

ACKNOWLEDGEMENT

This Thesis has been possible due to sincere guidance, encouragement, and help of many people whom I would like to acknowledge and thank from the bottom of my heart.

First of all, this thesis grew out of a series of dialogues with my Guide Professor (Dr.) A. S. Patel. I own a deep sense of gratitude for sparing his precious time for this thesis. His meticulous guidance and dynamic efforts in a planned manner have made this thesis possible. Through his Socratic questioning, he brought me closer to the reality I had initially perceived, eventually enabling me to grasp its rich complexity. His comments on chapter drafts are themselves a course in critical thought upon which I will always draw. His capacity to combine critique with an immediate empathy and commitment towards work will always inspire me. His constant encouragement during the visits of the SIP structures and related sites has enabled me to understand the problem and study very closely. I am immensely grateful that he generously shared his in depth knowledge and experience in the field of groundwater, which gave me the aptitude and perception in applying the theoretical aspects practically. I feel privileged to have him as a mentor since my undergraduate days, this association with him has certainly played an important role in shaping my career path, and I shall remain indebted to him all my life.

Secondly I would like to convey our sincere thanks to International Water Management Institute (IWMI), Sri Lanka and Sir Ratan Tata Trust, Mumbai for financially supporting this study. Without their research grant, it would not be possible for me to carry out this study.

I am very much thankful to Dr. Tushaar Shah, Principal Scientist, IWMI, Vallabh Vidyanagar, Anand, Gujarat for his valuable cooperation and encouragement to carry out this research.

I am also very much thankful to the officials of the Salinity Ingress Prevention Circle, Narmada, Water Resources & Water Supply Department, Government of Gujarat; Gujarat Water Resources Development Corporation Ltd., Gandhinagar for providing the required data and timely guidance on various site specific geohydrological and other aspects of the coastal Saurashtra belt,

water quality data of the coastal belt of Saurashtra and for their kind cooperation during our site visit and during data collection.

I also would like to express my deep gratitude to Prof. G. S. Parthasarathy, Ex-Director, WREMI for his constant encouragement and guidance in perfect direction, valuable comments & everlasting support, which helped me in successful completion of my work. He is an ideal for me and I cannot thank them enough for the knowledge that he shared with me during my research studies.

I am very grateful for my years at the Civil Engineering Department, Faculty of Technology & Engineering, The M. S. University of Baroda. My stay at Faculty has not only gave me some good friends like Shri N. J. Shrimali but also shaped my personality. I wishfully acknowledge and express my thanks to all my ex-colleagues Shri M. B. Patel, Prof. (Dr.) H. M. Patel, Dr. G. S. Joshi, Shri N. J. Shrimali, Shri V. M. Rana & all my teachers in the faculty for their moral support and encouragement during the course of my study. I would like to make special mention of Prof. H. V. Bhavnani & Prof. P. N. Sutaria for their encouragement to do research work.

During later stage of my study, I have joined Parul Institute of Engineering & Technology (PIET), Limda, Vadodara as Assistant Professor of Civil Engineering Department, where a entire new world has gave me a very warm welcome.

No words can give an adequate expression to my feelings of gratitude to Prof. R. H. Pandya. He has always been a source of inspiration and perpetual encouragement, morning greetings mixed with advice and a sense of humor about life.

I would also like to thank my managing trustee Dr. J. K. Patel for his unlimited trust on me and offering me responsibilities from time to time. I always inspired by and like his hard work and efforts that he puts for any of his goals.

I would also like to thank Dr. Devanshu Patel for providing all the facilities available at his command, specially offering me leave to completing my study and that too with a personal assistant to help me. I am extremely thankful for his kind gestures, the memories of which shall remain etched on my heart, forever.

This acknowledgement would be incomplete without mentioning the painstaking efforts and patience of my family. No expression, howsoever nicely used by me, could be adequate enough to describe my feelings of gratitude and thankfulness to my parents, whose foresight and values paved the way for a privileged education. It is

because of their unbound affection and endless zeal & encouragement that I took up research work.

Lastly I take this opportunity to convey my special thanks to my wife Dipti and my kids Palak and Bhavya who sportingly agreed to virtually write off their hobbies, requirements, and existence to enable me to complete this study. Without their support it would not be possible for me to concentrate on my work.

Last but not least, a blend of gratitude, pleasure and great satisfaction, is what I feel to convey to all those who have directly or indirectly contributed to successful completion of my Thesis work. & whose mention may have been slipped out but are within my heart and mind.

- **VILIN PAREKH**
