

ACKNOWLEDGEMENT

I take this opportunity to express my true feelings to all those who cooperated with me during the course of this research work.

I am indebted immensely to my mentor, Dr. Surekha Devi, Professor, Department of Chemistry, Faculty of Science, M.S. University of Baroda for her constant encouragement, enthusiastic approach, guidance and constructive criticism throughout the course of this research work. It was a privilege to report to her almost daily my progress and get her suggestions which shaped the destiny of this work. I am also grateful to her for invaluable advice and conversations not only regarding research work but also for other problems without which it would not have been possible to complete this work.

I am grateful to Prof. A.C. Shah, Head, Department of Chemistry and Prof. P.K. Bhattacharya for providing me the departmental facilities for this study.

I also wish to thank Dr. S.S. Madhav Rao for elemental analysis and to Mr. Hitesh Raval for TGA.

I gratefully acknowledge the financial support from DSA by awarding me the Project assistantship for the year 1992-93.

I would like to express my thanks to my colleagues, friends, teaching and non-teaching staff of the Chemistry Department for their valuable support.

Above all a word of love to my aunt, Ms. Hemlata M. Shah for her inspiration.

Lastly, I thank Mr. Atul Patel and Mr. Samir Patel for doing an excellent typing with care and Mr. Sanjay Patel and Mr. J.M. Sinnarkar for drawing figures and bringing this thesis in the final form.

Rupal Shah
