1.6.1 Ribosome feedback model.....	22
1.6.2 ppGpp model.....	23
1.7 References	24

CHAPTER 2

Objectives	36
------------------	----

CHAPTER 3

3.1 Materials.....	37
3.1.1 Microbial Strains	37
3.1.2 Plasmids and Constructs.....	38
3.1.3 Antibiotics.....	40
3.1.4 Chemicals and Biochemicals	40
3.1.5 Enzymes	40
3.1.6 Primers	41
3.1.7 Growth media used for culturing <i>E.coli</i>	42
3.1.8 Reagents for plasmid preparation.....	43
3.1.9 Solutions for agarose gel electrophoresis	43

TABLE OF CONTENTS

3.1.10 Reagents for SDS –PAGE and Western Blotting	43
3.1.11 Miscellaneous:	45
3.1.12 Culture Maintenance and Growth conditions:	45
3.2 Methods	45
3.2.1 DNA Isolation:	45
3.2.2 Introduction of DNA into cells	46
3.2.3 Electrophoresis.....	47
3.2.4 Elution of DNA from agarose gel.....	48
3.2.5 Genomic DNA library preparation:	48
3.2.6 PCR protocols	48
3.2.7 Western Blotting	49
3.2.8 RNA isolation & semi-quantitative PCR	49
3.2.9 Statistical analysis:	50

CHAPTER 4

4.1 Introduction	51
4.2 Materials and methods	52
4.2.1 Growth Conditions	52
4.2.2 Bacterial Strains and Plasmids	52
4.2.3 Construction of plasmids used in this study	54
4.2.4 Site directed mutagenesis of <i>relA</i>	54
4.2.5 Site directed mutagenesis of Cys389 in the catalytic domain of <i>rumA</i>	55
4.2.6 Confirmation of constructs.....	55
4.2.7 Antibiotic tolerance phenotype	56
4.3 Results and Discussion	56
4.3.1 Isolation of genomic clones containing <i>relA rumA</i> DNA	56
4.3.2 Multiple copies of <i>relA rumA</i> confer tolerance to several antibiotics.....	57
4.3.3 RelA catalytic function is required for antibiotic tolerance.....	58
4.3.4 Multiple copies of <i>relA</i> with its promoters confer resistance to antibiotics	60
4.4 Conclusion.....	62
4.5 References.....	62

TABLE OF CONTENTS

CHAPTER 5

5.1 Musings on the two strains used in this study, MG1655 and MC4100.....	65
5.2 Materials and Methods	67
5.2.1 P1 lysate preparation.....	68
5.2.1.1 Plate method	68
5.2.1.2 Broth method	68
5.2.2 P1 Transduction.....	68
5.2.3 Assaying of <i>relA</i> phenotype	69
5.2.4 Determining growth curve	70
5.3 Results and Discussion	70
5.3.1 Construction of <i>relA</i> ⁺ derivative of MC4100.....	70
5.3.2 Interchanging <i>spoT</i> alleles between KP4 (MC4100 <i>relA</i> ⁺) and MG1655.....	72
5.3.3 Qualitative differences of <i>relA1</i> and <i>relA2009</i> phenotype:	72
5.3.4 Construction of MC4100 <i>relA</i> ⁺ strain by other groups.....	74
5.4 References	75

CHAPTER 6

6.1 Introduction	77
6.1.1 Genomic organization of <i>rumA</i> , <i>relA</i> and <i>barA</i>	78
6.1.2 Coexistence of <i>relA</i> and <i>rumA</i>	78
6.2 Materials and Methods / Strategy.....	79
6.2.1 Growth Conditions	79
6.2.2 Bacterial strains and plasmids.....	80
6.2.3 Construction of chromosomal C389P substitution mutation in <i>rumA</i> by SDM.....	82
6.2.3.1 Construction of vectors for the purpose of <i>rumA</i> gene mutation.....	82
6.2.3.2 Construction of chromosomal $\Delta rumA1$ mutant KP1.1.....	83
6.2.4 Determination of growth advantage of $\Delta rumA1$ mutant.....	84
6.2.5 Cloning of <i>CAT</i> cassette in <i>rumA</i> gene at a plasmid level for creation of genomic <i>rumA::CAT</i> insertion mutant.....	84
6.2.5.1 Gene disruption by targeted chromosomal engineering of <i>E. coli</i> strain DY330.....	85
6.2.5.1.1 Linear DNA Preparation	85
6.2.5.1.2 Induction of λ recombination functions	85

TABLE OF CONTENTS

6.2.5.2 Gene disruption through Red helper plasmid – pKD46	86
6.2.6 P1 lysate preparation.....	87
6.2.6.1 Plate method	87
6.2.6.2 Broth method	87
6.2.7 P1 Transduction.....	87
6.2.8 Assaying of <i>relA</i> phenotype	88
6.2.9 Determining growth curve	88
6.2.10 Quantitation of RelA Protein expression by Western blot.....	89
6.2.11 RNA isolation and mRNA expression of <i>relA</i> gene by semi-quantitative RT PCR	89
6.3 Results	89
6.3.1 Creation of chromosomal <i>rumA</i> mutant using two different strategies	89
6.3.1.1 Site directed mutagenesis of catalytic cysteine 389	90
6.3.1.1.1 Construction of <i>rumA1</i> mutation in plasmid pBluescriptKS (pTE11)	90
6.3.1.1.2 Construction of $\Delta rumA1$ chromosomal mutant	92
6.3.1.1.3 Chromosomal <i>rumA</i> mutation ($\Delta rumA$) does not cause growth disadvantage.....	93
6.3.1.1.4 $\Delta rumA$ mutant is amorphic <i>relA</i> mutant too	94
6.3.1.2 Insertional mutation in <i>rumA</i> gene	95
6.3.1.2.1 Integration of <i>CAT</i> cassette into the chromosome using two methods.....	96
6.3.1.2.1.1 Recombineering in DY330 strain	96
6.3.1.2.1.2 Recombineering using pKD46 helper plasmid)	97
6.3.1.2.2 Determination of orientation of the <i>CAT</i> cassette in <i>rumA</i> gene.....	98
6.3.2 Phenotypic Characterization studies	99
6.3.2.1 Growth phenotype of <i>rumASall::CAT</i> mutant of MC4100.....	99
6.3.2.2 Growth phenotype of <i>rumASall::CAT</i> mutant of MG1655.....	103
6.3.2.3 The effect of <i>barA</i> and <i>uvrY</i> mutation in KP4 (MC4100 <i>relA</i> ⁺).....	103
6.3.2.4 P1 transduction mediated exchange of <i>spoT</i> alleles	103
6.3.2.4.1 Effect of exchange of <i>spoT</i> alleles on phenotypes of KP4 and MG1655	104
6.3.2.4.2 Effect of exchange of <i>spoT</i> alleles on <i>rumASall::CAT</i> phenotype.....	105
6.3.2.5 Assessment of <i>relA</i> phenotype of <i>rumA::CAT</i> mutation.....	107
6.3.2.6 Isolation of spontaneous suppressors of slow growth phenotype.....	109
6.3.2.7 KP8 cannot be transformed by multiple copy of <i>relA</i> ⁺ plasmid	110
6.3.2.8 Measurement of RelA protein by Western analysis.....	111

TABLE OF CONTENTS

6.3.2.9 Quantitation of <i>relA</i> transcript.....	114
6.3.2.10 <i>spoT</i> ⁺ as a suppressor of lethality of multiple copy of <i>relA</i> ⁺ in KP8.....	115
6.3.2.11 Role of transcriptional factors relevant to stringent response.....	119
6.3.2.11.1 DksA.....	119
6.3.2.11.2 RpoZ.....	121
6.3.2.11.3 RpoS.....	123
6.3.2.11.4 RpoB	124
6.4 References.....	125

CHAPTER 7

Summary and conclusion.....	129
Appendix.....	i
List of figures and tables.....	vii
