Chapter		Page
-	SUMMARY	
I	INTRODUCTION	1
II	THERMOLUMINESCENCE AND ITS APPLICATIONS	5
	A. Introduction to luminescence	5
	B. Types of luminescence	7
	C. Thermoluminescence	8
	D. Thermoluminescence models for interpretation of thermoluminescence phenomenon.	10
	E. Factors affecting thermoluminescence.	
	F. Applications of thermoluminescence...	18
III	PROPERTIES, APPLICATION AND DETECTION OF ALPHA RADIATION.	25
	A. General aspects of radiations	25
	B. Characteristics of alpha rays.	26
	C. Applications of alpha rays.	28
	D. Detection of alpha rays.	29
	E. Radiation units.	32
IV	EXPERIMENTAL	34
	A. Preparation of samples.	34
	B. Thermal annealing treatment.	35
	C. Source of irradiation	36
	D. Instrumentation	36
V	RESULTS	39
VI	DISCUSSION	
	PART-I THERMOLUMINESCENCE	49
	A. Short review of present state of understanding of thermoluminescence in alkali halides.	49
	B. Glow peaks related to pure NaCl.	54
	C. TL-peaks related to Ba ⁺⁺ impurity in NaCl:Ba phosphors.	58
	D. Mechanism of TL-emission process at 220°C peak in NaCl:Ba (T) phosphor.	61

Chapter		Page
VI	E. Effect of different types of ionizing radiations on TL of NaCl and NaCl:Ba.	64
	F. Glow peaks associated with pure and Ba doped KCl.	66
	G. Peaks commonly observed in Ba activated NaCl and KCl.	71
	PART - II APPLICATION OF TL of NaCl:Ba (T) AND KCl:Ba (T) IN RADIATION DOSIMETRY.	76
	A. Brief account of research in TL dosimetry.	76
	B. Ba- doped sodium and potassium chlorides in alpha dosimetry.	79
	CONCLUSIONS	84
