

## LIST OF TABLES

No.		Page No.
2.1	Anti-nutritional components of soybean and related factors.	2.10
2.2	Major soy products and their proximate composition.	2.12
2.3	Research on selected soybean based Indian recipes.	2.22- 23
2.4	Functional properties of soy proteins products.	2.28
2.5	Fabricated foods using soy products.	2.69
5.1	Proximate composition of soybean.	5.2
5.2	Proximate composition of soymilk, maska, residue and whey.	5.5
5.3	Per cent recovery of soy solids from bean to milk and milk to maska.	5.7
5.4	Effect of soymilk total solids level on the pH and TA during 12 hrs. incubation with lactic culture at 30°C.	5.11
5.5	Effect of fermentable sugars and milk on TA and pH in soymilk.	5.14
5.6	Effect of bean / water ratio of soymilk on the curd strength and syneresis.	5.19
5.7	Processing details of initial soy cheese spread making trials.	5.25
5.8	Sensory evaluation of initial soy cheese spreads.	5.25
5.9	Effect of agitation on sensory characteristics of soy cheese spreads.	5.35
5.10	Effect of agitation on the sensory qualities of maska based cheese spreads.	5.38
5.11	Effect of pH adjustment during curing on the sensory characteristics of soy cheese spreads.	5.43
5.12	Effect of pH adjustment during curing on the sensory scpres of maska based cheese spreads.	5.44

5.13	Effect of adding papain and GSH on sensory scores of maska based cheese spreads.	5.47
5.14	Effect of adding papain and GSH on sensory scores of cheese blended slurry spreads.	5.47
5.15	Effect of adding papain and GSH on sensory scpres of milk solids blended slurry spreads.	5.50
5.16	Effect of curing cheese blended slurry samples at LT and RT on the sensory scores.	5.53
5.17	Effect of curing cheese blended slurry spreads at alternating temperatures on the sensory scores.	5.54
5.18	Effect of the extent of curing on the sensory scores of cheese blended maska spreads.	5.57
5.19	Effect of the extent of curing on the sensory scores of cheese blended slurry spreads.	5.59
5.20	Effect of the extent of curing on the sensory scores of milk solids blended slurry spreads.	5.59
5.21	Effect of adding emulsifiers on the textural characteristics of soy cheese spreads.	5.67
5.22	Effect of adding stabilizers along with emulsifiers on the textural qualities of the maska based spreads.	5.69
5.23	Effect of adding stabilizers along with emulsifiers on the textural qualities of cheese blended slurry spreads.	5.70
5.24	Effect of adding stabilizers along with emulsifiers on the textural qualities of milk solids blended slurry spreads.	5.74
5.25	Effect of adding selected spices on the acceptability of soy cheese spreads.	5.75
5.26	Effect of adding spices on the sensory scpres of soy cheese spreads.	5.78
5.27	Effect of adding hydrogenated fat on the texture of soy cheese spreads.	5.97
5.28	Gross chemical composition of soy cheese spreads.	5.97
5.29	Sensory evaluation of soy cheese spreads.	5.99
5.30	Physico-chemical and microbiological qualities of soy cheese spreads during storage.	5.102
