

ACKNOWLEDGEMENTS

The satisfaction and euphoria that accompanies the successful completion of any task would be incomplete without mention of the people who made it possible with constant guidance, support and encouragement that crowns all the efforts with success.

It gives me immense pleasure to express my utmost respect and deepest gratitude to my guide Prof. R.S.R. Murthy, Professor in Pharmaceutics, Pharmacy Department, M.S. University of Baroda for his esteemed guidance, innovative thinking, functional freedom, encouragement and moral support showered on me.

The possible distinguishing feature of him, which every students admires, is that he never gave a chance for anyone to work 'under him' but 'with him'. At this juncture, only one description I find which truly fit him that he is a loving person, embodiment of virtue, honesty, discipline, knowledge, education, punctuality, humility and ability to forgive which adorns his personality as fragrance adorns the flower.

"Sir, till the memory lasts you will remain in my heart and soul".

I would like to thank to Prof. A.N. Mishra, Head, Pharmacy Department, M.S. University of Baroda, for providing all the facilities during the course of my work.

I am grateful to Prof. S.H. Mishra, Prof. Krutika Sawant, Prof. R. Balaraman, Prof. M. R. Yadav, Dr. P.A. Nagar and Dr. R.C. Mashru for their invaluable advice during the entire course of my investigation work.

I am thankful to M.S. University of Baroda for awarding me with the Research Fellowship award as a supportive to my dissertation. I am extremely thankful to the All India Council for Technical Education, New Delhi for providing financial support (National Doctorate Fellowship) for my project work.

I owe my special word of thanks to Mrs. Pushpa Mishra, Scientist 'E', Institute of Nuclear Medicine and Allied Sciences for her valuable guidance and motivation during my training at INMAS. I am thankful to Dr. Anil Ku. Mishra, Director, Institute of Nuclear Medicine and Allied Sciences, Delhi for providing necessary facilities to carry out the radiolabelling experiments and gamma scintigraphy imaging study. I am grateful

to Mrs. Krishna Chuttani and all the members of INMAS for helping me through out my in vivo studies.

I would like to thank to my colleagues Vijay, Tushar, Smita and Vikram for their kind co-operation and needful discussion with constant encouragement.

I earnestly thank Anwar, Sameer and Vinoth for their support during my entire project work.

I wish to acknowledge the help rendered by all other teaching and non-teaching staffs during the present work.

I would also like to thank Mr. Laxmidhar Maharana, Lecturer in Pharmacology, SPS, ITER, Bhubaneswar for his benevolence and timely helping hand during my entire project work.

Last but not the least, this thesis was written in affectionate dedication to my loving parents and my brothers, who through the years have given me support and valuable advices and whose indomitable love and affection always stand before me as a constant source of inspiration at every moment of my life.

Above all, I would like to bow my head before GOD, THE ALMIGHTY who has blessed me with peace of mind written in affectionate dedication to, courage and moral strength, shown me the correct path, and made me competent enough to fulfill my duties and achieve cherished goal of my life.

Snigdha Pattnaik
