

List of Tables

Table 2.1 Parameter values for testing NLMS algorithm performance	34
Table 3.1 List of symbols used in STSA algorithms.....	53
Table 3.2 A summary of STSA methods	62
Table 3.3 Objective measures used for speech quality assessments	71
Table 4.1 Sentences from the NOIZEUS speech corpus used in quality evaluation.....	84
Table 4.2 Objective quality evaluation with airport noise.....	85
Table 4.3 Objective quality evaluation with car noise	86
Table 4.4 Objective quality evaluation with street noise.....	86
Table 4.5 Objective quality evaluation with train noise	86
Table 4.6 Objective quality evaluation with babble noise.....	87
Table 4.7 Objective quality evaluation with station noise.....	87
Table 4.8 Objective quality evaluation with exhibition noise	87
Table 4.9 Objective quality evaluation with restaurant noise.....	88
Table 4.10 Objective quality evaluation with white noise.....	88
Table 4.11 Objective quality evaluation of wavelet de-noising methods	96
Table 6.1 MOS rating scale	130
Table 6.2 Specification of parameters for generation of impulse response...	135
Table 6.3 Set of parameters for testing proposed algorithm in reverberant environments.....	135
Table 6.4 Objective evaluation of proposed algorithm in reverberant environments.....	136
Table 8.1 Profile results comparison	164
Table 8.2 CCS profile summary of hybrid algorithm	165
Table 9.1 Comparison of results from the research papers published contemporaneous	168
Table A.1 List of papers presented/published	185
Table B.1 List of short term training programs attended.....	188
